Adobe Real-Time CDP Business Practitioner Professional Sample Questions (Q40-Q45):

NEW QUESTION # 40

A data engineer is tasked with creating a streaming segment, and the segment definition must include existing audiences and a page

view web event. After selecting the evaluation method, an error occurs, allowing only batch evaluation to be used. What are two possible reasons for this? (Choose two.)

- A. The segment definition includes a combination of an audience, a page view event (any time), and a profile attribute.
- B. The segment definition includes a combination of an audience in multiple page view events (last 24hrs).
- C. The segment definition includes a combination of an audience and a page view event (last 24hrs).
- D. The segment definition includes a combination of an audience and multiple page view events (last 30 days).

Answer: A,D

NEW QUESTION # 41

An Adobe Real-Time CDP (RTCDP) customer has 5 million profiles and a 300kb average profile richness license. Their current usage stands at 4 million profiles across multiple identities and 100kb profile richness. The marketing team in the organization is tasked to provide new prospect use cases to be delivered using RTCDP to increase customer acquisition. What key question should the data team ask the marketers to stay within license compliance?

- A. Number of attributes along with cardinality and the overlap with existing set of attributes in data model
- B. Number of customer segments that overlap with existing customer audiences
- C. Number of unique prospects, average number of events per prospects, and look back period
- D. Number of identifiers and their respective types such as people identifier or cross-domain

Answer: C

NEW QUESTION # 42

What are use cases for Attribute-Based Access Control (ABAC) in Adobe RT-CDP? (Select two.)

- A. Granting access to specific datasets based on data attributes like region or type.
- B. Automating batch workflows for segment creation.
- C. Restricting static segmentation capabilities.
- D. Limiting access to sensitive data fields based on user roles.

Answer: A,D

NEW QUESTION # 43

An architect is tasked with onboarding e-commerce data into Adobe Experience Platform (AEP).

An ERD of the data is shown below.

□ What are the three correct mappings of source entities into AEP classes? (Choose three.)

- A. Create Order Line Items as Experience Event
- B. Create Orders as Experience Event
- C. Create Product and Order Line Items as custom classes
- D. Create Product as a Custom Class
- E. Embed Order Line Items as an object array in orders

Answer: B,D,E

NEW QUESTION # 44

When sending data through the HTTP API source connector, how would a data engineer troubleshoot to make sure the payload being sent is formatted properly in real time?

- A. Use query services to validate payloads before sending them via API
- B. Use asynchronous validation query parameter to validate payload matches schema
- C. All data is ingested and query services reporting identify any records that do not pass custom validation rules
