

FCP_FCT_AD-7.4 Testengine & FCP_FCT_AD-7.4 Tests

BONUS!!! Laden Sie die vollständige Version der Fast2test FCP_FCT_AD-7.4 Prüfungsfragen kostenlos herunter:
<https://drive.google.com/open?id=16l9Poc8AYxdPUYzMsBHePxsKRpw6hq6Y>

In der heutigen wettbewerbsorientierten IT-Branche hat man viele Vorteile, wenn man die Fortinet FCP_FCT_AD-7.4 Zertifizierungsprüfung besteht. Mit einem Fortinet FCP_FCT_AD-7.4 Zertifikat kann man ein hohes Gehalt erhalten. Menschen, die Fortinet FCP_FCT_AD-7.4 Zertifikat erhalten, haben oft viel höheres Gehalt als Kollegen ohne Fortinet FCP_FCT_AD-7.4 Zertifikat. Jedoch ist es nicht sehr einfach, die Fortinet FCP_FCT_AD-7.4 Zertifizierungsprüfung zu bestehen. So hilft Fast2test Ihnen, Ihr Gehalt zu erhöhen.

Fortinet FCP_FCT_AD-7.4 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.
Thema 2	Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.
Thema 3	FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.
Thema 4	FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.

FCP_FCT_AD-7.4 Studienmaterialien: FCP - FortiClient EMS 7.4 Administrator & FCP_FCT_AD-7.4 Zertifizierungstraining

Der Vorhang der Lebensbühne wird jederzeit geöffnet werden. Die Hauptsache ist, ob Sie spielen wollen oder einfach weglaufen. Diejenigen, die die Chancen ergreifen können, können Erfolg erlangen. Deshalb müssen Sie Fast2test wählen. Sie können jederzeit Ihre Fertigkeiten zeigen. Die Prüfungsmaterialien zur Fortinet FCP_FCT_AD-7.4 Zertifizierungsprüfung von Fast2test ist die effiziente Methode, die FCP_FCT_AD-7.4 Prüfung zu bestehen. Mit FCP_FCT_AD-7.4 Zertifikat können Sie Ihren Traum verwirklichen und Erfolg erlangen.

Fortinet FCP - FortiClient EMS 7.4 Administrator FCP_FCT_AD-7.4 Prüfungsfragen mit Lösungen (Q41-Q46):

41. Frage

Refer to the exhibit.

Based on The settings shown in The exhibit, which statement about FortiClient behaviour is Hue?

- A. FortiClient blocks and deletes infected files after scanning them.
- B. FortiClient quarantines infected ties and reviews later, after scanning them.
- C. FortiClient copies infected files to the Resources folder without scanning them.
- D. FortiClient scans infected files when the user copies files to the Resources folder.

Antwort: D

Begründung:

Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.

42. Frage

Which three features does FortiClient endpoint security include? (Choose three.)

- A. IPsec
- B. L2TP
- C. Vulnerability management
- D. DLP
- E. Real-time protection

Antwort: A,C,E

Begründung:

Understanding FortiClient Features:

FortiClient endpoint security includes several features aimed at protecting and managing endpoints.

Evaluating Feature Set:

Vulnerability management is a key feature of FortiClient, helping to identify and address vulnerabilities (B).
 IPsec is supported for secure VPN connections (D).
 Real-time protection is crucial for detecting and preventing threats in real-time (E).
 Eliminating Incorrect Options:
 Data Loss Prevention (DLP) (A) is typically managed by FortiGate or FortiMail.
 L2TP (C) is a protocol used for VPNs but is not specifically a feature of FortiClient endpoint security.

43. Frage

Which two are benefits of using multi-tenancy mode on FortiClient EMS? (Choose two.)

- A. It provides granular access and segmentation.
- B. The fabric connector must use an IP address to connect to FortiClient EMS.
- C. Separate host servers manage each site.
- D. Licenses are shared among sites

Antwort: A,D

Begründung:

Understanding Multi-Tenancy Mode:

Multi-tenancy mode allows multiple independent sites or tenants to be managed from a single FortiClient EMS instance.

Evaluating Benefits:

Licenses can be shared among sites, making it cost-effective (B).

It provides granular access and segmentation, allowing for detailed control and separation between tenants (D).

Eliminating Incorrect Options:

Separate host servers managing each site (A) is not a feature of multi-tenancy mode.

The fabric connector's use of an IP address (C) is unrelated to multi-tenancy benefits.

44. Frage

Which two statements about FortiClient EMS integration with Active Directory (AD) are true? (Choose two answers)

- A. Imported AD endpoints cannot be directly deleted on FortiClient EMS
- B. Endpoint profiles can be assigned to endpoints based on domain groups.
- C. FortiClient EMS has full read-write access on the AD server.
- D. FortiClient installations on domain endpoints can be deployed from FortiClient EMS.

Antwort: B,D

Begründung:

Based on the FortiClient EMS 7.2/7.4 Administration Guide and the EMS Administrator Study Guide, the integration with Active Directory (AD) provides several automated management capabilities.

1. Analysis of the True Statements:

* B. FortiClient installations on domain endpoints can be deployed from FortiClient EMS:

* FortiClient EMS allows administrators to create Deployment Profiles specifically for Windows endpoints discovered via AD.

* By providing AD administrator credentials within the deployment profile, EMS can remotely push the FortiClient MSI installer to domain-joined endpoints that do not yet have the software installed.

* C. Endpoint profiles can be assigned to endpoints based on domain groups:

* The core benefit of AD integration is the ability to map Endpoint Policies to specific AD Organizational Units (OUs) or Security Groups.

* When an endpoint policy is assigned to an AD group, all FortiClient endpoints belonging to that group automatically receive the associated security profiles (Antivirus, Web Filter, VPN, etc.) defined within that policy.

2. Why Other Options are Incorrect/Secondary:

* A. FortiClient EMS has full read-write access on the AD server:

* The curriculum states explicitly that the LDAP/AD connection is read-only.

* EMS cannot modify AD objects, create users, or change group memberships; it only synchronizes information from the AD server to the EMS database.

* D. Imported AD endpoints cannot be directly deleted on FortiClient EMS:

* While technically true in a functional sense (deleting a synced endpoint will result in it being re-added during the next sync unless it is removed from the AD OU), the curriculum typically prioritizes B and C as the primary functional "features" of the integration.

* Note that the guide specifies the "Delete" action in the Endpoints pane is restricted to non-domain devices to prevent

synchronization conflicts.

3. Summary of Integration Features:

- * Sync Schedule: EMS periodically syncs with AD (default every 10 minutes) to update the endpoint list.
- * Policy Automation: Moving a user or computer to a different group in AD will cause EMS to automatically update their security posture based on the new group's assigned policy.

45. Frage

Refer to the exhibit. Based on the FortiClient logs shown in the exhibit which application is blocked by the application firewall?

```
xx/xx/20xx 9:05:05 AM Notice Firewall date=20xx-xx-xx time=09:05:04 logver=2 type=traffic level=notice sessionid=34252360

destinationport=80 user=Administrator@TRAININGAD.TRAINING.LAB proto=6 rcvdbyte=N/A sentbyte=N/A utmaction=blocked utmevent=appfirewall
threat=Yahoo.Games vd=root fctver=5.4.0.0780 os="Microsoft Windows Server 2012 R2 Standard Edition, 64-bit (build 9600)"
usingpolicy="default" service=http
```

- A. Twitter
- B. Firefox
- C. Internet Explorer
- D. Facebook

Antwort: A

Begründung:

Based on the FortiClient logs shown in the exhibit:

The first log entry shows the application "firefox.exe" trying to access a destination IP, with the threat identified as "Twitter." The action taken by the application firewall is "blocked" with the event type "appfirewall." This indicates that the application firewall has blocked access to Twitter.

46. Frage

.....

Mit der Hilfe von Fast2test brauchen Sie nicht so viel Geld für die Kurse oder viel Zeit und Energie für die Prüfung auszugeben. Sie können ganz einfach die Fortinet FCP_FCT_AD-7.4 (FCP - FortiClient EMS 7.4 Administrator) Prüfung erfolgreich ablegen. Die Software zur Fortinet FCP_FCT_AD-7.4 Zertifizierungsprüfung wird Fast2test nach den echten Prüfungen in den letzten Jahren erforscht. Die Fragen und Antworten zur Fortinet FCP_FCT_AD-7.4 Zertifizierungsprüfung von Fast2test sind den realen Fragen und Antworten sehr ähnlich.
