Test JN0-105 Lab Questions - New JN0-105 Study Plan

P.S. Free & New JN0-105 dumps are available on Google Drive shared by Prep4cram: https://drive.google.com/open?id=1WqWxEBeFBA8oyoGM7xu8NII6blfAioAL

In fact, our JN0-105 exam materials provide comprehensive customers service, and our commitment to users does not end at the point of sale. If you have any questions related to our JN0-105 exam materials, you can always consult our customer service. Our customer service is 24 hours online and will answer your questions in the shortest possible time. Our JN0-105 Exam Materials assure you that we will provide the best service before you pass the JN0-105 exam. Prep4cram will never disappoint you. Therefore, you can prepare real JN0-105 exams using the actual JN0-105 exam questions. This is indeed a huge opportunity. Don't miss it!

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 2	• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device
Topic 3	• Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.

Topic 4	• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 5	• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.

Junos, Associate (JNCIA-Junos) valid practice questions & JN0-105 exam pdf vce & Junos, Associate (JNCIA-Junos) test training simulator

Prep4cram is a leading platform that has been helping the Juniper JN0-105 exam candidates for many years. Over this long time period, countless Juniper JN0-105 exam candidates have passed their dream Junos, Associate (JNCIA-Junos) (JN0-105) certification and they all got help from valid, updated, and Real JN0-105 Exam Questions. So you can also trust the top standard of Juniper JN0-105 exam dumps and start JN0-105 practice questions preparation without wasting further time.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q64-Q69):

NEW QUESTION # 64
Which two statements are correct about Junos traceoptions? (Choose two.)

- A. Traceoption output, by default, is stored in /var/iog/<fiie-name>.
- B. Traceoptions are enabled through configuration.
- C. Traceoptions are enabled by default.
- D. Traceoptions cannot be enabled in a production environment.

Answer: A,B

NEW QUESTION # 65
You want to find out the chassis serial number of a Junos device.
Which command would display this information?

- A. show chassis location
- B. show chassis environment
- C. show chassis hardware
- D. show chassis routing-engine

Answer: C

Explanation:
Theshow chassis hardwarecommand in Junos OS displays detailed information about the hardware installed in the device, including the chassis itself. This command provides a list of all hardware components, their serial numbers, part numbers, and version information. When looking for the chassis serial number specifically, this command is the most direct and comprehensive way to retrieve that information, as it includes the serial number of the chassis among the details provided.

NEW QUESTION # 66
Which three benefits occur when operating an interior gateway protocol (IGP) in an autonomous system (AS)?
(Choose three.)

- A. IGPs determine the optimal paths for data transmission.
- B. IGPs automatically distribute static routing information.
- C. IGPs react very fast to network change.
- D. IGPs learn everything about the subnets and best paths within your network.
- E. IGPs learn prefixes in the global Internet's routing table.

Answer: A,C,D

Explanation:
Operating an Interior Gateway Protocol (IGP) within an Autonomous System (AS) provides several benefits, including determining the optimal paths for data transmission (B), reacting quickly to network changes (D), and learning all about the subnets and best paths within the network (E). IGPs are designed to manage routing within a single AS efficiently, adapting to changes and ensuring data is routed through the best available paths.

NEW QUESTION # 67

You have configured some interfaces on a Junos device; however, you have not yet committed the configuration.
What happens if you issue the rollback 0 command in this scenario?

- A. The messages.log file is deleted.
- B. The interface changes you made are discarded.
- C. The factory default configuration is loaded.
- D. The Junos device is rebooted.

Answer: B

Explanation:
In Junos OS, issuing the rollback 0 command reverts the candidate configuration to the last committed configuration. If you have made changes to some interfaces but have not committed those changes, using rollback 0 will discard these uncommitted changes, reverting to the state of the configuration at the time of the last commit. This command does not affect system files like messages.log, reboot the device, or load the factory default configuration; it simply undoes uncommitted changes.

NEW QUESTION # 68

Which two statements about route preference in Junos are correct? (Choose two.)

- A. Both direct and local routes have the same preference.
- B. Both EBGP and IBGP routes have the same preference.
- C. Both direct and static routes have the same preference.
- D. Both OSPF internal and OSPF AS external routes have the same preference.

Answer: A,D

Explanation:
In Junos OS, route preference (also known as administrative distance) is used to determine the preferred route among multiple routes to the same destination learned via different routing protocols. Direct and local routes, which represent directly connected networks and interfaces, typically share the same low preference value, indicating high trustworthiness because they are directly connected to the router. OSPF internal routes (routes within the same OSPF area) and OSPF AS external routes (routes that are external to the OSPF autonomous system but redistributed into OSPF) also share the same preference value, although this value is higher (indicating less trust) than for direct and local routes. This distinction helps the routing engine decide which routes to use when multiple paths are available.

NEW QUESTION # 69

......

By concluding quintessential points into Junos, Associate (JNCIA-Junos) practice materials, you can pass the exam with the least time while huge progress. Our experts are responsible to make in-depth research on the exams who contribute to growth of our JN0-105 practice materials. Their highly accurate exam point can help you detect flaws on the review process and trigger your enthusiasm about the exam. What is more, JN0-105 practice materials can fuel your speed and the professional backup can relieve you of stress of the challenge.
