IAPP Certified Information Privacy Professional/Europe (CIPP/E) Sample Questions (Q211-Q216):

NEW QUESTION # 211

Article 29 Working Party has emphasized that the GDPR forbids "forum shopping", which occurs when companies do what?

- A. Designate their main establishment in member state with the most flexible practices.
- B. File appeals of infringement judgments with more than one EU institution simultaneously.
- C. Choose the data protection officer that is most sympathetic to their business concerns.
- D. Select third-party processors on the basis of cost rather than quality of privacy protection.

Answer: A

NEW QUESTION # 212

Which mechanism, new to the GDPR, now allows for the possibility of personal data transfers to third countries under Article 42?

- A. Binding corporate rules.
- **B. Approved certifications.**
- C. Law enforcement requests.
- D. Standard contractual clauses.

Answer: B

Explanation:

According to Article 42 of the GDPR, the Commission may approve certification mechanisms, seals and marks for the purpose of demonstrating the existence of appropriate safeguards for personal data transfers to third countries or international organisations. These certification mechanisms, seals and marks are voluntary and transparent, and are issued by accredited certification bodies or by the competent supervisory authorities.

They are subject to the general provisions on certification in Articles 42 and 43 of the GDPR. They are intended to enhance the trust of data subjects and facilitate the free flow of personal data within the Union and beyond. They are also subject to periodic review and withdrawal or suspension if the conditions for certification are not or are no longer met. References:

* Article 42 of the GDPR

* European Data Protection Law & Practice textbook, Chapter 8: Transfers of Personal Data to Third Countries, Section 8.3: Appropriate Safeguards, Subsection 8.3.4: Certification Mechanisms, Seals and Marks

* Guidelines 1/2018 on certification and identifying certification criteria in accordance with Articles 42 and 43 of the Regulation

NEW QUESTION # 213

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores.

Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a question, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's question. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of home and have the character's abilities remain intact.

Why is this company obligated to comply with the GDPR?

- A. The company employs staff in the EU.
- B. The company has offices in the EU.
- C. The company's data center is located in a country outside the EU.
- **D. The company's products are marketed directly to EU customers.**

Answer: D

Explanation:

Verified answer: D. The company's products are marketed directly to EU customers.

According to section 6(1) of the GDPR, personal data shall be processed by organisations, which offer goods or services or otherwise carry out activities, in relation to which processing of personal data may be regarded as relevant for their legitimate interests. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their

behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes. The legitimate interests referred to are those arising from the performance of a task carried out in their name or on their behalf, or for their own purposes.

NEW QUESTION # 214

According to the GDPR, how is pseudonymous personal data defined?

- A. Data that has been encrypted or is subject to other technical safeguards.
- B. Data that has been rendered anonymous in such a manner that the data subject is no longer identifiable.
- C. Data that can no longer be attributed to a specific data subject without the use of additional information kept separately.
- D. Data that can no longer be attributed to a specific data subject, with no possibility of re-identifying the data.

Answer: C

Explanation:

NEW QUESTION # 215

SCENARIO

Please use the following to answer the next question:

WonderkKids provides an online booking service for childcare. Wonderkids is based in France, but hosts its website through a company in Switzerland. As part of their service, WonderKids will pass all personal data provided to them to the childcare provider booked through their system. The type of personal data collected on the website includes the name of the person booking the childcare, address and contact details, as well as information about the children to be cared for including name, age, gender and health information. The privacy statement on Wonderkids' website states the following:

"WonderkKids provides the information you disclose to us through this website to your childcare provider for scheduling and health and safety reasons. We may also use your and your child's personal information for our own legitimate business purposes and we employ a third-party website hosting company located in Switzerland to store the data. Any data stored on equipment located in Switzerland meets the European Commission provisions for guaranteeing adequate safeguards for you and your child's personal information.

We will only share you and your child's personal information with businesses that we see as adding real value to you. By providing us with any personal data, you consent to its transfer to affiliated businesses and to send you promotional offers."

"We may retain you and your child's personal information for no more than 28 days, at which point the data will be depersonalized, unless your personal information is being used for a legitimate business purpose beyond 28 days where it may be retained for up to 2 years."

"We are processing you and your child's personal information with your consent. If you choose not to provide certain information to us, you may not be able to use our services. You have the right to: request access to you and your child's personal information; rectify or erase you or your child's personal information; the right to correction or erasure of you and/or your child's personal information; object to any processing of you and your child's personal information. You also have the right to complain to the supervisory authority about our data processing activities." What must the contract between WonderKids and the hosting service provider contain?

- A. Controller-to-controller model contract clauses.
- B. The requirement to implement technical and organizational measures to protect the data.
- C. Audit rights for the data subjects.
- D. A non-disclosure agreement.

Answer: B

Explanation:

The GDPR (General Data Protection Regulation) applies to any organisation that processes personal data of EU residents, regardless of where the processing takes place. Therefore, WonderKids, as a data controller based in France, must comply with the GDPR when it transfers personal data to its hosting service provider in Switzerland, which acts as a data processor on behalf of WonderKids.

According to Article 28 of the GDPR, data controllers must only use data processors that provide sufficient guarantees to implement

appropriate technical and organisational measures to ensure the protection of the rights of the data subjects and the security of the data. The data controller and the data processor must also enter into a written contract or other legal act that sets out the subject matter, duration, nature, and purpose of the processing, as well as the obligations and rights of the data controller.

The contract must include, among other things, the following provisions:

- * The data processor must process the personal data only on documented instructions from the data controller, including with regard to transfers of personal data to a third country or an international organisation, unless required to do so by EU or member state law;
- * The data processor must ensure that persons authorised to process the personal data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality;
- * The data processor must take all measures required pursuant to Article 32 of the GDPR, which relates to the security of the processing;
- * The data processor must respect the conditions for engaging another processor, and inform the data controller of any intended changes concerning the addition or replacement of other processors, giving the data controller the opportunity to object to such changes;
- * The data processor must assist the data controller in ensuring compliance with the obligations pursuant to Articles 32 to 36 of the GDPR, which relate to the security of the processing, the notification of personal data breaches, the communication of personal data breaches to data subjects, the data protection impact assessment, and the prior consultation with the supervisory authority;
- * The data processor must, at the choice of the data controller, delete or return all the personal data to the data controller after the end of the provision of services relating to the processing, and delete existing copies unless EU or member state law requires storage of the personal data;
- * The data processor must make available to the data controller all information necessary to demonstrate compliance with the obligations laid down in Article 28 of the GDPR and allow for and contribute to audits, including inspections, conducted by the data controller or another auditor mandated by the data controller.

Therefore, among the four options, the one that must be included in the contract between WonderKids and the hosting service provider is the requirement to implement technical and organisational measures to protect the data, as this is part of the data processor's obligations under Article 28 and Article 32 of the GDPR.

The other options are not mandatory under the GDPR, although they may be advisable or desirable depending on the circumstances. Controller-to-controller model contract clauses are used when personal data is transferred from one data controller to another data controller, not from a data controller to a data processor.

Audit rights for the data subjects are not explicitly required by the GDPR, although the data controller must ensure that the data processor allows for and contributes to audits conducted by the data controller or another auditor mandated by the data controller. A non-disclosure agreement may be useful to protect the confidentiality of the personal data, but it is not sufficient to ensure the compliance with the GDPR, as it does not cover all the aspects of the data processing relationship.
