The AD0-E117 Exam is a comprehensive test that evaluates an individual's understanding of the Adobe Experience Manager platform's architecture and functionalities.

Adobe Experience Manager Architect Master Sample Questions (Q28-Q33):

NEW QUESTION # 28

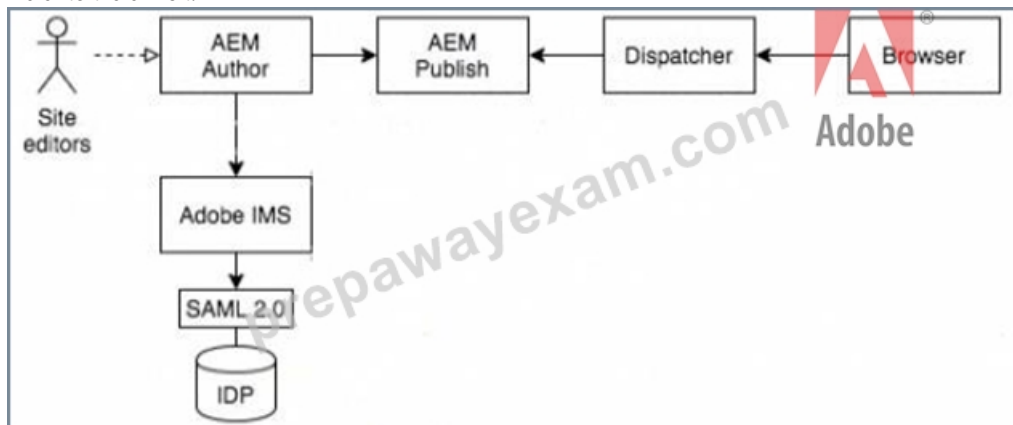

An architect is leading a cross-functional team in a retail organization tasked with enhancing the online shopping experience. The goal is to render product pages and catalog pages using Adobe Experience Manager (AEM), while keeping the checkout process within the commerce engine. The team is considering different architecture options to achieve this. Given the complexity of the project and the need for seamless integration, which architecture would provide the most suitable solution?

- A. Headless Architecture
- B. Centralized Architecture
- C. Monolithic Architecture

Answer: A

NEW QUESTION # 29

Refer to the exhibit.

A customer has SSO on its AEM Author environment using Adobe IMS, which is integrated with the customer's IDP using SAML. The customer plans to roll out a new secured website on AEM where SSO authentication is required for end users. The end user accounts are also managed in the customer's existing IDP.

How should the Architect set up the authentication for the website?

- A. Integrate AEM Publisher using OAuth with Adobe IMS
- B. Set up CUG and use User Synchronisation from Author to Publisher
- C. Integrate AEM Publisher using SAML directly with the IDP
- D. Integrate AEM Publisher using SAML with Adobe IMS

Answer: D

NEW QUESTION # 30

A customer wants to implement an AEM solution to serve localized content to several regional websites. Which AEM capability should the Architect recommend?

- A. Use translation connector and Multi Site Manager
- B. Use translation connector and i18N API
- C. Use translation connector and translation workflows
- D. Use i18N API and Multi Site Manager

Answer: A

Explanation:

According to Adobe Experience Manager documentation, translation connectors are used to integrate AEM with third-party translation services to orchestrate the translation of AEM content. Multi Site Manager (MSM) is used to create and manage multiple websites that share common content and structure.

<https://experienceleague.adobe.com/docs/experience-manager-cloud-service/content/sites/administering/reusing-content/translation/sites/configure-connector.html%3Flang%3Den>

NEW QUESTION # 31

An AEM customer is designing a new website. The design shows that images are very prominent on the website but there is a concern about the big variety of aspect ratios used. Images can potentially be used on different places and components on the website. The customer is looking for a maintainable solution to limit the amount of content editing work when adding the assets to the pages.

Which solution should an Architect recommend?

- A. Use inline cropping feature of the image component on the pages
- B. Use the cropping feature on the asset in the AEM DAM
- C. Integrate with Dynamic Media (Scene 7) and enable smart imaging
- D. Integrate with Dynamic Media (Scene 7) and enable smart cropping

Answer: C

Explanation:

"integrating with Dynamic Media (Scene 7) and enabling smart imaging can optimize the image delivery for different devices and screen sizes without requiring manual cropping".

NEW QUESTION # 32

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Configure Sticky Connections
- B. Enable Encapsulated Token Option
- C. Enable Round Robin processing in Dispatcher configuration
- D. Configure the Dispatcher to run with a Dedicated System User

Answer: B

Explanation:

"enabling Encapsulated Token Option can provide optimal load balancing across multiple AEM publish instances by using a token-based authentication mechanism".

NEW QUESTION # 33
