## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q29-Q34):

### NEW QUESTION # 29

What is the definition of a threat according to ISO/IEC 27000?

- A. A single or a series of unwanted or unexpected information security events
- **B. A potential cause of an unwanted incident which can result in harm to a system or organization**
- C. The risk remaining after risk treatment
- D. A weakness of an asset or a control that can be exploited

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

\* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

\* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

\* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

### NEW QUESTION # 30

In which clause would the requirements for internal audit be found?

- A. Improvement
- **B. Performance Evaluation**
- C. Planning
- D. Operation

**Answer: B**

Explanation:

The requirements for internal audit are explicitly placed in Clause 9.2 (Performance Evaluation) of ISO/IEC 27001:2022. The standard requires:

\* "The organization shall conduct internal audits at planned intervals to provide information on whether the information security management system... conforms to the organization's own requirements... and to the requirements of this document." (9.2.1)

\* "The organization shall plan, establish, implement and maintain an audit programme(s)..." (9.2.2) This clause clearly falls under Performance Evaluation (Clause 9), not Planning (Clause 6), Operation (Clause 8), or Improvement (Clause 10). Therefore, the correct answer is C.

### NEW QUESTION # 31

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- B. Information security risks are assessed and the probability and/or impact reduced
- C. Information security compliance will increase stakeholder trust in the organization
- D. Information security controls are tailored to suit the organization's specific circumstances

**Answer: A**

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."

Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

### NEW QUESTION # 32

Which statement describes a requirement of an internal audit programme?

- A. Previous audit results are disregarded to ensure objectivity
- B. All processes must be audited within a 3-year cycle
- C. The programme must consider the importance of the target processes
- D. The programme must use third party auditors to ensure impartiality

**Answer: C**

Explanation:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to: "Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor.

Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs.

Thus, the correct verified answer is C.

### NEW QUESTION # 33

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Communication
- B. Nonconformity and corrective action
- C. Awareness
- D. Competence

**Answer: C**

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement). Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

## NEW QUESTION # 34

.....

Now is not the time to be afraid to take any more difficult ISO-IEC-27001-Foundation certification exams. Our ISO-IEC-27001-Foundation learning quiz can relieve you of the issue within limited time. Our website provides excellent ISO-IEC-27001-Foundation learning guidance, practical questions and answers, and questions for your choice which are your real strength. You can take the ISO-IEC-27001-Foundation Training Materials and pass it without any difficulty.
