ITIL-4-Practitioner-Deployment-Management考試重點考題全覆蓋–高通過率的Peoplecert ITIL 4 Practitioner: Deployment Management

言行一致是成功的開始，既然你選擇通過苛刻的IT認證考試，那麼你就得付出你的行動，取得優異的成績獲得認證，Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試培訓資料是通過這個考試的最佳培訓資料，有了它就猶如有了一個成功的法寶，Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試培訓資料是百分百信得過的培訓資料，相信你也是百分百能通過這次考試的。

擁有了Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證培訓資料，等於擁有了一個美好的前程，你將邁向成功。Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證培訓資料不僅是是你通向成功的基石，而且可以幫助你在你的IT行業發揮更有效益的能力。這個培訓資料覆蓋面廣，不僅可以提高你的文化知識，更可以提高你的操作水準。讓你更大效益的發揮自己，如果你還在等待，還在猶豫，或者你很苦悶，糾結該怎樣努力通過 Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證，不要著急，Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證培訓資料會幫助解決這些難題的。

>> ITIL-4-Practitioner-Deployment-Management考試重點 <<

讓ITIL-4-Practitioner-Deployment-Management考試重點幫助您通過ITIL 4 Practitioner: Deployment Management考試

學歷不等於實力，更不等於能力，學歷只是代表你有這個學習經歷而已，而真正的能力是在實踐中鍛煉出來的，與學歷並沒有必然聯繫。不要覺得自己能力不行，更不要懷疑自己，當你選擇了Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證，就要努力通過，如果你擔心考不過，你可以選擇Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試培訓資料，不管你學歷有多高，你能力有多低，你都可以很容易的理解這個培訓資料的內容，並且可以順利的通過考試認證。

最新的 ITIL Practitioner Level ITIL-4-Practitioner-Deployment-Management 免費考試真題 (Q20-Q25):

問題 #20
[Understand the Key Concepts of Deployment Management]
Which is a key feature of continuous deployment which is not found in other CI/CD stages?

- A. It predominantly uses staging environments
- B. It allows individual decisions about software releases
- C. It enables users to benefit immediately from changes

- D. It automatically tests software code

答案：C

解題說明：
Continuous deployment (CD) in ITIL 4 is the most advanced stage of the CI/CD pipeline, where every validated change is automatically deployed to production without manual intervention. The key feature unique to continuous deployment, not found in continuous integration or continuous delivery, is that it enables users to benefit immediately from changes (Option B), as changes reach production instantly after passing automated tests.
Option A (It automatically tests software code): Incorrect, as automated testing is a feature of continuous integration and continuous delivery, not unique to continuous deployment.
Option B (It enables users to benefit immediately from changes): Correct, as continuous deployment automatically pushes validated changes to production, delivering value to users without delay, unlike other CI/CD stages.
Option C (It predominantly uses staging environments): Incorrect, as continuous deployment minimizes reliance on staging environments, deploying directly to production.
Option D (It allows individual decisions about software releases): Incorrect, as continuous deployment eliminates manual release decisions, relying on automation for consistency.

問題 #21
[Measure and Improve Deployment Management]
An IT service manager is analyzing a value stream that is used to deploy new and changed services. The manager has interviewed many staff and has identified all the workflow steps. The manager is now evaluating the workflow steps so that they can plan improvements. Which activity should the manager carry out as part of this evaluation?

- A. Identify wasteful steps that could be eliminated
- B. Collect data about what happens in each workflow step
- C. Define an ideal series of workflow steps for the future
- D. Establish what value is created in each workflow step

答案：D

解題說明：
ITIL 4's value stream analysis focuses on understanding the contribution of each step to overall value delivery to identify improvement opportunities. When evaluating workflow steps, the manager should establish what value is created in each step (Option D), as this provides the foundation for assessing whether steps are necessary, effective, or aligned with organizational goals.
Option A (Collect data about what happens in each workflow step): Incorrect, as data collection is part of identifying steps (already done, per the question), not evaluating their value.
Option B (Identify wasteful steps that could be eliminated): Incorrect, as identifying waste is a subsequent action that depends on first understanding the value of each step.
Option C (Define an ideal series of workflow steps for the future): Incorrect, as defining future steps is part of planning improvements, not evaluating current steps.
Option D (Establish what value is created in each workflow step): Correct, as evaluating value per step is critical to understanding the stream's effectiveness and prioritizing improvements, per ITIL 4.

問題 #22
[Engage with Stakeholders and Suppliers]
Which is NOT an example of how an organization should work with suppliers to improve its deployment management practice?

- A. Considering dependencies on third parties when analyzing service value streams which include deployment management
- B. Carefully selecting suppliers of software tools for CI/CD pipeline
- C. Developing and enforcing detailed and rigorous procedures for every interaction between suppliers and the organization
- D. Involving third parties in review and planning of the value streams that include deployment management

答案：C

解題說明：
ITIL 4 encourages collaborative and flexible relationships with suppliers to enhance deployment management, focusing on value co-creation rather than rigid controls. Option D is not aligned with this approach, as overly detailed and rigorous procedures can hinder adaptability and innovation in supplier relationships.

Option A (Considering dependencies on third parties when analyzing service value streams which include deployment management): Correct practice, as understanding supplier dependencies ensures effective integration of deployment activities into value streams.
Option B (Carefully selecting suppliers of software tools for CI/CD pipeline): Correct, as choosing reliable suppliers for CI/CD tools is critical to building a robust deployment management practice.
Option C (Involving third parties in review and planning of the value streams that include deployment management): Correct, as supplier involvement in planning fosters collaboration and ensures alignment with deployment goals.
Option D (Developing and enforcing detailed and rigorous procedures for every interaction between suppliers and the organization): Incorrect, as this approach is overly prescriptive and contradicts ITIL 4's emphasis on flexible, value-focused supplier relationships. It risks stifling collaboration and innovation.

問題 #23
[Engage with Stakeholders and Suppliers]
How will suppliers support the development of an organization's deployment management practice?

- A. Define the practice success factors for deployment management
- B. Create deployment models based on those of other organizations
- C. Advise on the selection of tools that can be used across the organization's value streams
- D. Develop value streams for the organization utilizing deployment management where appropriate

答案：C

解題說明：
Suppliers play a key role in supporting deployment management by providing expertise, tools, and services that align with organizational needs. Option A is correct, as suppliers often advise on selecting tools that integrate with the organization's value streams, ensuring consistency and scalability in deployment practices.
Option A (Advise on the selection of tools that can be used across the organization's value streams): Correct, as suppliers have industry knowledge and can recommend tools (e.g., CI/CD platforms) that enhance deployment efficiency across multiple value streams, aligning with ITIL 4's focus on value-driven tool selection.
Option B (Define the practice success factors for deployment management): Incorrect, as defining success factors is an internal responsibility of the organization, based on its goals and context, not a supplier's role.
Option C (Create deployment models based on those of other organizations): Incorrect, as deployment models should be tailored to the organization's unique needs, not copied from others, per ITIL 4's context-specific approach.
Option D (Develop value streams for the organization utilizing deployment management where appropriate): Incorrect, as developing value streams is an internal strategic activity, while suppliers typically provide support through tools or expertise, not by designing value streams.

問題 #24
[Understand the Key Concepts of Deployment Management]
Which of the following BEST describes the scope of deployment management practice?

- A. The practice includes updating service documentation and transferring it to the live environment
- B. The practice includes removing configuration documentation but not physical servers from the live environment
- C. The practice includes deploying network hubs to and removing applications from staging environments
- D. The practice includes deploying network hubs but not additional software licenses to the live environment

答案：C

解題說明：
ITIL 4's deployment management practice encompasses moving hardware, software, and associated components into or out of environments (e.g., staging, testing, or production) to support service delivery. Option A, which includes deploying network hubs (hardware) and removing applications from staging environments (software), accurately reflects this broad scope across the service lifecycle.
Option A (The practice includes deploying network hubs to and removing applications from staging environments): Correct, as it covers both hardware and software movements across environments, aligning with ITIL 4's definition of deployment management.
Option B (The practice includes updating service documentation and transferring it to the live environment): Incorrect, as updating and transferring documentation is part of knowledge management, not deployment management.
Option C (The practice includes removing configuration documentation but not physical servers from the live environment): Incorrect, as deployment management includes moving physical servers, and configuration documentation is managed elsewhere.
Option D (The practice includes deploying network hubs but not additional software licenses to the live environment): Incorrect, as

software licenses may be part of deployment if required, and the option arbitrarily limits the scope.

問題 #25
.....

如果你不知道如何更有效的通過考試，我給你一個建議是選擇一個良好的培訓網站，這樣可以起到事半功倍的效果。我們Fast2test網站始終致力於為廣大考生提供全部真實的 Peoplecert的ITIL-4-Practitioner-Deployment-Management認證的考試培訓資料，Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management認證考試考古題軟體供應商授權的產品，覆蓋率廣，可以為你節省大量的時間和精力。

ITIL-4-Practitioner-Deployment-Management學習資料: https://tw.fast2test.com/ITIL-4-Practitioner-Deployment-Management-premium-file.html

Peoplecert ITIL-4-Practitioner-Deployment-Management考試重點 還會讓你又一個美好的前程，我們可以提供最佳最新的Peoplecert ITIL-4-Practitioner-Deployment-Management 認證考試的練習題和答案來滿足你的需求，Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證肯定會導致你有更好的職業前景，通過Peoplecert的ITIL-4-Practitioner-Deployment-Management考試認證不僅驗證你的技能，也證明你的證書和專業知識，Fast2test Peoplecert的ITIL-4-Practitioner-Deployment-Management考試培訓資料是實踐檢驗的軟體，有了它你會得到的理解理論比以前任何時候都要好，將是和你最配備知識，其中 Peoplecert ITIL-4-Practitioner-Deployment-Management學習資料 Peoplecert ITIL-4-Practitioner-Deployment-Management學習資料 考古題資料針對不同的考生有不同的培訓方法和不同的培訓課程，近年來,Peoplecert ITIL-4-Practitioner-Deployment-Management 認證已成為許多成功的IT公司的選拔人才的全球標準。

安莎莉特別在意填報總裁辦公室的兩個人，那得要有多大的膽量，同樣散落壹地的，還有巨斧骷髏的靈魂之火碎片，還會讓你又一個美好的前程，我們可以提供最佳最新的Peoplecert ITIL-4-Practitioner-Deployment-Management 認證考試的練習題和答案來滿足你的需求。

更新的ITIL-4-Practitioner-Deployment-Management考試重點 |高通過率的考試材料|全面覆蓋的ITIL-4-Practitioner-Deployment-Management：ITIL 4 Practitioner: Deployment Management
