

Authoritative Cisco 100-160 Valid Test Test - 100-160 Free Download

P.S. Free & New 100-160 dumps are available on Google Drive shared by ITCertMagic: <https://drive.google.com/open?id=1jqSQIoybw7vQ27xooexjZaTGkMujoLL>

By contrasting with other products in the industry, our 100-160 test guide really has a higher pass rate, which has been verified by many users. As long as you use our 100-160 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. 100-160 learning guide hopes to progress together with you and work together for their own future. The high passing rate of Cisco Certified Support Technician (CCST) Cybersecurity exam training guide also requires your efforts. If you choose 100-160 test guide, I believe we can together contribute to this high pass rate.

If you are new to our website, you can ask any questions about our 100-160 study materials. Our workers are very familiar with our 100-160 learning braindumps. So you will receive satisfactory answers. What is more, our after sales service is free of charge. So our 100-160 Preparation exam really deserves your choice. Welcome to come to consult us. We are looking forward to your coming at any time.

High Pass-Rate 100-160 Valid Test Test - 100% Pass 100-160 Exam

These formats are Cisco 100-160 PDF dumps, web-based practice test software, and desktop practice test software. All these three Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam questions contain the real, valid, and updated Cisco Exams that will provide you with everything that you need to learn, prepare and pass the challenging but career advancement 100-160 Certification Exam with good scores.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection and prevention systems, providing insight into how threats are mitigated within network environments.
Topic 2	<ul style="list-style-type: none">• Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.

Topic 3	<ul style="list-style-type: none"> • Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 4	<ul style="list-style-type: none"> • Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 5	<ul style="list-style-type: none"> • Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q359-Q364):

NEW QUESTION # 359

When ranking risks, which of the following factors should be considered?

- **A. All of the above.**
- B. The likelihood of a risk occurring.
- C. The cost associated with mitigating a risk.
- D. The potential impact or consequences of a risk.

Answer: A

Explanation:

When ranking risks, it is important to consider multiple factors including the likelihood of a risk occurring, the potential impact or consequences of the risk, and the cost associated with mitigating the risk. Considering all these factors together helps prioritize the risks and allocate appropriate resources for risk management.

NEW QUESTION # 360

Which component of network security architecture is designed to separate the internal network from the external network?

- **A. DMZ**
- B. Virtualization
- C. Proxy
- D. Cloud

Answer: A

Explanation:

A DMZ, or demilitarized zone, is a network segment that is used to separate the internal network from the external network. It acts as a buffer zone between the organization's network and the internet, providing an additional layer of security. By placing servers, such as web servers or email servers, in the DMZ, organizations can ensure that external traffic is filtered and scrutinized before reaching the internal network.

NEW QUESTION # 361

Which of the following is true regarding secure web gateways (SWG)?

- A. SWGs can only be deployed on-premises
- B. SWGs are primarily used to secure internal web applications.
- **C. SWGs provide protection against malware and advanced threats**
- D. SWGs are no longer necessary with the advent of cloud-based applications.

Answer: C

Explanation:

Option 1: Correct. Secure web gateways (SWG) provide protection against malware and advanced threats. They act as an intermediary between users and the internet, inspecting web traffic to detect and block malicious content and prevent data loss.

Option 2: Incorrect. While secure web gateways (SWG) can be used to secure internal web applications, their primary function is to provide protection against malware and advanced threats.

Option 3: Incorrect. Secure web gateways (SWG) are still necessary, even with the advent of cloud-based applications. They provide additional security controls and visibility for web traffic, regardless of whether the applications are on-premises or in the cloud.

Option 4: Incorrect. Secure web gateways (SWG) can be deployed both on-premises and in the cloud, depending on the organization's needs and preferences.

NEW QUESTION # 362

Which of the following is a common vulnerability management practice?

- A. Regularly patching software and operating systems.
- B. Encrypting all data at rest in a database.
- C. Installing antivirus software on all company devices.
- D. Restricting network access based on IP addresses.

Answer: A

Explanation:

Regularly patching software and operating systems is a common practice in vulnerability management. Software and operating system vendors release security patches and updates to address known vulnerabilities. By regularly applying these patches, organizations can mitigate the risk of exploitation. Failure to patch systems in a timely manner can leave them vulnerable to attacks that exploit known vulnerabilities.

NEW QUESTION # 363

Why is monitoring security events "as they occur" important in the field of cybersecurity?

- A. It ensures compliance with industry standards and regulations.
- B. It prevents all potential security incidents from occurring.
- C. It helps in assessing the effectiveness of security controls.
- D. It allows for rapid detection and response to security incidents.

Answer: D

Explanation:

Monitoring security events "as they occur" is crucial in cybersecurity because it enables rapid detection and response to security incidents. By continuously monitoring and analyzing security events, organizations can identify and respond to incidents promptly, reducing the impact and minimizing potential damage. This proactive approach helps in minimizing downtime, data breaches, and other security risks.

NEW QUESTION # 364

.....

We would like to benefit our customers from different countries who decide to choose our 100-160 study guide in the long run, so we cooperation with the leading experts in the field to renew and update our 100-160 study materials. We can assure you that you will get the latest version of our 100-160 Training Materials for free from our company in the whole year after payment. Do not miss the opportunity to buy the best 100-160 preparation questions in the international market which will also help you to advance with the times.
