

# 100% Pass-Rate Exam C\_S4CPB\_2602 Demo Provide Prefect Assistance in C\_S4CPB\_2602 Preparation

Are you still upset about how to pass SAP certification C\_S4CPB\_2602 exam? Are you still waiting for the latest information about SAP certification C\_S4CPB\_2602 exam? TrainingQuiz has come up with the latest training material about SAP certification C\_S4CPB\_2602 exam. Do you want to pass SAP certification C\_S4CPB\_2602 exam easily? Please add TrainingQuiz's SAP certification C\_S4CPB\_2602 exam practice questions and answers to your cart now! TrainingQuiz has provided part of SAP Certification C\_S4CPB\_2602 Exam practice questions and answers for you on [www.TrainingQuiz.com](http://www.TrainingQuiz.com) and you can free download as a try. I believe you will be very satisfied with our products. With our products you can easily pass the exam. We promise that if you have used TrainingQuiz's latest SAP certification C\_S4CPB\_2602 exam practice questions and answers exam but fail to pass the exam, TrainingQuiz will give you a full refund.

If you don't have enough time to study for your SAP C\_S4CPB\_2602 exam, TrainingQuiz provides SAP C\_S4CPB\_2602 Pdf questions. You may quickly download SAP C\_S4CPB\_2602 exam questions in PDF format on your smartphone, tablet, or desktop. You can Print SAP C\_S4CPB\_2602 PDF Questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go.

>> Exam C\_S4CPB\_2602 Demo <<

## Pass Guaranteed SAP - Trustable Exam C\_S4CPB\_2602 Demo

TrainingQuiz guarantees its customers that they will pass the C\_S4CPB\_2602 exam on their first attempt. TrainingQuiz guarantees that you will receive a refund if you fail the SAP C\_S4CPB\_2602 Exam. For assistance with SAP C\_S4CPB\_2602 exam preparation and practice, TrainingQuiz offers its users three formats.

## SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) Sample Questions (Q12-Q17):

### NEW QUESTION # 12

#### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task

Create a new business role (not from a template) with the information below.

## Answer:

Explanation:

See Explanation below for all solution

Explanation:

Task 8: Create a New Business Role (Not from a Template)

Objective

The purpose of this task is to create a new custom business role for all employees in the organization. This role is intended to become the base role that will later be connected to the required business catalogs, launchpad space, and page so that employees can easily access the relevant apps.

This task explicitly says:

create a new business role

not from a template

use the exact values provided in the task

Business Scenario Explanation

You are building a role for all employees in the organization.

Unlike the earlier project-manager role, this one is not derived from a standard SAP template.

The purpose of this role is to provide a shared employee-level launchpad structure.

Later, the role will be used to:

assign business catalogs,

create a launchpad space,

create a launchpad page,

place apps on the page for employee self-service access.

In this step, the focus is only on creating the new business role with the correct identification and access category settings.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the values exactly as shown.

Do not create this role from a template.

The access categories must be set exactly as required:

Unrestricted for all categories

Save the role at the end.

Required Values

Use the following values exactly as shown in the task screenshot

□ Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to create, maintain, copy, derive, and restrict business roles.

Since this task requires creating a brand new custom role, this is the correct place to start.

Step 2: Start creating a new business role

Inside Maintain Business Roles:

Click New

Explanation:

This task explicitly says to create a role not from a template.

So you must use New, not:

Create From Template

Create Derived Business Role

Copy

Using New creates a completely customer-defined business role.

Step 3: Enter the business role ID

In the new business role creation screen:

In Business Role ID, enter:

Z\_EMPLOYEES\_ALL\_#####

Example

For suffix 000013:

Z\_EMPLOYEES\_ALL\_000013

Explanation:

This is the technical identifier of the new business role.  
It must match the task exactly for validation to succeed.

Step 4: Enter the business role description

In Business Role Description, enter:

All Employee Role #####

Example

For suffix 000013:

All Employee Role 000013

Explanation:

This is the readable description shown in SAP and should exactly match the exercise requirement.

Step 5: Set access categories

In the Access Categories section, set all categories to:

Write, Read, Value Help = Unrestricted

Read, Value Help = Unrestricted

Value Help = Unrestricted

Explanation:

The task explicitly says:

Access Categories: Unrestricted for all categories

So all three category dropdowns must be left or set to Unrestricted.

This means:

the role is not restricted by country, company code, or other field-level limitation in this step, this role is intended to be broadly reusable for all employees.

Step 6: Review the role before saving

Before saving, verify:

Business Role ID is correct

Business Role Description is correct

all 3 access category values are Unrestricted

Explanation:

This avoids common mistakes such as:

wrong suffix,

extra spaces,

restricted instead of unrestricted values,

creating from template accidentally.

Step 7: Save the role

Click:

Save

Explanation:

This finalizes the new business role.

Without saving, the role remains only in draft and is not actually created.

Step 8: Verify the role after save

After saving, confirm that the role is displayed with:

Business Role ID = Z\_EMPLOYEES\_ALL\_#####

Business Role Description = All Employee Role #####

Write Access / Read Access / Value Help Access = Unrestricted

Explanation:

This is the confirmation that the role was created successfully and matches the task requirement.

Expected Result

After the task is completed successfully:

a new custom business role exists,

it was created not from a template,

the role ID and description match the required values,

all access categories are Unrestricted,

the role is saved and available for the next steps.

## NEW QUESTION # 13

SIMULATION

Migrate Bank Data

Business Scenario

You are responsible for migrating bank data into the SAP S/4HANA Cloud Public Edition system. You have determined the best

method is Migrate Data Using Staging Tables, as you only have a couple banks to migrate.

Prerequisites:

Note:

In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task. Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Check the documentation for the Bank migration object and assign the additional business role required to ensure you can migrate bank data into the system.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to check the Bank migration object documentation and assign the additional business role needed so you can successfully migrate bank data into SAP S/4HANA Cloud Public Edition.

The additional business role required is:

Business Role Template: SAP\_BR\_MD\_SPECIALIST\_BNK

Business Role Description: Master Data Specialist - Bank Data

SAP documents that the app Manage Banks - Master Data is assigned to the business role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK) in business catalog Bank - Maintenance (SAP\_CA\_BC\_BNK\_PC). That is the role needed for bank master data maintenance and is the missing authorization when the migration cockpit can load data but cannot create banks in the target system.

Business Scenario Explanation

In the previous migration steps, you already assigned the role:

Configuration Expert - Data Migration

BR\_CONFIG\_EXPERT\_DATA\_MIG

That role gives access to the migration cockpit itself, meaning you can:

create migration projects,

select migration objects,

upload CSV files,

validate data,

transfer data to staging tables,

and execute migration runs.

However, for the Bank migration object, SAP also requires the authorization to create bank master data in the target system. If that authorization is missing, the migration can still reach the execution stage, but then fail with an authorization message such as:

You are not authorized to create bank data for country/region US

That is why the additional role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK) must be assigned.

Important Notes

Always replace ##### with the last 6 digits of your group number in later migration steps.

The role to add here is in addition to the migration cockpit role.

Save the user after assigning the role.

Refresh the session after assignment so the new authorization is loaded.

Required Additional Role

Step 1: Review the migration object documentation

Open the Bank migration object in the migration project and review the documentation or role requirement note.

Explanation:

The task explicitly asks you to check the documentation for the Bank migration object and assign the additional role required for migration. SAP's official documentation for bank maintenance shows that bank master maintenance is tied to the role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK).

Step 2: Open the app "Maintain Business Users"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Users

Open the app.

Explanation:

This app is used to assign business roles to your user.

Step 3: Search for your own user

In Maintain Business Users:

Enter your own user ID in the search field.

Click Go.

Explanation:

You must assign the additional role to your own user because you are the one executing the migration.

Step 4: Open your user record

From the search results:

Click your user entry.

Open the business user detail page.

Explanation:

This opens the maintenance screen where assigned business roles can be changed.

Step 5: Switch to Edit mode

On the user detail page:

Click Edit

Explanation:

Edit mode is required before the assigned business roles list can be updated.

Step 6: Open the "Assigned Business Roles" tab

Inside the business user record:

Click:

Assigned Business Roles

Explanation:

This is where you assign the additional bank master data role.

Step 7: Click Add

In the assigned business roles section:

Click Add

This opens the popup:

Add Business Roles

Explanation:

This popup is used to search for standard SAP business roles.

Step 8: Search for the additional bank role

In the Add Business Roles popup, search for either:

SAP\_BR\_MD\_SPECIALIST\_BNK

or

Master Data Specialist - Bank Data

Then select the matching role.

Explanation:

SAP documents that the app Manage Banks - Master Data belongs to the role Master Data Specialist - Bank Data (SAP\_BR\_MD\_SPECIALIST\_BNK). That is the role needed for bank creation/maintenance authorization.

Step 9: Add the role

After selecting the role:

Click OK or Apply

Explanation:

This adds the role to your user in draft mode.

Step 10: Save the business user

Back on the business user page:

Click Save

Explanation:

This finalizes the new role assignment.

Step 11: Confirm both migration-related roles are assigned

After saving, verify that your user now has both:

BR\_CONFIG\_EXPERT\_DATA\_MIG

SAP\_BR\_MD\_SPECIALIST\_BNK

Explanation:

These two roles cover different parts of the scenario:

BR\_CONFIG\_EXPERT\_DATA\_MIG → migration cockpit access

SAP\_BR\_MD\_SPECIALIST\_BNK → bank master data creation/maintenance authorization

Step 12: Refresh your session

After saving:

Refresh the browser completely, or

Sign out and sign in again

Explanation:

SAP role assignments may not become active in the current session immediately. A refresh or new login ensures the authorization is reloaded.

Step 13: Return to the migration project

Go back to:

Migrate Your Data

open your project:

Bank Data #####

open migration object:

Bank

Explanation:

Now that the additional bank role is assigned, the system should allow you to migrate bank master data successfully.

Expected Result

After this task is completed successfully:

your user still has the migration role BR\_CONFIG\_EXPERT\_DATA\_MIG,

your user also has the additional bank role SAP\_BR\_MD\_SPECIALIST\_BNK,

the authorization error for creating bank data should no longer occur,

the Bank migration can proceed successfully.

Screenshots for This Task

Screenshot 1: Assigned Business Roles list including the migration role Use the screenshot from your run where the business user already shows:

Configuration Expert - Data Migration

This screenshot can be used to explain the starting point before the additional role is assigned.

What this screenshot proves

It shows that the migration role alone was not enough for the bank creation authorization.

Screenshot 2: Migration error message

Use the screenshot from your run that shows the message:

You are not authorized to create bank data for country/region US

This is the key evidence that an additional bank master data role was required.

What this screenshot proves

It proves the migration cockpit role was present, but bank maintenance authorization was still missing.

Official SAP Documentation Basis

SAP's official documentation states that the Manage Banks - Master Data app is assigned to:

Master Data Specialist - Bank Data

SAP\_BR\_MD\_SPECIALIST\_BNK

within catalog:

Bank - Maintenance

SAP\_CA\_BC\_BNK\_PC

This is the basis for the additional role assignment required in this task.

## NEW QUESTION # 14

### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the Launchpad Space to your custom business role. Edit the Launchpad Page to add the applications listed below as tiles (standard "preferred" square tile) with the Section Title: Self-Services.

Manage My Timesheet

Concur Travel Expense

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to complete the launchpad setup for the custom all-employee role by:  
assigning the custom Launchpad Space to the business role,  
editing the Launchpad Page,  
creating a section titled Self-Services,  
adding the required applications as standard preferred square tiles:

Manage My Timesheet

Concur Travel Expense

Business Scenario Explanation

In the earlier tasks, you created:

a custom all-employee business role,

the required business catalog assignments,

a custom launchpad space and page.

This task completes that setup by adding the actual application tiles that end users will see on the launchpad.

The goal is to make it easy for employees to find the relevant self-service applications without searching manually.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact values listed in the task.

The section title must be exactly:

Self-Services

The two tiles must be:

Manage My Timesheet

Concur Travel Expense

Save after editing the page.

Prerequisites

Before doing this task, the following should already exist:

custom business role:

Z\_EMPLOYEES\_ALL\_#####

assigned business catalogs:

SAP\_HCM\_BC\_EMP\_PC

SAP\_CON\_BC\_CTE\_ESS\_PC

custom launchpad space and page created for the role

page title and description:

General

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This is the app where the custom all-employee role is maintained. The launchpad space assignment and page navigation are controlled from here.

Step 2: Open the custom all-employee business role

In Maintain Business Roles:

Search for your custom business role:

Z\_EMPLOYEES\_ALL\_#####

Open the role.

Example

If your suffix is 000013, the role is:

Z\_EMPLOYEES\_ALL\_000013

Explanation:

You must work in the custom all-employee role because the launchpad space and page belong to this role.

Step 3: Open the Launchpad Spaces tab

Inside the role:

Click:

Launchpad Spaces

Explanation:

This tab shows which launchpad space is assigned to the role.

Step 4: Verify the Launchpad Space is assigned

Check that the assigned space exists.

In your execution, the assigned space followed this pattern:

Z\_ALL\_EMP\_#####

Explanation:

The task says to assign the launchpad space to the custom business role.

If the space already appears in the assigned list, then this part is already complete.

If the space is not listed:

Click Add

Create or assign the required custom space

Save the role

Step 5: Open the assigned Launchpad Space

In the assigned launchpad spaces list:

Click the arrow > at the far right of the space row.

Explanation:

This opens Space Details, where the page linked to the space can be accessed.

Step 6: Open the Pages tab

In Space Details:

Click:

Pages

Explanation:

A space can contain one or more pages.

This task requires you to edit the page content.

Step 7: Open the Launchpad Page

In the Pages list:

Open the page row by clicking the arrow > at the far right.

In your run, the page followed this pattern:

Z\_ALL\_EMP\_#####

Explanation:

This opens Page Details, where the page content can be edited.

Step 8: Open Page Content

Inside Page Details:

Click the tab:

Page Content

Explanation:

This is the area where sections and application tiles are maintained.

Step 9: Click Edit

On the Page Content screen:

Click Edit

Explanation:

The page must be in edit mode before you can create sections or add app tiles.

Step 10: Enter the section title

In the section title field, enter exactly:

Self-Services

Explanation:

This creates the section in which the required employee self-service app tiles will be placed.

The title must match the task exactly.

Step 11: Add the tile "Concur Travel Expense"

On the right side of the page content screen, in the list of apps derived from the assigned catalogs:

Find:

Concur Travel Expense

Click:

Add

Explanation:

This adds the Concur employee self-service app tile into the Self-Services section.

Step 12: Add the tile "Manage My Timesheet"

Still on the right side app list:

Find:

Manage My Timesheet

Click:

Add

Explanation:

This adds the timesheet app tile into the same Self-Services section.

Step 13: Verify both tiles are visible in the section

After adding both apps, confirm that the page content now shows:

Concur Travel Expense

Manage My Timesheet

under the section:

Self-Services

Explanation:

This confirms the tiles were placed correctly on the page.

Step 14: Save the page

Click:

Save

Explanation:

This finalizes the page changes.

If you do not save, the tiles and section will not be retained.

Step 15: Verify the role is assigned to your business user

To verify the page and tiles from the home screen, make sure the custom all-employee role is assigned to your own business user.

Open:

Maintain Business Users

Then:

Open your own user

Open Assigned Business Roles

Confirm the role is assigned:

Z\_EMPLOYEES\_ALL\_#####

Save if needed

Explanation:

Without role assignment, the launchpad space and page may not appear on the homepage for your user.

Step 16: Refresh the homepage

Go back to Home.

Then:

Refresh the browser or reload the session

Open the page/tab:

General

Explanation:

This ensures the launchpad updates and shows the newly added content.

Step 17: Verify the result on the homepage

On the General page, verify that you can see:

section title:

Self-Services

tile:

Concur Travel Expense

tile:

Manage My Timesheet

Explanation:

This is the final proof that the task was completed successfully.

Expected Result

After this task is completed successfully:

the custom launchpad space is assigned to the business role,

the page contains a section named Self-Services,

the page shows the tiles:

Concur Travel Expense

Manage My Timesheet

the tiles are visible on the launchpad homepage under the General page.

## NEW QUESTION # 15

### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Create a Launchpad Space and Page with the information below.

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General

Page Description: General

Objective

The purpose of this task is to create a custom launchpad space and page for the all-employee business role so employees can easily find the apps granted through the assigned business catalogs.

This task belongs to the all-employee role created in the previous tasks, for example:

Business Role ID: Z\_EMPLOYEES\_ALL\_#####

The page values shown in the task are:

Page Title: General

Page Description: General

Business Scenario Explanation

In SAP S/4HANA Cloud, business catalogs grant the app authorizations, but users still need a clean launchpad structure so they can actually find those apps easily.

That is why this task requires creating:

a Launchpad Space

a Launchpad Page

for the all-employee role.

The space acts like a container in the launchpad navigation, and the page acts like the content area where app tiles will later be displayed.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact text values shown in the task.

The task image explicitly shows:

Page Title = General

Page Description = General

Save each object after creation.

Required Values

From the task image, use:

Parameter

Value

Page Title

General

Page Description

General

Additional execution values used in your run

During your actual execution, the custom launchpad space/page used this pattern:

Space ID: Z\_ALL\_EMP\_#####

Space Description: General

Space Title: General

Page ID: Z\_ALL\_EMP\_#####

Page Title: General

Page Description: General

□

## NEW QUESTION # 16

### SIMULATION

Create a Custom Launchpad Space and Page

Business Scenario

You are building a custom business role that will be assigned to all employees in the organization. The business role and its corresponding Launchpad Space and Page need to include the apps that have been granted through the business catalogs assigned to the business role to ensure employees have an easy time finding the relevant applications.

Note: In the task below, always replace ##### with the last 6 digits of your group number.

Note:

Make sure to use the EXACT names/values/spaces as they are listed in the task.

Even forgetting a space or a number will cause the validation of the task to fail and be marked as incorrect.

Task:

Assign the business catalogs listed below to the business role and save:

HCM - Employee Self-Service (SAP\_HCM\_BC\_EMP\_PC)

Concur - Employee Self-Service (SAP\_CON\_BC\_CTE\_ESS\_PC)

### Answer:

Explanation:

See Explanation below for all solution

Explanation:

Objective

The purpose of this task is to assign the required business catalogs to the custom all-employee business role created in the previous task. These catalogs provide the applications that will later be shown in the launchpad space and page for all employees.

The catalogs that must be assigned are:

HCM - Employee Self Service

SAP\_HCM\_BC\_EMP\_PC

Concur - Employee Self-Service

SAP\_CON\_BC\_CTE\_ESS\_PC

Business Scenario Explanation

In the previous task, you created a new custom all-employee business role, for example:

Z\_EMPLOYEES\_ALL\_#####

That role exists, but on its own it does not yet provide app access.

In SAP S/4HANA Cloud, app access is granted through business catalogs.

This means the role must now be connected to the catalogs that contain the apps employees need.

Later, these catalogs will feed the launchpad page content so end users can easily find the relevant applications.

Important Notes

Always replace ##### with the last 6 digits of your group number.

Use the exact catalog names and IDs.

Assign both required catalogs.

Save the role after assignment.

Do not assign the wrong catalog variant.

Required Catalogs

Assign exactly these two business catalogs:

Business Catalog

Business Catalog ID

HCM - Employee Self Service

SAP\_HCM\_BC\_EMP\_PC

Concur - Employee Self-Service

SAP\_CON\_BC\_CTE\_ESS\_PC

Detailed Step-by-Step Procedure

Step 1: Open the app "Maintain Business Roles"

From the SAP S/4HANA Cloud launchpad:

Log in to SAP S/4HANA Cloud.

Use the app search.

Search for:

Maintain Business Roles

Open the app.

Explanation:

This app is used to maintain business roles, assign catalogs, assign launchpad spaces, and maintain restrictions.

Step 2: Search for your custom all-employee business role

Inside Maintain Business Roles:

Search for your business role ID:

Z\_EMPLOYEES\_ALL\_#####

Example

If your suffix is 000013, search for:

Z\_EMPLOYEES\_ALL\_000013

Open the role.

Explanation:

You must open the custom all-employee role created in the previous task, not a template role and not a standard SAP role.

Step 3: Verify the correct role is open

Confirm that the role details show:

Business Role ID = Z\_EMPLOYEES\_ALL\_#####

Business Role Description = All Employee Role #####

Explanation:

This ensures you are assigning catalogs to the correct business role.

Step 4: Go to the "Business Catalogs" tab

Inside the role:

Click the tab:

Business Catalogs

Explanation:

This tab is used to assign the business catalogs that define which apps and app authorizations the role provides.

Step 5: Click Add

In the Assigned Business Catalogs section:

Click Add

This opens the dialog:

Add Business Catalogs

Explanation:

The Add popup is used to search for and assign SAP-delivered business catalogs to the custom role.

Step 6: Search for the first catalog

In the Add Business Catalogs popup:

Search for:

SAP\_HCM\_BC\_EMP\_PC

or

HCM - Employee Self Service

Select:

HCM - Employee Self Service

Business Catalog ID: SAP\_HCM\_BC\_EMP\_PC

Explanation:

This catalog provides employee self-service apps and is required by the task.

Step 7: Search for the second catalog

Still in the Add Business Catalogs popup:

Search for:

SAP\_CON\_BC\_CTE\_ESS\_PC

or

Concur - Employee Self-Service

Select:

Concur - Employee Self-Service

Business Catalog ID: SAP\_CON\_BC\_CTE\_ESS\_PC

Explanation:

This catalog provides the Concur employee self-service content and is also explicitly required by the task.

Step 8: Add the selected catalogs

After selecting both catalogs:

Click OK or Apply

Explanation:

This adds the selected catalogs to the custom role in draft mode.

Step 9: Verify both catalogs are listed

Back in the Business Role screen, verify that both assigned catalogs are visible:

SAP\_HCM\_BC\_EMP\_PC

SAP\_CON\_BC\_CTE\_ESS\_PC

Explanation:

This confirms that the required app authorizations have now been attached to the role.

Step 10: Save the role

Click:

Save

Explanation:

This finalizes the catalog assignment.

Without saving, the catalogs remain only in draft and the role will not provide the required app content.

Step 11: Verify the result after save

After saving, check again that the role still shows both business catalogs in the assigned list.

Explanation:

This confirms the task was completed successfully and the role is ready for the next step, which is launchpad space/page content.

Expected Result

After this task is completed successfully:

the custom all-employee role has both required business catalogs assigned, the role is saved successfully, the role now provides the app authorizations required for employee self-service content, the launchpad page can later use these catalogs to add the required tiles.

## NEW QUESTION # 17

.....

TrainingQuiz beckons exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our C\_S4CPB\_2602 simulating exam is the best. Our effort in building the content of our C\_S4CPB\_2602 study materials lead to the development of learning guide and strengthen their perfection. To add up your interests

and simplify some difficult points, our experts try their best to design our C\_S4CPB\_2602 Study Material and help you understand the C\_S4CPB\_2602 learning guide better.

**C\_S4CPB\_2602 Actual Dump:** [https://www.trainingquiz.com/C\\_S4CPB\\_2602-practice-quiz.html](https://www.trainingquiz.com/C_S4CPB_2602-practice-quiz.html)

SAP C\_S4CPB\_2602 exam dumps are not for a specific amount of people, You can easily find all kinds of C\_S4CPB\_2602 practice exam questions on our site, SAP Exam C\_S4CPB\_2602 Demo As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on, It will provide you with an SAP Certified - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C\_S4CPB\_2602) (C\_S4CPB\_2602) exam environment and will give you real exam SAP C\_S4CPB\_2602 questions.

Efficient rendering using primitive restart and C\_S4CPB\_2602 conditional rendering.
