Everyone is desired to have the certification. Because The TDA-C01 Certification can bring a lot of benefits for people, including money, a better job and social status and so on.

Tableau Certified Data Analyst Sample Questions (Q91-Q96):

NEW QUESTION # 91

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points. Which Layout option should you use?

- A. Arrows only
- **B. Numbers**
- C. Caption boxes
- D. Dots

Answer: B

Explanation:

To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you indicate the progress and order of your story points more clearly than the other options. References:

NEW QUESTION # 92

You have a Tableau workbook that contain three worksheets named Sheet1 Sheet2 and Sheet3.

You create several filters.

From the Data Source page you plan to add data source fillers

When type of filter will appear in the Edit Data Source Filters dialog box?

- **A. A dimension filter on all the sheets**
- B. A table calculation filter used on Sheet
- C. A top N condition filter on a dimension in Sheet 1 and Sheet2
- D. A context filter on a dimension in Sheet3

Answer: A

Explanation:

A data source filter is a filter that applies to all the worksheets that use the same data source. It filters the data before any other filters or calculations are applied. You can add a data source filter from the Data Source page by clicking on the Add button next to Filters.

The type of filter that will appear in the Edit Data Source Filters dialog box is a dimension filter on all the sheets. This means that you can choose a dimension from your data source and filter it by values, range, condition, or top/bottom. The filter will affect all the worksheets that use that dimension.

The other types of filters are not data source filters and will not appear in the Edit Data Source Filters dialog box. A table calculation filter is a filter that applies to a table calculation, such as percent of total or running total. A top N condition filter is a filter that shows only the top or bottom N values of a measure or dimension based on a condition. A context filter is a filter that creates a subset of

data that other filters can use.

NEW QUESTION # 93

You have a Tableau workbook.

You want to make the workbook available in Tableau Online.

What should you do?

- A. From the File menu, select Export Packaged Workbook.
- B. From the Server menu, select Publish Data Source.
- C. From the Server menu, select Publish Workbook.
- D. From the Server menu, select Tableau Public, and then select Save to Tableau Public.

Answer: C

Explanation:

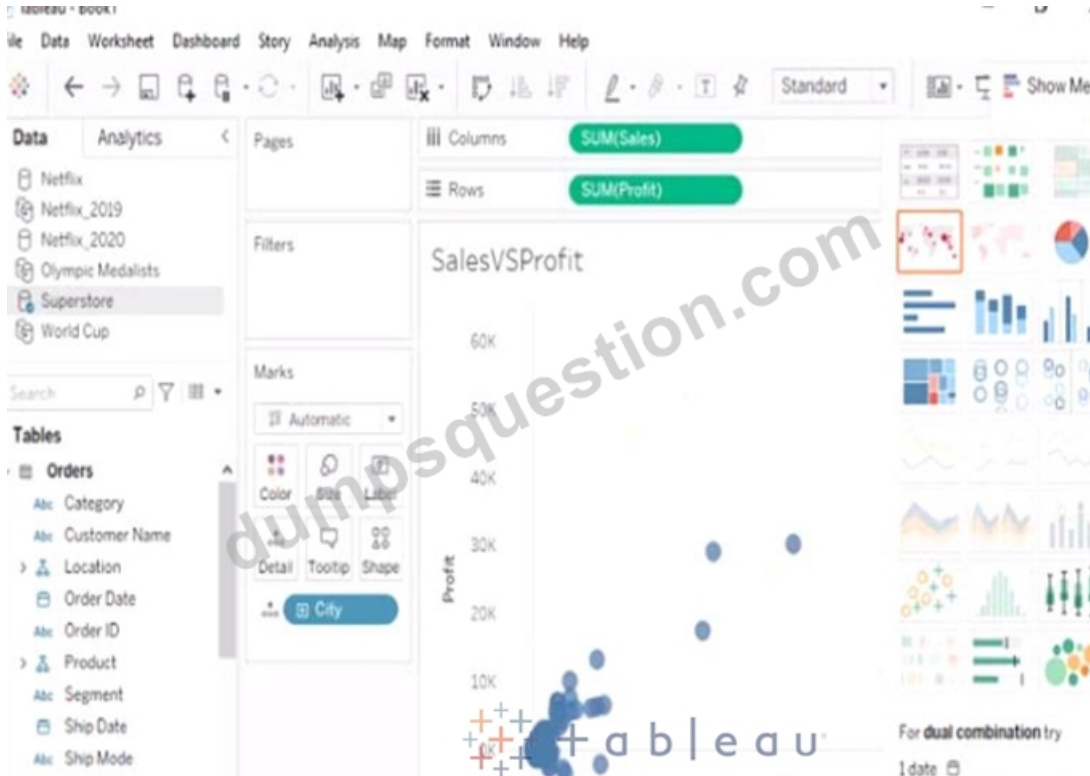

To make a workbook available in Tableau Online, you need to publish it from Tableau Desktop to Tableau Online. You can do this by selecting Publish Workbook from the Server menu, signing in to your Tableau Online account, choosing a project and a name for your workbook, and clicking Publish. This will upload your workbook and its data sources to Tableau Online, where you can view, edit, and share it with others. References:

NEW QUESTION # 94

Open the link to Book1 found on the desktop. Open SalesVSPProfit worksheet.

Add a distribution band on Profit to show the standard deviation from- 1 to 1.

Answer:

Explanation:

Send us your feedback on it

NEW QUESTION # 95

You have the following:

Category	Sub-Category	Sales	Overall Rank	Rank
Furniture	Bookcases	114,880	7	3
	Chairs	328,446	2	1
	Furnishings	91,705	8	4
	Tables	206,966	3	2
Technology	Accessories	167,380	5	3
	Copiers	149,528	6	4
	Machines	189,239	4	2
	Phones	330,007	1	1

Overall Rank and Rank are calculated fields that use the RANK function.

You filter out the sub-category where [Overall Rank] - 1.

For which three the sub-categories will the value of Rank change? Choose three.

- A. Furnishings
- **B. Tables**
- C. Chairs
- D. Bookcases
- **E. Accessories**
- F. Copiers
- **G. Machines**
- **G Phones**

Answer: B,E,G

Explanation:

In Tableau, the RANK function assigns a rank to each row within a partition of the data, based on the value of the field being ranked. It is important to understand that the rank is recalculated whenever the underlying data or the partitioning changes.

In the given scenario, the Overall Rank is based on the Sales figures, while the Rank (presumably) is based on the Sales within the Category. When filtering on the condition where [Overall Rank] - 1, it means we are excluding the sub-category that has an Overall Rank of 2.

Looking at the data:

* Furnishings has an Overall Rank of 8, which does not meet the filter condition ([Overall Rank] - 1).

Therefore, its rank remains the same.

* Tables have an Overall Rank of 3. When the sub-category with an Overall Rank of 2 is removed (Chairs in this case), Tables move up in the overall ranking. However, since Tables are the top-ranked within the Furniture category, their Rank within the category would remain unchanged at 1.

* Chairs have an Overall Rank of 2, which meets the filter condition and thus will be removed from the view. We cannot determine the change in Rank for Chairs because they are filtered out.

* Accessories have an Overall Rank of 5. If any sub-category with a higher Overall Rank (1 to 4) is removed, the rank of Accessories within the Technology category could change because it is currently ranked 3 in its category. With the removal of Phones (Overall Rank 1), the Rank of Accessories could potentially increase.

* Copiers have an Overall Rank of 6, which does not meet the filter condition. Therefore, its rank remains the same.

* Machines have an Overall Rank of 4. If we remove Phones (Overall Rank 1), Machines will move up in the overall ranking and potentially within the Technology category as well, changing its Rank from 2 to 1.

* Phones have an Overall Rank of 1, which does not meet the filter condition of being Overall Rank 2.

Therefore, its rank remains the same.

* Bookcases have an Overall Rank of 7, which does not meet the filter condition. Therefore, its rank remains the same.

Based on this analysis, when the sub-category with an Overall Rank of 2 (Chairs) is removed, the Rank value will change for Tables, Accessories, and Machines, as they will move up in the overall ranking within their respective categories. However, it's important to note that while Tables will move up in the overall ranking, their rank within the Furniture category would not change as they are already at the top. The rank changes for Accessories and Machines are due to the removal of Phones, which is ranked higher overall and within the Technology category.

NEW QUESTION # 96

.....

The customizable Tableau TDA-C01 practice tests create a scenario of a real-based Tableau which is helpful for students so they don't feel much pressure when they are giving the final examination. The students can give unlimited TDA-C01 practice tests and make themselves better day by day to achieve their desired destination. The candidates can even access their previously given

Tableau TDA-C01 Practice Test from the history which allows them to be careful while giving the test next time and prepare for Tableau TDA-C01 certification in a better way.
