2026 Updated Unlimited EMEA-Advanced-Support Exam Practice | 100% Free EMEA-Advanced-Support Exam Voucher

Based on high-quality products, our EMEA-Advanced-Support guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. EMEA-Advanced-Support study tool is updated online by our experienced experts, and then sent to the user. So you don't need to pay extra attention on the updating of study materials. The data of our EMEA-Advanced-Support exam torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. If you fail the exam with EMEA-Advanced-Support Guide Torrent, we promise to give you a full refund in the shortest possible time. Of course, if you are not reconciled and want to re-challenge yourself again, we will give you certain discount.

Fortinet EMEA Advanced Support Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which FortiGate command displays the current routing table?

- A. get system route
- B. diagnose netlink route list
- C. get router info routing-table all

- D. show router status

Answer: C

Explanation:
The 'get router info routing-table all' command displays the FortiGate's current routing table, including all active routes and their details. Options B, C, and D are not valid or specific for this purpose. Exact extract:
"Use 'get router info routing-table all' to display the complete routing table, showing destination, gateway, interface, and metric for all routes."

NEW QUESTION # 27
Which of the following are classful addresses? (Select all that apply below)

- A. 172.16.0.0/16
- B. 10.225.30.0/8
- C. 172.16.0.0/24
- D. 10.225.30.0/16

Answer: A,B

Explanation:
Classful addressing follows the original IP address classes: Class A (/8), Class B (/16), and Class C (/24).
Option A (10.225.30.0/8) is a Class A address, and C (172.16.0.0/16) is a Class B address. Option B (10.225.30.0/16) and D (172.16.0.0/24) use non-standard masks for their respective ranges, making them classless (CIDR). The original document incorrectly lists only A. Fortinet routing supports both classful and classless addressing. Exact extract: "Classful addressing uses fixed subnet masks: Class A (/8), Class B (/16), and Class C (/24)... Addresses like 10.0.0.0/8 and 172.16.0.0/16 are classful, while non-standard masks indicate classless addressing."

NEW QUESTION # 28
What is the role of the FortiGate 'set srcintf' command in a firewall policy?

- A. Specifies the source interface for traffic matching
- B. Defines the destination interface for traffic
- C. Sets the source IP address range
- D. Configures the source NAT interface

Answer: A

Explanation:
The 'set srcintf' command in a FortiGate firewall policy specifies the source interface from which traffic originates, helping define the policy's scope. It does not set the destination interface (B), source IP range (C), or NAT interface (D). Exact extract: "The 'set srcintf' command in a firewall policy specifies the source interface for incoming traffic, allowing FortiGate to match packets based on their entry interface."

NEW QUESTION # 29
In a FortiGate high availability (HA) cluster, what happens if the primary unit fails?

- A. A secondary unit takes over as the primary unit
- B. The cluster is disabled, and traffic stops
- C. Traffic is rerouted through an external gateway
- D. The cluster switches to active-passive mode

Answer: A

Explanation:
In a FortiGate HA cluster (active-active or active-passive), if the primary unit fails, a secondary unit automatically takes over as the primary, ensuring continuity of traffic with minimal disruption. Option A is incorrect as traffic continues, C is incorrect as the mode doesn't change post-failure, and D is unrelated. Exact extract: "In a FortiGate HA cluster, if the primary unit fails, a secondary unit is

elected as the new primary, taking over all roles to maintain traffic flow and session continuity."

NEW QUESTION # 30

What is the default FortiGate behavior when a packet matches no firewall policy?

- A. The packet is dropped
- B. The packet is forwarded to the default gateway
- C. The packet is sent to the IPS engine
- D. The packet is logged and allowed

Answer: A

Explanation:
FortiGate operates on a default-deny principle; if a packet does not match any firewall policy, it is dropped to ensure security. No forwarding (A), IPS processing (C), or automatic allowing (D) occurs without a matching policy. Exact extract: "FortiGate uses a default-deny approach; packets that do not match any configured firewall policy are dropped to prevent unauthorized traffic."

NEW QUESTION # 31

......

All these three SurePassExams EMEA-Advanced-Support exam questions formats contain valid, updated, and real Fortinet EMEA Advanced Support Exam exam questions. The Fortinet EMEA-Advanced-Support exam questions offered by the SurePassExams will assist you in EMEA-Advanced-Support Exam Preparation and boost your confidence to pass the final Fortinet EMEA-Advanced-Support exam easily.
