Formats of Dumpleader Updated Snowflake COF-C03 Exam Practice Questions

Someone around you must be using our COF-C03 exam questions. The users of our COF-C03 exam materials are really very extensive. Or, you can consult someone who has participated in the COF-C03 exam. They must know or use our products. We can confidently say that our products are leading in the products of the same industry. The richness and authority of COF-C03 Exam Materials are officially certified.

Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q142-Q147):

NEW QUESTION # 142

Which features could be used to improve the performance of queries that return a small subset of rows from a large table? (Select TWO).

- A. Multi-cluster virtual warehouses
- **B. Search optimization service**
- C. Secure views
- **D. Automatic clustering**
- E. Row access policies

Answer: B,D

NEW QUESTION # 143

What information does the Query Profile provide?

- A. Detailed Information about the database schema
- B. Real-time monitoring of the database operations
- C. Statistics for each component of the processing plan
- D. Graphical representation of the data model

Answer: C

NEW QUESTION # 144

What is cached during a query on a virtual warehouse?

- A. Any columns accessed during the query
- B. All rows accessed during the query
- C. The columns in the result set of the query
- D. All columns in a micro-partition

Answer: C

Explanation:

During a query on a virtual warehouse, the columns in the result set of the query are cached. This allows for faster retrieval of data if the same or a similar query is run again, as the system can retrieve the data from the cache rather than reprocessing the entire query.

NEW QUESTION # 145

In which hierarchy is tag inheritance possible?

- A. Organization - Account - Role
- B. Schema - Table - Column
- C. Database - View - Column
- D. Account - User - Schema

Answer: B

Explanation:

In Snowflake, tag inheritance is a feature that allows tags, which are key-value pairs assigned to objects for the purpose of data governance and metadata management, to be inherited within a hierarchy. The hierarchy in which tag inheritance is possible is from Schema to Table to Column. This means that a tag applied to a schema can be inherited by the tables within that schema, and a tag applied to a table can be inherited by the columns within that table. NEW QUESTION # 146

Which Snowflake role can manage any object grant globally, including modifying and revoking grants?

- A. SYSADMIN
- B. USERADMIN
- C. ORGADMIN
- D. SECURITYADMIN

Answer: D

Explanation:

The SECURITYADMIN role in Snowflake can manage any object grant globally, including modifying and revoking grants. This role has the necessary privileges to oversee and control access to all securable objects within the Snowflake environment.
