Passing the test certification can prove your outstanding major ability in some area and if you want to pass the Analytics-DA-201 test smoothly you'd better buy our Analytics-DA-201 test guide. And our Analytics-DA-201 exam questions boost the practice test software to test the clients' ability to answer the questions.

### **Salesforce Certified Tableau Data Analyst Sample Questions (Q161-Q166):**

#### **NEW QUESTION # 161**

You use a quick table calculation to calculate the moving average of a measure named Sales.

You need to calculate the moving averages of the last three years.

Which setting should you change in the Table Calculation dialog box? {Click the appropriate Option in the Answer Area}

#### **Answer:**

Explanation:

Explanation:

#### **NEW QUESTION # 162**

You have a data source that contains 20 tables.

You want the tables to be organized within the Data pane based on the type of data contained within the tables.

What should you use?

- A. Folders
- B. Sets
- C. Groups
- D. Hierarchies

#### **Answer: A**

Explanation:

To organize the tables in the Data pane based on the type of data contained within the tables, you should use folders. Folders are a way to manually group fields, parameters, sets, or tables in the Data pane according to your preference. You can create folders by right-clicking on the fields or tables you want to group and selecting Folders > Create Folder. You can also drag and drop fields or tables into existing folders. You can name the folders according to the type of data they contain, such as sales, customer, product, etc. Folders can help you find and access the fields or tables you need more easily and efficiently. ### NEW QUESTION # 163

A Data Analyst needs to calculate the first Tuesday of each month in the data.  
Which set of functions should the analyst use to perform this calculation?

- A. DATEDIFF, DATEPART
- **B. DATETRUNC, DATEPART**
- C. DATETRUNC, DATEADD
- D. DATEADD, DATENAME

**Answer: B**

### NEW QUESTION # 164

You have a dataset that contains people and the awards they have won.  
 Which formula should you use to get the number of different types of awards that have been won?

- A. MAX ({Award})
- **B. COUNTD({Award})**
- C. COUNTD ({NAME})
- D. INDEX()
- E. COVAR({Award})

**Answer: B**

Explanation:

To get the number of different types of awards that have been won, you should use the formula COUNTD ({Award}). This formula will return the count of distinct values in the Award field, which are the different types of awards that have been won.

The other options are not correct for this scenario. COVAR({Award}) is not a valid function in Tableau. MAX ({Award}) will return the maximum value in the Award field, which may not be a type of award. INDEX() will return the index or rank of each row in a partition, which is not related to the types of awards. References:

[https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_aggregate.htm#COUNTD](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_aggregate.htm#COUNTD) [https://help.tableau.com/current/pro/desktop/en-us/functions\\_functions\\_tablecalculation.htm#INDEX](https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#INDEX) The COUNTD function in Tableau calculates the number of distinct (unique) items in a field. When looking to get the number of different types of awards that have been won, the COUNTD([Award]) function will count each unique award name only once, regardless of how many times it appears in the dataset. This will return the total number of unique award types.

### NEW QUESTION # 165

You have the following chart that shows the cumulative of sales from various dates.  
 You want the months to appear as shown in the following chart.  
 What should you do?

- A. Convert the date to Attribute
- B. Select Show Missing Values for the date
- **C. Convert the date to Continuous**
- D. Convert the date to Exact Date

**Answer: C**

Explanation:

References: <https://help.tableau.com/current/pro/desktop/en-us/dates.htm> [https://help.tableau.com/current/pro/desktop/en-us/dates\\_continuous.htm](https://help.tableau.com/current/pro/desktop/en-us/dates_continuous.htm) <https://help.tableau.com/current/pro/desktop/en-us/formatting.htm> To ensure the dates are shown in a continuous axis, you should convert the date to a continuous field. This will display the months in a sequence without any breaks, which is needed for showing a trend over time like the cumulative sum of sales.

## NEW QUESTION # 166

If you are going to buy Analytics-DA-201 training materials online, the security of the website is important. We have technicians to examine the website every day, if you chose us, we provide you with a clean and safe online shopping environment.
