Microsoft持ってきた製品があなたにふさわしくないと感じることはよくありますか? Microsoftラーニングガイドを使用することに決めた場合、問題に遭遇することは決してないことをお伝えしたいと思います。私たちの教材は、あなたが期待できないPL-600高品質を持っています。学習教材のガイダンスで経験を積むと、以前よりもPL-600時間を費やさず、明らかにMicrosoft Power Platform Solution Architect進歩を感じることができます。また、Microsoftテストクイズは進歩に役立つことがわかります。

Microsoft Power Platform Solution Architect 認定 PL-600 試験問題 (Q30-Q35):

質問 # 30

You need to recommend a solution to collect the information required to meet reporting requirements. What should you recommend?

- A. Business process modeler
- B. Business rule
- C. Business process flow
- D. Business event

正解: C

解説:

Business rule can create business recommendations based on business intelligence.

Scenario: Analytics and reporting

The solution must:

- * Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
- * Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
- * Provide a printed quality certificate to be included with each machine.

Topic 4, VanArsde1, Ltd

Background

VanArsde1, Ltd. builds custom homes. The company has one Azure tenant and uses multiple systems to manage the sales, construction, and warranties of the homes.

The company has three departments: sales, construction, and warranty. Sales, contract, and warranty information is not shared among the departments.

The owner of VanArsde1, Ltd. requires a consolidated system that the company can use to track each home's progress.

Sales

- * Company employees use Microsoft Outlook for all communications.
- * Company employees use Microsoft Word to create sales contracts.
- * Employees in the sales department are frequently in different locations and work different hours from each other.
- * Employees in the sales department use a Contracts team in Microsoft Teams to collaborate.
- * The company uses a third-party marketing tool to update contacts every day.

Current environment

- * Contacts' names must be formatted before they are imported from the third-party marketing tool.
- * The company must retain contracts for five years.
- * The company requires that the sales department display the All Contracts view in Microsoft Teams.
- * All contract information must be stored in the All Contracts view.
- * Contracts must not be lost if a device is lost or stolen.

Issue

- * Employees in the sales department store contracts on their local computers.
- * The construction team receives a copy of a contract only when the sale of a home is complete.

Construction

Current environment

- * Employees in the construction department use Project Online to manage schedules.
- * Employees in the construction department use Microsoft Excel to manage the costs of projects
- * The main supplier of construction materials provides an API to the company. The company uses the API to manage supplies for projects in near real time.

Requirements

- * Employees in the construction department must be able to demonstrate how their work is performed rather than document their process.
- * The company requires that project schedules be created less than a week after a contract is signed.
- * A field must sum up the costs of the materials.

Issues

- * Employees in the construction department are unable to schedule resources because they are not informed of future projects.
- * Employees in the construction department currently enter basic project information manually for each software application.

Warranty

Current environment

- * Employees in the warranty department use Excel to track project issues and resolutions.
- * The company requires that employees in the warranty department meet with each other in person to discuss their job roles.

Requirements

- * The company requires that warranty claims be resolved in less than a month.
- * The company requires that all claims be entered in the system along with their related issues.
- * If a claim is found to be invalid, the company requires that the claim and its related issues be deleted.

Issue

- * Employees in the warranty department report that they are frequently sent to homes without knowledge of what is in scope for the project.

General

Requirements

- * The new system must use the development and production environments

- * The development environment must be the master of all changes.
- * All table changes must be added to a solution. Changes to the solution must not be allowed to be made in the production environment.
- * Each department must have a custom app. Employees must be able to access only their department's app.
- * All sales, contract, and warranty data must be shared among the departments.
- * The project manager must be solely responsible for creating and owning the deployment plan for projects.
- * All projects must run by using the Agile methodology.
- * The deployment plan must include the environment setup, training plan, rollout strategy, and deployment support.

Issue

The IT manager reports that the deployment plan is not complete.

質問 # 31

You are designing the data model for a school. The school wants to track students' enrollments in courses.

The system must meet the following requirements:

Track the courses in which each student is enrolled.

Track the students that are enrolled in each course.

Track dates when each student enrolled in each course and the person who approved the enrollment.

Allow users to create a report that details which students are enrolled in which courses.

You need to recommend a data model that will fit the school's requirements.

Which logical model should you recommend?

□

- A. Option D
- B. Option B
- C. Option C
- **D. Option A**

正解: D

解説:

Need a relationship table.

N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

When viewing rows of either table in a N:N relationship you can see a list of any rows of the other table that are related to it.

質問 # 32

You are designing the security model for a Power Platform solution.

The security model must meet the following requirements:

Restrict sharing of data between Power Automate connectors.

Ensure that environment administrators only see users who require access in the enabled user list.

You need to recommend security features for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

質問 # 33

You need to resolve the issue reported during testing.

What should you do?

- A. Create a Quick View form for the inspection order.

- B. Create an image data type within the Inspection Order table.
- C. Create a relationship within the Inspection Order table to the originating inspection order.

正解: C

解説:

Need to store the image in the table.

Scenario: The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

質問 # 34

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems.

The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- * Lookup values are not populated when data migration is complete.
- * Data is being added to the contacts table that is not part of the data migration.
- * Various users do not appear in the list of users available for record assignment.

You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
