Trustworthy MD-102 Exam Content, MD-102 Test Discount Voucher

Our MD-102 study braindumps can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned. Our MD-102 prep guide has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit MD-102 Exam Questions. So high quality MD-102 materials can help you to pass your exam effectively, make you feel easy, to achieve your goal.

Microsoft MD-102 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Prepare infrastructure for devices: This topic focuses on adding devices to Microsoft Entra ID and enrolling devices to Microsoft Intune.
Topic 2	<ul style="list-style-type: none">• Manage and maintain devices: This section deals with managing, troubleshooting, and safeguarding various devices. It also covers methods to ensure that they meet organizational policies and security standards.
Topic 3	<ul style="list-style-type: none">• Protect devices: In this topic, aspiring administrators get knowledge about configuration of endpoint security and management of device updates by using Intune.
Topic 4	<ul style="list-style-type: none">• Manage applications: This section covers skills to manage application implementation, manage updates, and manage performance to support the performance of users to meet the needs of business organizations.

Microsoft Endpoint Administrator Sample Questions (Q341-Q346):

NEW QUESTION # 341

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

You purchase the devices shown in the following table.

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

* MDM user scope: Group1

* MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 342

Case Study 3 - Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

Contoso has a Microsoft 365 E5 subscription.

Environment

Network Environment

The network contains an on-premises Active Directory domain named contoso.com. The domain contains the servers shown in the following table.

Contoso has a hybrid Azure Active Directory (Azure AD) tenant named contoso.com.

Contoso has a Microsoft Store for Business instance.

Users and Groups

The contoso.com tenant contains the users shown in the following table.

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group1 and Group2 have a Membership type of Assigned.

Devices

Contoso has the Windows 10 devices shown in the following table.

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder1.

Microsoft Endpoint Manager Configuration

Microsoft Endpoint Manager has the compliance policies shown in the following table.

The Compliance policy settings are shown in the following exhibit.

The Automatic Enrollment settings have the following configurations:

MDM user scope: GroupA

MAM user scope: GroupB

You have an Endpoint protection configuration profile that has the following Controlled folder access settings:

Name: Protection1

Folder protection: Enable

List of apps that have access to protected folders: C:*\AppA.exe

List of additional folders that need to be protected: D:\Folder1

Assignments:

- Included groups: Group2, GroupB

Windows Autopilot Configuration

Contoso has a Windows Autopilot deployment profile configured as shown in the following exhibit.

Currently, there are no devices deployed by using Windows Autopilot.

The Intune connector for Active Directory is installed on Server1.

Requirements

Planned Changes

Contoso plans to implement the following changes:

Purchase a new Windows 10 device named Device6 and enroll the device in Intune.

New computers will be deployed by using Windows Autopilot and will be hybrid Azure AD joined.

Deploy a network boundary configuration profile that will have the following settings:

- Name: Boundary1
- Network boundary: 192.168.1.0/24
- Scope tags: Tag1
- Assignments:
 - - Included groups: Group1, Group2

Deploy two VPN configuration profiles named Connection1 and Connection2 that will have the following settings:

- Name: Connection1
- Connection name: VPN1
- Connection type: L2TP
- Assignments:
 - - Included groups: Group1, Group2, GroupA
 - - Excluded groups: --
- Name: Connection2
- Connection name: VPN2
- Connection type: IKEv2
- Assignments:
 - - Included groups: GroupA
 - - Excluded groups: GroupB

Purchase an app named App1 that is available in Microsoft Store for Business and to assign the app to all the users.

Technical Requirements

Contoso must meet the following technical requirements:

Users in GroupA must be able to deploy new computers.

Administrative effort must be minimized.

You implement Boundary1 based on the planned changes.

Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device3 only
- B. Device2 only
- C. Device1, Device2, and Device5 only
- **D. Device1, Device2, Device3, and Device4 only**

Answer: D

Explanation:

Device5 does not belong to Group1 or to Group2.

Note: Deploy a network boundary configuration profile that will have the following settings:

Name: Boundary1

Network boundary: 192.168.1.0/24

Scope tags: Tag1

Assignments:

Included groups: Group1, Group2

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION # 343

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps.

You need to ensure that App1 is installed before App2 on every device.

What should you configure?

- **A. the App2 deployment configurations**

- B. a dynamic device group
- C. a detection rule
- D. the App1 deployment configurations

Answer: A

Explanation:

The correct answer is D because you can configure the dependencies for a Win32 app in the deployment configurations¹.

Dependencies are other Win32 apps that must be installed before your Win32 app can be installed¹. You can add Win32 app dependencies only after your Win32 app has been added and uploaded to Intune². In this case, you need to configure the App2 deployment configurations to add App1 as a dependency². References: 1: Microsoft Intune Win32 App Dependencies - MSEndpointMgr

<https://msendpointmgr.com/2019/06/03/new-intune-feature-win32-app-dependencies/> 2: Add and assign Win32 apps to Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/apps-win32-add>

NEW QUESTION # 344

Case Study 1 - Litware inc

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model

The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11:00 to

22:00. Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment

The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

□ The development department uses projects in Azure DevOps to build applications. Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor.

Currently, the computers are re-provisioned manually by the IT department.

Problem Statements

Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)

- Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.

- Re-provisioning the sales department computers is too time consuming.

Requirements

Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers.

Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements

Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.

- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.

- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.

- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.

- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.

- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

□

You need to meet the device management requirements for the developers.
What should you implement?

- A. known folder redirection in Microsoft OneDrive
- B. home folders
- **C. Enterprise State Roaming**
- D. folder redirection

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs> Microsoft Edge browser settings, such as favorites and reading list.

NEW QUESTION # 345

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

☐ AH devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

Policy type: App protection policy Minimum number of policies: 1 Comprehensive Explanation of Correct Answer Only: The correct answer is app protection policy because it allows you to customize the settings of apps for iOS/iPadOS or Android devices1. One of the settings you can configure is Restrict cut, copy, and paste between other apps, which lets you prevent users from copying data from App1 and pasting the data into other apps2. You only need one policy to apply this setting to all devices that have App1 installed1.
