## TOP Latest ACD201 Questions: Appian Senior Developer - High-quality Appian ACD201 Top Exam Dumps

Maybe you will find that the number of its ACD201 test questions is several times of the traditional problem set, which basically covers all the knowledge points to be mastered in the exam or maybe you will find the number is the same with the real exam questions. You only need to review according to the content of our ACD201 practice quiz, no need to refer to other materials. With the help of our ACD201 study materials, your preparation process will be relaxed and pleasant.

### Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.</li></ul>

- Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.

## Appian Senior Developer Sample Questions (Q81-Q86):

### NEW QUESTION # 81

You need to implement a requirement where a third-party system starts a process in Appian. The third-party system can invoke a service only through Web Services Description Language (WSDL).

What should you do to start the process in Appian?

- A. Create a default WSDL URL using process model UUID.
- **B. Expose process model as a web service.**
- C. Create a custom plug-in.

**Answer: B**

Explanation:

To allow a third-party system to start a process in Appian using WSDL, you should expose the process model as a web service. This generates a WSDL endpoint that the external system can invoke.

### NEW QUESTION # 82

A recent Health Check report of your application indicates an increased risk of large context size in the interfaces.

What are two possible contributors to this risk? (Choose two.)

- A. Local variables are set to refresh every five minutes.
- **B. Data transformation is performed inside the interface rather than delegated to the source system.**
- **C. Multiple local variables hold duplicate data.**
- D. The load variable has a web service response as JSON.

**Answer: B,C**

Explanation:

Performing data transformation inside the interface can increase the amount and size of context data stored, raising context size risk. Multiple local variables holding duplicate data unnecessarily inflate the interface's memory footprint, contributing to large context size.

### NEW QUESTION # 83

You're refining a story regarding a highly regulated form, where information needs to be sent to a regulatory body at the end of each month to ensure that the business complies with laws and legislation. The story only concerns the creation of the form.

You need to create a form that captures information to comply with the regulatory requirements.

Which two questions should you ask the business? (Choose two.)

- **A. What information does the regulatory body require?**
- B. How often is the information sent to the regulatory body?
- **C. What is the maximum length of each field?**
- D. Is the information sent to the regulatory body via an integration?

**Answer: A,C**

Explanation:

Knowing what information the regulatory body requires ensures the form captures all necessary data for compliance.

Understanding the maximum length of each field guarantees that the data collected will meet validation and regulatory constraints.

### NEW QUESTION # 84

You're inspecting the items in a deployment package for issues you might have missed during package preparation.

Which two objects can be in your list of missing precedents for an application? (Choose two.)

- **A. Connected System**
- **B. Group Type Custom**
- C. System Knowledge Center
- D. Document

**Answer: A,B**

Explanation:

Connected System and Group Type Custom can both be missing precedents in an Appian deployment package, meaning dependent objects required by the application may not have been included.

#### NEW QUESTION # 85

You're creating a support case record type while working on a support case management system. You want to track support case status changes.

You want to use record events to track this information.

Which record data source type is the most appropriate for you to use?

- A. Web service without data sync enabled
- B. Process Model source with data sync enabled
- **C. Database source with data sync enabled**

**Answer: C**

Explanation:

A database source with data sync enabled is required to use record events for tracking support case status changes, as Appian record events are only supported for synced record types with a database as the data source.

#### NEW QUESTION # 86

.....

For candidate who wants a better job through obtaining a certificate, passing the exam becomes significant. Our ACD201 Study Materials will offer you a chance like this. Our ACD201 study guide is known for the high quality and high accuracy. We are pass guarantee and money back guarantee for our customers. If you can get the certificate, you will have a better competitive power in the job market and have more opportunity.
