#### 問題 #21

A table report is shared with a user. That user CANNOT see the table report in the Report Center list. Which role-based permission has NOT been set correctly for this user?

- A. Create Report access to the domain
- **B. Run Report access to the domain**
- C. Ability to manage Tiles and Dashboards
- D. Access to Insights

答案: B

#### 解題說明:

When a user cannot see a table report in the Report Center list, the issue typically stems from insufficient role-based permissions (RBP) granted to the user for accessing reports in that domain. Specifically:

\* Understand Role-Based Permissions (RBP):

\* In SAP SuccessFactors, reports and analytics visibility is governed by RBP settings. These settings ensure that users only see the reports and data they are authorized to access.

\* Permissions are categorized into domains such as "Employee Central," "Performance Management," etc.

\* Key Permissions for Reports in the Report Center: To view or run reports in Report Center, users need:

\* Run Report Access: This allows users to execute reports for domains they are permitted to access.

\* Create Report Access: This enables users to create or modify reports.

\* Manage Tiles and Dashboards Access: This is necessary for interacting with dashboards and tiles, not table reports specifically.

\* Access to Insights: This refers to viewing analytic insights and does not directly impact table report visibility.

\* Diagnosing the Issue:

\* The given scenario describes a user being unable to view a shared table report.

\* The most likely cause is the absence of Run Report access to the domain associated with the table report.

\* Without this permission, the system restricts the user from running or even viewing the report, even if it has been shared with them.

\* Steps to Resolve:

\* Navigate to Admin Center # Manage Permission Roles.

\* Select the permission role assigned to the user in question.

\* Click Permissions # Reports Permissions.

\* Verify that the Run Report Permission is granted for the specific domain associated with the shared report.

\* If not, enable this permission and save the changes.

\* Test Access:

\* After updating the permissions, the user should be able to view the table report in the Report Center.

\* SAP SuccessFactors Help Portal: Role-Based Permissions

\* SAP SuccessFactors People Analytics Reporting Guide (Latest Release): Check for details on report permissions and their

implications.

\* SAP KBA 2461114: Troubleshooting Report Center permissions.

\* Learning Path: SAP Open Learning on SuccessFactors RBP and Analytics (openSAP).

Step-by-Step Analysis:References and Documentation:This explanation ensures that the resolution is precise, supported by standard SAP practices, and verifiable through official SAP documentation.
