

RedHat EX380 Valid Exam Testking - EX380 Exam Quick Prep

If you also want to work your way up the ladder, EX380 test guide will be the best and most suitable choice for you. If you are still hesitating whether you need to take the EX380 exam or not, you will lag behind other people. If you do not want to fall behind the competitors in the same field, you are bound to start to pay high attention to the EX380 Exam, and it is very important for you to begin to preparing for the EX380 exam right now. Just come and buy our EX380 exam questions as the pass rate is more than 98%!

Our EX380 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our EX380 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. After you click on the link and log in, you can start learning using our EX380 test material. You can download our EX380 test questions at any time.

2026 High Pass-Rate 100% Free EX380 – 100% Free Valid Exam Testking | EX380 Exam Quick Prep

The Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) study material of ITdumpsfree is available in three different and easy-to-access formats. The first one is printable and portable Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) PDF format. With the PDF version, you can access the collection of actual Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) questions with your smart devices like smartphones, tablets, and laptops. You can even print the study material and save it in your smart devices to study anywhere and pass the Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) certification exam.

RedHat Red Hat Certified Specialist in OpenShift Automation and Integration Sample Questions (Q22-Q27):

NEW QUESTION # 22

Create and use a service account token via kubeconfig

Task Information : Create SA ci-bot in ci namespace and generate a kubeconfig that authenticates using its token.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Create namespace and service account
- * `oc new-project ci`
- * `oc -n ci create sa ci-bot`
- * The SA will represent automation access.
- * Grant permissions (example: edit in namespace)
- * `oc -n ci policy add-role-to-user edit system:serviceaccount:ci:ci-bot`
- * Without permissions, token auth succeeds but API actions are denied.
- * Generate token (TokenRequest)
- * `TOKEN=$(oc -n ci create token ci-bot)`
- * OCP issues a short-lived token by default (good practice).
- * Create kubeconfig using the token
- * `oc config set-cluster lab --server="$(oc whoami --show-server)" \`
- * `--insecure-skip-tls-verify=true --kubeconfig=ci-bot.kubeconfig`
- * `oc config set-credentials ci-bot --token="$TOKEN" --kubeconfig=ci-bot.kubeconfig`
- * `oc config set-context ci --cluster=lab --user=ci-bot --namespace=ci \`
- * `--kubeconfig=ci-bot.kubeconfig`
- * `oc config use-context ci --kubeconfig=ci-bot.kubeconfig`
- * This produces a self-contained kubeconfig for CI automation.
- * Test access
- * `oc --kubeconfig=ci-bot.kubeconfig get pods`

NEW QUESTION # 23

Integrate OpenShift with LDAP (create LDAP identity provider)

Task Information : Configure cluster OAuth to add an LDAP identity provider using an existing bind secret and CA ConfigMap , then verify login works.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Verify prerequisites exist (Secret + ConfigMap)
- * `oc -n openshift-config get secret rhds-ldap-secret`
- * `oc -n openshift-config get configmap rhds-ca-config-map`
- * OAuth LDAP configuration references these objects. If they don't exist, OAuth won't be able to bind to LDAP securely.
- * Edit the cluster OAuth resource
- * `oc edit oauth cluster`
- * The oauth/cluster resource is where identity providers are defined.
- * Add an LDAP identity provider entry (example structure) Add under `spec.identityProviders`:
- * `- name: corp-ldap`
- * `mappingMethod: claim`
- * `type: LDAP`
- * `ldap:`
- * `url: "ldaps://ldap.example.com:636/ou=People,dc=example,dc=com?uid"`
- * `bindDN: "uid=openshift,ou=svc,dc=example,dc=com"`
- * `bindPassword:`
- * `name: rhds-ldap-secret`
- * `ca:`
- * `name: rhds-ca-config-map`
- * `insecure: false`
- * `attributes:`

- * id: ["dn"]
- * name: ["cn"]
- * preferredUsername: ["uid"]
- * email: ["mail"]
- * url: where to search for users and which attribute is used for login (here uid).
- * bindDN + bindPassword: service account used for LDAP queries.
- * ca: trusts the LDAP server CA for TLS.
- * attributes: maps LDAP data into OpenShift user identity fields.
- * Restart OAuth pods to load changes quickly
- * oc -n openshift-authentication delete pod -l app=oauth-openshift
- * This forces pods to restart and re-read the updated configuration.
- * Verify the identity provider appears and users can log in
- * In the web console login page, you should see the new provider (name may show as corp-ldap).
- * After a successful login, confirm user objects appear:
- * oc get users
- * oc get identities
- * OpenShift creates User and Identity objects upon first successful authentication.

NEW QUESTION # 24

Spread replicas using podAntiAffinity

Task Information : Configure payments/api to prefer scheduling pods on different nodes.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Patch deployment with preferred podAntiAffinity
- * oc -n payments patch deploy api --type=merge -p '{
- * "spec":{"template":{"spec":{"affinity":{"
- * "podAntiAffinity":{"
- * "preferredDuringSchedulingIgnoredDuringExecution":[{"
- * "weight":100,
- * "podAffinityTerm":{"
- * "labelSelector":{"matchLabels":{"app":"api"}},
- * "topologyKey":"kubernetes.io/hostname"
- * }
- * }]
- * }
- * }}}
- * }'
- * Encourages spread across nodes to reduce single-node impact.
- * Verify spread
- * oc -n payments get pods -o wide

NEW QUESTION # 25

Schedule a recurring backup

Task Information : Create a daily backup schedule for namespace orders at 01:00.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Create the schedule
- * velero schedule create orders-daily \
- * --schedule "0 1 * * *"
- * --include-namespaces orders \

- * --snapshot-volumes
- * Cron format: minute hour day month weekday.
- * Verify schedule exists
- * velero schedule get
- * Confirm backups are created by the schedule
- * velero backup get | grep orders-daily
- * Scheduled backups usually have names derived from the schedule.

NEW QUESTION # 26

Identity Management - Create CA ConfigMap

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

Step 1: Ensure the certificate file rhds_ca.crt is available in your current working directory or use the correct path.

The Task requires creating a configmap from this CA certificate file.

Step 2: Run the command:

```
oc create configmap rhds-ca-config-map --from-file ca.crt=rhds_ca.crt -n openshift-config
```

Step 3: Confirm the configmap is created.

The lab output shows:

```
configmap/rhds-ca-config-map created
```

Detailed explanation:

This creates a configmap named rhds-ca-config-map in the openshift-config namespace and maps the local file rhds_ca.crt to the key name ca.crt inside the configmap. This is important in external identity integration because OpenShift may need to trust a custom certificate authority when communicating with LDAP or another secured external service. By placing the certificate in a configmap, the authentication operator or related cluster configuration can reference it cleanly. The key name matters because many OpenShift resources expect a CA bundle key with a specific filename-like convention. If the file path is wrong, the command fails immediately. If the configmap name or key mapping is wrong, the authentication provider referencing it may not trust the external endpoint.

NEW QUESTION # 27

.....

Our Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) exam dumps are top-notch and designed to help students pass the Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) test on the first try. ITdumpsfree offers three formats of preparation material for the EX380 exam: RedHat EX380 Pdf Dumps format, desktop-based EX380 practice exam software, and web-based Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) practice test. These EX380 exam dumps formats are designed to suit the needs of different types of students.

EX380 Exam Quick Prep: <https://www.itdumpsfree.com/EX380-exam-passed.html>

ITdumpsfree EX380 Exam Quick Prep Offers 24/7 free customer support for All exams which will ensure that Clients are taken care anytime , You needn't to buy lots of reference books with EX380 pdf practice torrent, you also needn't to spend all day and all night to read or memorize, EX380 learning materials are edited by professional experts, and you can use them at ease, We clearly know that the unqualified EX380 exam guide will have a bad influence on our company's credibility.

Working with Invoices, Sales Receipts, Estimates, Certified EX380 Questions Along with a couple of his teammates, Elo made a strong impression on his CyberPatriot mentor, John Maddock, and Maddock invited all EX380 Exam Quick Prep three to work as interns at Risk Analytics, a security firm based in Overland Park, Kan.

Pass Guaranteed RedHat - EX380 Newest Valid Exam Testking

ITdumpsfree Offers 24/7 free customer support EX380 for All exams which will ensure that Clients are taken care anytime , You needn't to buy lots of reference books with EX380 pdf practice torrent, you also needn't to spend all day and all night to read or memorize.

EX380 learning materials are edited by professional experts, and you can use them at ease, We clearly know that the unqualified EX380 exam guide will have a bad influence on our company's credibility.

Exam EX380 is just a piece of cake if you have prepared for the exam with the help of ITdumpsfree's exceptional study material.
