# Newest Valid Test 312-50v13 Testking Spend Your Little Time and Energy to Pass 312-50v13: Certified Ethical Hacker Exam (CEHv13) exam

P.S. Free & New 312-50v13 dumps are available on Google Drive shared by BraindumpStudy: https://drive.google.com/open?id=14auolcqHruHMVYxAL8LlMhyqM_s_jyuB

Considering your various purchasing behaviors, such as practice frequency. Occasion, different digital equivalents, average amount of time on our 312-50v13 practice materials, we made three versions for your reference, and each has its indispensable favor respectively. All 312-50v13 guide exam can cater to each type of exam candidates' preferences. The three kinds are PDF & Software & APP version. Besides, we have always been exacting to our service standards to make your using experience better. We are exclusive in 312-50v13 training prep area, so we professional in practice materials of the test.

Our PDF format is great for those who prefer to print out the questions. ECCouncil 312-50v13 dumps come in a downloadable PDF format that you can print out and prepare at your own pace. The PDF works on all smart devices, which means you can go through ECCouncil 312-50v13 Dumps at your convenience. The ability to print out the 312-50v13 PDF dumps enables users who find it easier and more comfortable than working on a computer.

>> Valid Test 312-50v13 Testking <<

Pass Guaranteed 2026 ECCouncil 312-50v13: Certified Ethical Hacker Exam (CEHv13) –Efficient Valid Test Testking

ECCouncil 312-50v13 certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly. If you are afraid that once you purchase our current version of 312-50v13 Certified examinations questions, then there is new update version, current version will be out, please rest assured that you can download free our latest version one we release new version within one year.

ECCouncil Certified Ethical Hacker Exam (CEHv13) Sample Questions (Q596-Q601):

NEW QUESTION # 596
What would you enter if you wanted to perform a stealth scan using Nmap?

- A. nmap -sU
- B. nmap -sM
- C. nmap -sS
- D. nmap -sT

Answer: C

NEW QUESTION # 597
What is GINA?

- A. Graphical Identification and Authentication DLL
- B. Global Internet National Authority (G-USA)
- C. Gateway Interface Network Application
- D. GUI Installed Network Application CLASS

Answer: A

NEW QUESTION # 598
As a cybersecurity consultant for SafePath Corp, you have been tasked with implementing a system for secure email communication. The key requirement is to ensure both confidentiality and non-repudiation. While considering various encryption methods, you are inclined towards using a combination of symmetric and asymmetric cryptography. However, you are unsure which cryptographic technique would best serve the purpose. Which of the following options would you choose to meet these requirements?

- A. Use symmetric encryption with the AES algorithm.
- B. Apply asymmetric encryption with RSA and use the private key for signing.
- C. Use the Diffie-Hellman protocol for key exchange and encryption.
- D. Apply asymmetric encryption with RSA and use the public key for encryption.

Answer: B

Explanation:
To ensure both confidentiality and non-repudiation for secure email communication, you need to use a combination of symmetric and asymmetric cryptography. Symmetric encryption is a method of encrypting and decrypting data using the same secret key, which is faster and more efficient than asymmetric encryption.
Asymmetric encryption is a method of encrypting and decrypting data using a pair of keys: a public key and a private key, which are mathematically related but not identical. Asymmetric encryption can provide authentication, integrity, and non-repudiation, as well as key distribution.
The cryptographic technique that would best serve the purpose is to apply asymmetric encryption with RSA and use the private key for signing. RSA is a widely used algorithm for asymmetric encryption, which is based on the difficulty of factoring large numbers. RSA can be used to encrypt data, as well as to generate digital signatures, which are a way of proving the identity and authenticity of the sender and the integrity of the message.
The steps to implement this technique are as follows1:
* Generate a pair of keys for each user: a public key and a private key. The public key can be shared with anyone, while the private key must be kept secret and protected by the user.
* When a user wants to send an email to another user, they first encrypt the email content with a symmetric key, such as AES, which is a strong and efficient algorithm for symmetric encryption. The symmetric key is then encrypted with the recipient's public key, using RSA. The encrypted email and the encrypted symmetric key are then sent to the recipient.
* The sender also generates a digital signature for the email, using their private key and a hash function, such as SHA-256, which is a secure and widely used algorithm for generating hashes. A hash function is a mathematical function that takes any input and produces a fixed-length output, called a hash or a digest, that uniquely represents the input. A digital signature is a hash of the email that is encrypted with the sender's private key, using RSA. The digital signature is then attached to the email and sent to the recipient.
* When the recipient receives the email, they first decrypt the symmetric key with their private key, using RSA. They then use the symmetric key to decrypt the email content, using AES. They also verify the digital signature by decrypting it with the sender's public key, using RSA, and comparing the resulting hash with the hash of the email, using the same hash function. If the hashes match, it means that the email is authentic and has not been tampered with.
Using this technique, the email communication is secure because:
* The confidentiality of the email content is ensured by the symmetric encryption with AES, which is hard to break without knowing the symmetric key.
* The symmetric key is also protected by the asymmetric encryption with RSA, which is hard to break without knowing the recipient's private key.
* The non-repudiation of the email is ensured by the digital signature with RSA, which is hard to forge without knowing the sender's private key.
* The digital signature also provides authentication and integrity of the email, as it proves that the email was sent by the sender and has not been altered in transit.

NEW QUESTION # 599
A network admin contacts you. He is concerned that ARP spoofing or poisoning might occur on his network.
What are some things he can do to prevent it? Select the best answers.

- A. Use port security on his switches.
- B. If you have a small network, use static ARP entries.
- C. Use a firewall between all LAN segments.
- D. Use a tool like ARPwatch to monitor for strange ARP activity.
- E. Use only static IP addresses on all PC's.

Answer: A,B,D

Explanation:
ARP (Address Resolution Protocol) spoofing/poisoning is a common attack in which an attacker sends falsified ARP messages to associate their MAC address with the IP address of another host. To defend against ARP spoofing:
A). Port Security: Limits the number of MAC addresses per port; prevents MAC flooding and spoofing.
B). ARPwatch: Monitors ARP traffic and alerts on unusual changes.
D). Static ARP Entries: Prevent ARP responses from overwriting MAC-IP mappings, effective in small networks.
From CEH v13 Official Courseware:
Module 8: Sniffing
Module 11: Session Hijacking
Module 20: Network Security
Incorrect Options:
C: Firewalls operate at Layer 3+; ARP is a Layer 2 protocol, so firewalls don't prevent ARP spoofing.
E: Static IP addresses do not prevent ARP poisoning.

NEW QUESTION # 600
You discover an unpatched Android permission-handling vulnerability on a device with fully updated antivirus software. What is the most effective exploitation approach that avoids antivirus detection?

- A. Use Metasploit to deploy a known payload
- B. Use SMS phishing to trick the user
- C. Develop a custom exploit using obfuscation techniques
- D. Install a rootkit to manipulate the device

Answer: C

Explanation:
The CEH Mobile Platform Security module explains that mobile antivirus solutions rely heavily on signatures and known exploit patterns. A custom exploit with obfuscation is far more likely to bypass detection.
CEH explicitly teaches that:
* Zero-day or unpatched vulnerabilities
* Custom, obfuscated payloads
* Minimal use of known frameworks
are the most effective for bypassing endpoint defenses during controlled testing.
Option A is correct.
Options B and C are easily detected.
Option D is social engineering, not a technical exploit.

NEW QUESTION # 601
......

Many candidates do not have actual combat experience, for the qualification examination is the first time to attend, so about how to get the test ECCouncil certification didn't own a set of methods, and cost a lot of time to do something that has no value. With our 312-50v13 exam Practice, you will feel much relax for the advantages of high-efficiency and accurate positioning on the content and formats according to the candidates' interests and hobbies. Numerous grateful feedbacks form our loyal customers proved that we are the most popular vendor in this field to offer our 312-50v13 Preparation questions.

312-50v13 PDF Questions: https://www.braindumpstudy.com/312-50v13_braindumps.html

ECCouncil Valid Test 312-50v13 Testking The money will be refund to your account and no extra questions will be asked, when you feel helpless to be productive during the process of preparing different exams (such as 312-50v13 exam), Additionally, in the event that the curriculum of ECCouncil 312-50v13 PDF Questions changes, we provide free upgrades for up to three months, ECCouncil Valid Test 312-50v13 Testking Once there is latest version released, we will send it your email immediately.

And you can just see the data how many customers are visiting our 312-50v13 study materials everyday, Secondly software version does not limit to the number of installed computers, and it simulates the real 312-50v13 Actual Test guide, but it can only run on Windows operating system.

BraindumpStudy 312-50v13 Exam Practice Test Questions Available In Three User-Friendly Formats

The money will be refund to your account and no extra questions will be asked, when you feel helpless to be productive during the process of preparing different exams (such as 312-50v13 exam);

Additionally, in the event that the curriculum of ECCouncil changes, 312-50v13 we provide free upgrades for up to three months, Once there is latest version released, we will send it your email immediately.

Our 312-50v13 exam guide is of high quality and if you use our product the possibility for you to pass the exam is very high.
