Huawei HCSP-Presales-Campus Network Planning and Design V2.0 Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which of the following are slicing technology implementation solutions?

- A. Flex-channel
- B. FlexE
- C. Channelized sub-interface
- D. Slice ID

Answer: A,B,C

Explanation:

In the Xinghe Intelligent Campus solution, "Network Slicing" is used to provide hard or soft isolation for different services (e.g., separating video conferencing from guest Wi-Fi). The three primary implementation solutions (resource isolation methods) defined in the HCSP V2.0 curriculum are:

* FlexE (Flexible Ethernet) (A): Provides physical-layer hard isolation by dividing the MAC/PHY interface into slots.

* Flex-channel (Flexible Channel) (C): A Huawei-patented technology that provides dedicated bandwidth with nearly zero interference.

* Channelized sub-interface (D): Uses sub-interfaces with reserved bandwidth to provide logical isolation.

Slice ID (B) is an identifier carried in the packet header (such as the IPv6/SRv6 extension header) used to map traffic to a specific slice; it is a label/identifier, not the underlying resource isolation technology implementation itself.

NEW QUESTION # 20

What benefits does Huawei's IT and OT converged production network solution deliver to customers?

- A. Intelligent O & M
- B. Digital and intelligent production
- C. Intelligent wireless connections
- D. Flexible manufacturing

Answer: B,C

Explanation:

Huawei's Campus Production Network Solution (specifically for Industrial/Manufacturing scenarios) focuses on the convergence of Information Technology (IT) and Operational Technology (OT). The primary benefits highlighted in the HCSP V2.0 guides are:

* Intelligent wireless connections (A): Using Wi-Fi 6/7 with deterministic latency to replace cables on the factory floor, enabling mobile production.

* Digital and intelligent production (D): The ultimate goal of the convergence is to enable real-time data collection from sensors (OT) to the cloud (IT), facilitating the transformation to Smart Manufacturing.

Note: While Intelligent O & M is a feature of the platform, A and D are the specific strategic benefits defining the "IT/OT Convergence" value proposition.

NEW QUESTION # 21

The VLANIF interface on a Layer 2 network device is usually used as which of the following IP address?

- A. Service IP address
- B. Wired IP address
- C. Interconnection IP address
- D. Management IP address

Answer: D

Explanation:

In a typical campus hierarchy, a Layer 2 switch does not perform routing for user traffic. Therefore, its VLANIF interface is not

used as a default gateway (Service IP). Instead, it is configured with a Management IP address to allow administrators or the iMaster NCE-Campus controller to access the device via SSH, SNMP, or NETCONF for configuration and O & M purposes.

NEW QUESTION # 22

Which of the following scenarios can Huawei's cloud-managed campus network solution apply to?

- A. Primary/Secondary school
- B. Shopping mall/Supermarket
- C. Micro store
- D. Hotel

Answer: A,B,C,D

Explanation:

Huawei's CloudCampus Solution is designed for high scalability and multi-branch management. It is specifically recommended in the V2.0 design guides for:

- * Retail (A, D): Centralized management of many small, geographically dispersed stores.
- * Education (B): Simplified O & M for K-12 schools with limited IT staff.
- * Hospitality (C): Fast deployment and easy guest Wi-Fi management for hotels.

NEW QUESTION # 23

When iMaster NCE-Campus functions as an authentication server, it can connect to common user data sources, such as AD and LDAP.

- A. True
- B. False

Answer: A

Explanation:

In a modern campus network, unified identity management is critical. iMaster NCE-Campus acts as a RADIUS and Portal server that integrates with existing enterprise directories. It supports synchronization and authentication against Microsoft Active Directory (AD), LDAP, and third-party databases via standard protocols. This enables features like SSO (Single Sign-On) and ensures that user permissions are consistent with their existing corporate credentials.
