Such a perfect one-stop service of our Sharing-and-Visibility-Architect test guide, believe you will not regret your choice, and can better use your time, full study, efficient pass the Sharing-and-Visibility-Architect exam.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q18-Q23):

NEW QUESTION # 18

A sales rep at Universal Containers (UC) has manually shared an Opportunity record with internal pre-sales users. After some time, the sales rep moved to another position and all opportunities records that were owned were transferred to a new sales rep. What happened to the internal pre-sales users access to the opportunity?

- A. They still have access to the record due to team access.
- B. They still have access to the record due to inherited sharing.
- C. They will no longer have access to the record.
- D. They still have access to the record due to implicit sharing.

Answer: C

NEW QUESTION # 19

Assuming granular locking is enabled, what activity can happen in parallel to changing a community account owner without risking group membership lock errors?

- A. Creation of a Role
- B. Deletion of a Role
- C. Creation of a Territory
- D. Deletion of a Territory

Answer: C

NEW QUESTION # 20

Universal Containers has implemented Customer Community with Customer Community Plus licenses for its distributors. Some distributors requested granting specific community users (agents) to view cases submitted by other agents of the same distributor. Which feature only supports these requirements?

- A. Partner super user
- B. Permission set to grant community admin permission
- C. Delegate external user

Answer: A

Explanation:

The Partner Super User feature allows certain community users to access records owned by other users within the same account. This feature is ideal for distributors needing some agents to view cases submitted by others within their organization. It provides broader access to records that are normally restricted by default sharing rules while ensuring the access scope remains confined to users linked by the same account.

* Option A: Granting community admin permission through permission sets is not supported for community users; this is an admin-level feature.

* Option B: Delegating external users allows managing other users, but it doesn't meet the requirement to share case visibility among users of the same account.

* Option C (Correct): Partner Super User enables the required sharing while adhering to the community's sharing model.

* Partner Super User Access

NEW QUESTION # 21

Universal Containers (UC) wants to reduce the amount of redundant leads entered into the system. UC also wants to ensure that leads are only edited/reassigned by the lead owner.

Which organization-wide default (OWD) approach should be recommended to help UC implement these requirements?

- A. Implement 2 Public Read-Only OWD on Lead.
- B. Implement a Public Read Only/Transfer OWD on Lead.
- C. Implement a Private OWD on Lead.

Answer: A

NEW QUESTION # 22

Universal Containers has developed Apex code to manually create AccountShare records to grant specific users access to individual Accounts. What must the Architect do to ensure the AccountShare records are not deleted when the owner of the Account is changed?

- A. Create the share records in a class with the "Without Sharing" keyword
- B. Create the share records and set the RowCause to a custom Apex Sharing Reason
- C. Create the share records and set the RowCause to Manual
- D. Create the share records with the Delete on Owner Change field set to false

Answer: B

NEW QUESTION # 23
