For candidates who are looking for 200-901 exam braindumps, they pay much attention to the quality. With experienced experts to compile and verify, 200-901 exam materials are high quality, and you can pass your exam and get the corresponding certification successfully. In addition, we recommend you to try free demo for 200-901 Exam Dumps before purchasing, so that you can know what the complete version is like. We have online and offline service. If you have any questions for 200-901 exam materials, you can consult us, and we will give you reply as quickly as we can.

Cisco 200-901 Exam: Details and Features

The Cisco 200-901 test lasts for 2 hours and can be taken either in English or Japanese. You will receive access to scheduling your exam after paying the enrollment fee of $300. The exact number of questions in this certification test and their formats are unknown before the date of the real exam. Cisco also doesn't reveal the passing scores for its tests as they are subject to change without notice.

Since very little is known about the 200-901 exam pattern, it is crucially important that you prepare for it thoroughly and cover all the topics beforehand. The best way to fulfill that task is to enroll for the official course "Developing Applications and Automating Workflows using Cisco Platforms (DEVASC)" available on the certification webpage.

Once you obtain your certificate, it will be valid for 3 years. After this period, you must recertify to maintain your status. You can do that by taking the latest release of your certification exam, completing various education activities offered by Cisco, or a combination of both.

Prerequisites of DevNet Associate Exam v1.0 (200-901) Exam

Prerequisites are the pre-conditions which are required before taking the DevNet Associate Exam v1.0 (200-901) Exam.

- Cisco Certified Network Associate certification
- CCNA Routing and Switching

100% Pass Cisco - Perfect 200-901 Formal Test

We need fresh things to enrich our life. No one would like to be choked by dull routines. So if you are tired of your job or life, you are advised to try our 200-901 study guide to refresh yourself. It is a wrong idea that learning is useless and dull. We can make promise that you will harvest enough knowledge and happiness from our 200-901 Test Engine. Different from traditional learning methods, our products adopt the latest technology to improve your learning experience. We hope that all candidates can try our free demo before deciding buying our 200-901 practice test. In a word, our study guide is attractive to clients in the market.

Cisco DevNet Associate Exam Sample Questions (Q91-Q96):

NEW QUESTION # 91
What is the purpose of the Cisco VIRL software tool?

- A. To simulate and model networks
- B. To automate API workflows
- C. To test performance of an application
- D. To verify configurations against compliance standards

Answer: A

Explanation:
Reference:
Cisco VIRL (Virtual Internet Routing Lab) is a powerful network simulation platform designed to simulate and model networks. It allows users to create and test network topologies, run simulations, and visualize network behavior in a controlled virtual environment. This tool is particularly valuable for network engineers and administrators to test configurations, troubleshoot issues, and validate network designs without the need for physical hardware.

NEW QUESTION # 92
A developer is reviewing a code that was written by a colleague. It runs fine, but there are many lines of code to do a seemingly simple task repeatedly. Which action organizes the code?

- A. Using functions, rewrite any pieces of code that are repeated
- B. Modify the code to use loops
- C. Reverse engineer and rewrite the code logic
- D. Refactor the code by removing any unnecessary tests

Answer: A

Explanation:
When a developer encounters many lines of code doing repetitive tasks, refactoring the code to use functions is a standard practice. This reduces code duplication and enhances readability and maintainability. Functions encapsulate repetitive logic, making the code cleaner and more organized.

NEW QUESTION # 94

Which API must an engineer use to change a netmask on a Cisco IOS XE device?

- A. RESTCONF/YANG
- B. SD-WAN
- C. DNAC
- D. Meraki

Answer: A

NEW QUESTION # 95

Which two protocols are associated with the control plane on a network device? (Choose two.)

- A. BGP
- B. UDP
- C. FTP
- D. SNMP
- E. OSPF

Answer: A,E

Explanation:
The control plane in a network device is responsible for routing and signaling. Protocols such as BGP (Border Gateway Protocol) and OSPF (Open Shortest Path First) are integral to the control plane.
* BGP (Border Gateway Protocol): BGP is used for exchanging routing information between autonomous systems on the internet, making it a crucial control plane protocol.
* OSPF (Open Shortest Path First): OSPF is an interior gateway protocol used for routing within an autonomous system, also part of the control plane.
References:
* BGP and OSPF Protocol Details: BGP, OSPF

NEW QUESTION # 96

......

Are you still satisfied with your present job? Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no，you are a right place now. Because our 200-901 exam torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our 200-901 Guide questions, you will pass the 200-901 exam and achieve your target.
