New ZDTA Visual Cert Test Pass Certify | High-quality ZDTA Updated Testkings: Zscaler Digital Transformation Administrator

The biggest advantage of our ZDTA study question to stand the test of time and the market is that our sincere and warm service. To

help examinee to pass ZDTA exam, we are establishing a perfect product and service system between us. We can supply right and satisfactory ZDTA exam questions you will enjoy the corresponding product and service. We can't say we are the absolutely 100% good, but we are doing our best to service every customer. Only in this way can we keep our customers and be long-term cooperative partners. Looking forward to your ZDTA Test Guide use try!

Zscaler Digital Transformation Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31

Within ZPA, the mapping relationship between Connector Groups and Server Groups can best be defined as which of the following?

- A. Connector Groups are configured for Dynamic Server Discovery so that ZPA can steer traffic through the appropriate Server Group.
- B. Connector Groups are configured for Dynamic Server Discovery so that mapped Server Groups can DNS resolve and advertise the applications.
- C. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can DNS resolve and make health checks toward the application.
- D. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can then DNS resolve individual application Segment Groups.

Answer: C

Explanation:

Server Groups in ZPA use Dynamic Server Discovery to supply Connector Groups with the application endpoints' DNS names or IPs. The Connector Groups then resolve those addresses and perform health checks to ensure the applications are reachable before steering user traffic.

NEW QUESTION # 32

How do Access Policies relate to the Application Segments and Application Segment Groups?

- A. When a condition is met, an Access Policy can either allow or block access to Application Segments OR Application Segment Groups.
- B. When a condition is met, an Access Policy can allow access to Application Segments and block access to Application Segment Groups.
- C. When a condition is met, an Access Policy can allow access to Application Segments Groups and block access to Application Segment.
- D. When a condition is met, an Access Policy can either allow or block access to Application Segments and Application Segment Groups.

Answer: D

Explanation:

Access Policies apply the same allow-or-block decision to both individual Application Segments and to Application Segment Groups when their rule conditions are met.

NEW QUESTION # 33

Which of the following secures all IP unicast traffic?

- A. Tunnel with local proxy
- B. Enforce PAC
- C. Z-Tunnel 2.0
- D. Secure Shell (SSH)

Answer: C

Explanation:

Z-Tunnel 2.0 is the technology designed to secure all IP unicast traffic. It establishes encrypted tunnels between clients and Zscaler cloud edges, providing secure, transparent forwarding of all IP-based traffic, beyond just HTTP/S, ensuring comprehensive protection of network communications.

NEW QUESTION # 34

Can Notifications, based on Alert Rules, be sent with methods other than email?

- A. In addition to email, text messages can be sent directly to one cell phone to alert the CISO who is then coordinating the work on the incident.
- B. In addition to email, notifications, based on Alert Rules, can be shared with leading ITSM or UCaaS tools over Webhooks.
- C. Leading ITSM systems can be connected to the Zero Trust Exchange using a NSS server, which will then connect to ITSM tools and forwards the alert.
- D. Email is the only method for notifications as that is universally applicable and no other way of sending them makes sense.

Answer: A

Explanation:

Beyond email, Alert Rule notifications can be pushed via Webhooks to integrate with ITSM platforms or UCaaS tools, enabling real-time incident management and collaboration in your existing service desks or messaging systems.

NEW QUESTION # 35

Which of the following scenarios would generate a "Patient 0" alert?

- A. Zscaler's AI/ML based Smart Browser Isolation was triggered due to a user accessing a newly- registered domain.
- B. A new malicious file was detected by the sandbox due to an "quarantine" First-Time Action in the sandbox policy.
- C. Zscaler detected a HIPAA violation with in-band Data Protection scanning.
- D. A new malicious file was detected by the sandbox due to an "allow and scan" First-Time Action in the sandbox policy.

Answer: D

Explanation:

A "Patient 0" alert fires when the first instance of a previously unknown file slips through (under an "Allow and Scan" first-time action) and is later classified as malicious by the sandbox, identifying that initial download as the zero-day event.

NEW QUESTION # 36

.....

It is important to cover Zscaler Digital Transformation Administrator (ZDTA) exam topics and check if you need to practice them. If you are talking about the Zscaler ZDTA certification exam, you need to practice and overcome mistakes. If you do not practice for it, chances are that you might get confused while appearing for the ZDTA Exam. When you get the test study material, it comes with the Zscaler ZDTA practice exams (desktop & web-based) to solve.
