BTW, DOWNLOAD part of VCEDumps CAD dumps from Cloud Storage: [https://drive.google.com/open?id=1zvabx3BYL\\_lmCRvH50FIOAt9KWhXlz5v](https://drive.google.com/open?id=1zvabx3BYL_lmCRvH50FIOAt9KWhXlz5v)

Additionally, all operating systems also support this format. The third format is the desktop CAD Practice Exam software. It is ideal for users who prefer offline Certified Application Developer-ServiceNow (CAD) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

ServiceNow CAD Certification Exam is ideal for those who want to pursue a career as a ServiceNow application developer. It is also suitable for IT professionals who want to enhance their knowledge of ServiceNow development and deployment. Certified Application Developer-ServiceNow certification exam covers a wide range of topics, including ServiceNow architecture, data model, scripting, security, service catalog, and reporting.

## Pass Guaranteed ServiceNow - CAD High Hit-Rate Exam Simulator Free

Of course, we also need to realize that it is very difficult for a lot of people to pass the exam without valid CAD study materials in a short time, especially these people who have not enough time to prepare for the exam, that is why many people need to choose the best and most suitable CAD Study Materials as their study tool. We believe that if you have the good CAD study materials when you are preparing for the exam, it will be very useful and helpful for you to pass exam and gain the related certification successfully.

ServiceNow CAD (Certified Application Developer-ServiceNow) Certification Exam is a professional certification that validates the skills and knowledge of developers in creating applications on the ServiceNow platform. The ServiceNow platform is a cloud-based solution that provides businesses with a range of IT service management applications that help streamline processes and improve efficiency. The CAD certification exam is designed for developers who have already completed the ServiceNow Fundamentals course and have experience in developing applications on the platform.

ServiceNow CAD Exam is a 90 minute web-based exam that is open-book, meaning that candidates can refer to ServiceNow documentation and materials throughout the test. CAD exam is competency-based, meaning that it tests a candidate's ability to perform tasks in the ServiceNow platform, rather than simply testing their knowledge of the platform. CAD exam covers ServiceNow's development practices, application architecture, customization, and other key aspects of developing on the ServiceNow platform.

## ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q148-Q153):

### NEW QUESTION # 148

How can an application link to a repository behind a firewall?

- A. Link an application to source control with multi-factor authentication.
- B. This option is not supported.

- C. Link an application to source control through a MID Server.
- D. Link an application to source control through an access token.

**Answer: C**

Explanation:

"Use an existing MID Server to connect to a Source Control repository. Linking or importing an application through a MID Server enables access to repositories behind a firewall." [https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c\\_SourceControlIntegration.html](https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_SourceControlIntegration.html)

#### NEW QUESTION # 149

Which of the following statements does NOT apply when extending an existing table?

- A. The new table inherits all of the fields from the parent table
- B. The parent table's Access Controls are evaluated when determining access to the new table's records and fields
- C. The new table inherits the functionality built into the parent table
- D. You must script and configure all required behaviors

**Answer: D**

Explanation:

You must script and configure all required behaviors. Provided link has this statement: Extending an existing ServiceNow table means the new table inherits the parent table's columns as well as its business logic.

#### NEW QUESTION # 150

Which of the following are configured in an Email Notification?

- Who will receive the notification.
- What content will be in the notification.
- When to send the notification.
- How to send the notification.

- A. b, c and d
- B. a, c and d
- C. a, b, and d
- D. a, b and c

**Answer: D**

Explanation:

[https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t\\_CreateANotification.html](https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t_CreateANotification.html)

Reference:

An Email Notification is a record that defines the content and conditions for sending an email message from the ServiceNow platform. The following are configured in an Email Notification:

Who will receive the notification. This is specified by the Recipients related list, which can include users, groups, email addresses, or scripts that return email addresses.

What content will be in the notification. This is specified by the Subject and Message HTML fields, which can include variables, scripts, or templates to dynamically generate the email content.

When to send the notification. This is specified by the When to send tab, which defines the conditions and events that trigger the email notification.

The following is not configured in an Email Notification:

How to send the notification. This is not a configuration option for an Email Notification. The platform uses the SMTP protocol to send email messages, and the email properties control the email server settings and behavior. References: Email Notifications, Get Started with Notifications

#### NEW QUESTION # 151

What is the GlideForm Client-side scripting object?

- A. gs.form

- B. g\_form
- C. gs\_form
- D. sn.form

**Answer: B**

#### NEW QUESTION # 152

The source control operation used to store local changes on an instance for later application is called a(n) <blank>.

- A. Branch
- B. Tag
- C. **Stash**
- D. Update set

**Answer: C**

Explanation:

Explanation/Reference: [https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t\\_StashLocalChanges.html](https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_StashLocalChanges.html)
