## Vce NCA-6.10 Files, PDF NCA-6.10 VCE

Many companies arrange applicants to take certification exams since 1995 internationally such like Microsoft, Fortinet, Veritas, EMC, and HP. Nutanix NCA-6.10 exam sample online was produced in 2001 and popular in 2008. So far many companies built long-term cooperation with exam dumps providers. Many failure experiences tell them that purchasing a valid Nutanix NCA-6.10 Exam Sample Online is the best effective and money-cost methods to achieve their goal.

## Nutanix Certified Associate v6.10 Sample Questions (Q15-Q20):

### NEW QUESTION # 15

An administrator has spent time correcting specific issues that have been identified by NCC Health Checks in Prism Element. How can just the checks that previously did not pass be executed again to confirm they are all resolved?

- A. Run LCM Pre-Upgrade to trigger NCC Checks.
- B. Select Run Check for each check worked.
- C. Run ncc health checks run\_all.
- D. Select Only Failed And Warning Checks.

**Answer: D**

**Explanation:**

To rerun only the health checks that previously failed or issued warnings, the administrator can select the Only Failed and Warning

Checkoption in Prism Element. This targeted approach helps verify that resolved issues have been addressed without rerunning all checks unnecessarily.

Steps:

- \* Navigate to Prism Element > Health > NCC Checks.
- \* Filter for Only Failed and Warning Checks and rerun them.

Other options:

- \* A. Run LCM Pre-Upgrade: Runs pre-upgrade checks, not related to health check validation.
- \* B. Run ncc health\_checks run\_all: Executes all checks, not just failed ones.
- \* C. Select Run Check for each check worked: Requires manual execution for each check.

Nutanix Cluster Check (NCC) Documentation.

### NEW QUESTION # 16

An administrator is looking to upgrade their licensing on a Nutanix cluster.  
Which licensing levels are available for a Nutanix cluster?

- A. Starter, Pro, Dedicated
- B. Community Edition, Pro, Enterprise
- C. Mixed, Advanced, Enterprise
- D. Starter, Pro, Ultimate

**Answer: D**

Explanation:

Nutanix licensing is available in three tiers:

- \* Starter: Entry-level features for basic virtualization and storage requirements.
- \* Pro: Advanced features such as data protection and disaster recovery.
- \* Ultimate: Comprehensive feature set, including advanced analytics and automation.

This tiered approach enables administrators to choose the appropriate license level based on their business requirements.

### NEW QUESTION # 17

An administrator needs to verify whether the cluster is protected currently from potential data loss due to a component failure.  
From the Prism Element Home dashboard, how should the administrator accomplish this task?

- A. Click on Home and then Alerts.
- B. Look at the Data Resiliency Status widget.
- C. Select the gear icon and then select Pulse.
- D. Navigate to the Health dashboard.

**Answer: B**

Explanation:

To verify if the cluster is currently protected from potential data loss due to a component failure, the administrator should check the Data Resiliency Status widget on the Prism Element Home dashboard. This widget provides real-time information about the cluster's resiliency status, including warnings or errors about data redundancy or protection.

Other options:

- \* A. Select the gear icon and then select Pulse: Pulse is used for telemetry data, not data resiliency status.
- \* B. Click on Home and then Alerts: Alerts show specific issues but do not directly indicate the overall resiliency status.
- \* D. Navigate to the Health dashboard: The Health dashboard provides detailed health checks but does not display the current resiliency status.

Nutanix Prism UI Documentation - Dashboard Overview.

### NEW QUESTION # 18

A Veeam Backup appliance, which uses iSCSI, must be deployed into an AHV-based cluster. What must be configured to allow Veeam to connect to the Nutanix cluster?

- **A. Network Segmentation**
- B. Data Services IP
- C. Prism Central
- D. Nutanix Objects

**Answer: A**

Explanation:

For a Veeam Backup appliance using iSCSI to connect to an AHV-based Nutanix cluster, a Data Services IP (DSIP) must be configured. The DSIP is a virtual IP that allows external systems to communicate with Nutanix storage using protocols such as iSCSI. This ensures seamless connectivity between Veeam and the Nutanix cluster.

\* A. Network Segmentation: While network segmentation is important for security, it is not specifically required for iSCSI connectivity.

\* B. Nutanix Objects: Nutanix Objects is used for object storage, not iSCSI connectivity.

\* C. Prism Central: Prism Central is used for multi-cluster management but is not involved in configuring iSCSI.

\* D. Data Services IP: Correct, as it enables external systems to connect via iSCSI.

### NEW QUESTION # 19

Within Prism Central, which Compute and Storage section will allow an administrator to upload a Windows ISO file?

- **A. Images**
- B. Catalog Items
- C. OVAS
- D. Templates

**Answer: A**

### NEW QUESTION # 20

.....
