Cisco 200-901 (DevNet Associate) Exam is an essential certification exam for individuals who are looking to validate their skills and knowledge in software development and networking. 200-901 exam covers a wide range of topics, including software development fundamentals, APIs, and networking concepts. Candidates who pass the exam will have demonstrated their ability to understand and apply these concepts in real-world scenarios, which is essential for individuals who are looking to advance their careers in software development, automation, or network engineering.

## What Are the Career Prospects Once Certified?

**Passing the Cisco DEVASC 200-901 exam and getting DevNet Associate certified can, and will, open many doors for one as an IT professional. Some of the jobs that instantly become possible for a DevNet Associate holder are as follows:**

- Development engineer
- Application developer
- DevOps engineer
- Software developer
- Junior automation engineer
- Network engineer

Note that the above listed are not the only positions available. Apart from this, as DevOps is still an industry growing daily in its demand for highly skilled individuals, new opportunities are expected to arise in the future as more and more companies and organizations move towards the cloud.

Cisco 200-901 (DevNet Associate) exam is a critical component of the Cisco Certified DevNet Associate certification track. It is designed to validate the skills and knowledge of IT professionals looking to pursue a career in software development and automation. Passing 200-901 exam demonstrates proficiency in programming concepts, APIs, data models, DevOps practices, and software development methodologies, as well as the ability to use Cisco APIs to automate common network tasks.
