Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q48-Q53):

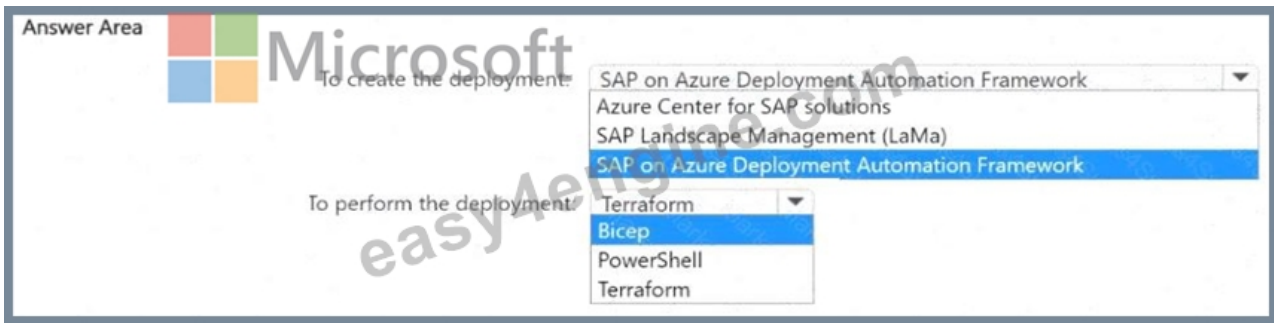

NEW QUESTION # 48

You plan to deploy a highly available SAP development landscape in Azure.

You need to automate the deployment. The solution must meet the following requirements:

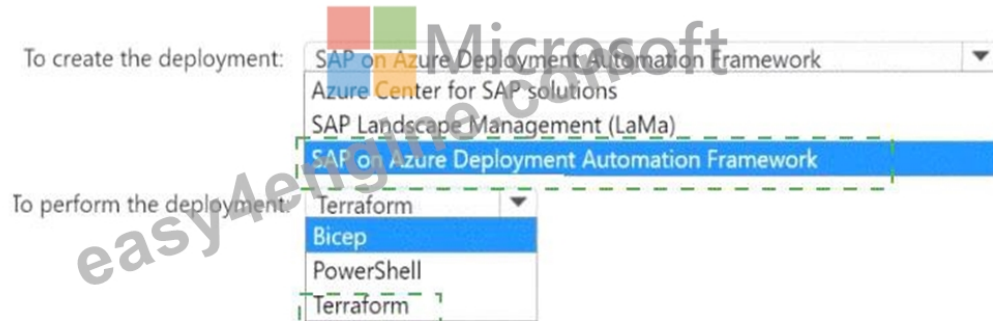

- * Ensure that SAP services can be managed by using the Azure portal.
- * Create a reproduceable deployment.
- * Minimize administrative effort.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 49

You have an Azure subscription named Sub1 that contains a Microsoft Sentinel workspace named Workspaces. You have an SAP RISE managed workload that is integrated with Sub1.

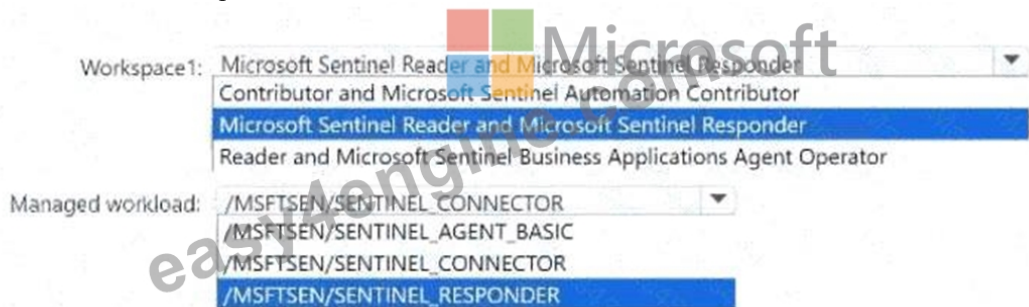

You plan to deploy the Microsoft Sentinel solution for SAP applications and use automated attack disruption in Microsoft Defender XDR.

You need to ensure that the SAP connector can access Workspace1 and the managed workload. The solution must follow the principle of least privilege.

Which roles should you assign to the managed workload and the connector for Workspace1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
