Activity	Description	Predecessors	Duration (months)
A	Develop information for public hearings	-	3
B	Hold public hearings	A	3
C	Develop draft plans and specifications	A	5

J	Install equipment, staff, facility	F	9

- A, B, G, & H.
- B, A, C, E, & H.
- C, A, D, & I.
- D, A, B, F, & J

Answer: A

Explanation:

Critical Path Identification:

* The critical path is the longest sequence of activities that determines the project's minimum duration.

* Path: A → B → G → H.

Exclusion of Other Options:

* Paths involving F, J, or non-critical activities do not align with the longest duration.

Verification with PSP Guidelines:

The PSP Study Guide emphasizes identifying the critical path for schedule optimization (Ref: PSP Study Guide, Chapter 2A: Critical Path Analysis)

NEW QUESTION # 157

Taking personal property in such a way that the plaintiff's use or right of possession of chattel is restricted is called:

- A. Restriction
- B. Transfer
- C. Conversion

NEW QUESTION # 158

Which letter of the alphabet best approximates the graphical shape of a project's cumulative cost baseline, or budgeted cost of work scheduled?

- A. C.
- B. B.
- C. W.
- D. S.

Answer: D

Explanation:

The cumulative cost baseline typically forms an "S" curve, reflecting slow initial expenditures, accelerating progress during peak activities, and tapering off as the project concludes.

* Option A, B, and D do not represent the characteristic shape of a project's cost curve.

The PSP Study Guide highlights the "S" curve as a standard graphical representation of cumulative project costs over time.

- A. It is the penultimate work required for the project
- **B. It is the final activity for the required work for the project**
- C. The early finish and late finish are circular
- D. The scheduler forgot to add the successor activities

Answer: B

Explanation:

Activity 11001 Characteristics:

- * Activity 11001 (Spillway - Concrete) is logically defined as the final activity in the project.
- * Final activities in a project typically do not have successor activities since they signify project completion.

Exclusion of Other Options:

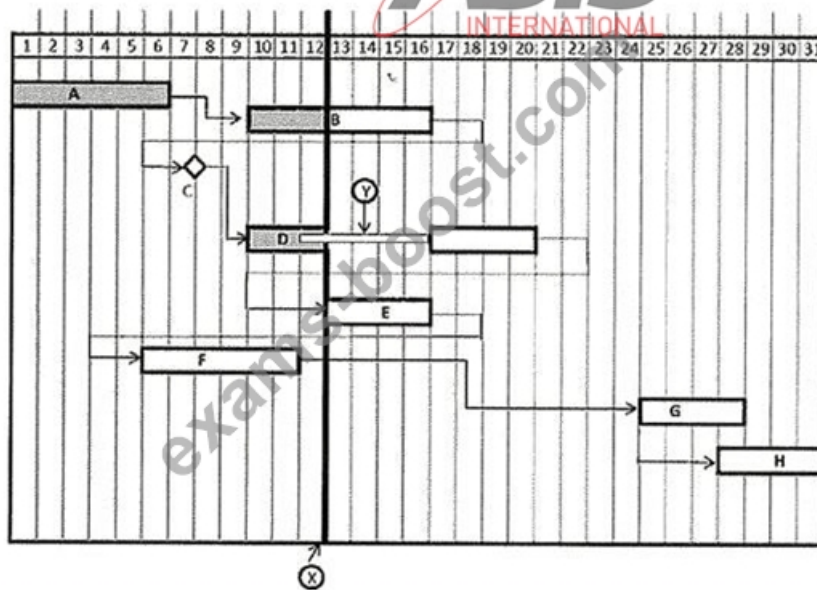

- * Option A: Circular logic does not apply since the scheduling logic is linear and follows standard precedence diagramming methods.
- * Option B: Activity 11001 is not penultimate but the final activity.
- * Option C: The scheduler's error is highly unlikely in a controlled environment following PSP principles.

Verification with PSP Guidelines: The PSP Study Guide explains that final activities represent the culmination of a project's logical sequence and typically lack successors (Ref: PSP Study Guide, Chapter 2A: Logical Sequencing).
