## Google Cloud - Apigee Certified API Engineer Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Your project has just started, and you are observing that bugs are being caught in QA on features that were previously working. You want to provide a self-governing mechanism for the team to identify regression bugs. What should you do?

- A. Ask developers to run unit tests prior to each check in.
- B. Implement automated integration testing on check in.
- C. Use Behavior Driven Development tools.
- **D. Use static code analysis tools.**

**Answer: D**

### NEW QUESTION # 48

You need to restrict write access to those applications that have been specifically delegated that authority by end users. Your project is already using OAuth2 for user and app authentication. What should you do?

- **A. Use an OAuth2 scope to identify allowed applications and user granted rights.**
- B. Retrieve user rights from a database by inspecting the user id bound to the OAuth2 token.
- C. Create a different URL for updates.
- D. Implement user rights checks in the underlying microservice.

**Answer: A**

### NEW QUESTION # 49

Which is true about DefaultFaultRule?

- A. DefaultFaultRule can be used to handle an error that is not explicitly handled by a FaultRule.
- **B. DefaultFaultRules are a fixed set of fault rules defined in the product.**
- C. DefaultFaultRule is used when the fault happens during communication with the target.
- D. You cannot use both FaultRule and DefaultFaultRules in the same API proxy.

**Answer: B**

### NEW QUESTION # 50

What is the purpose of a refresh token?

- A. To reset an application to its default configuration.
- B. To notify the application that a new access token is required.
- C. To extend the amount of time an existing access token can be used by resetting the token's expiration time.
- **D. To request that Apigee re-issue a new access token to replace an expired access token.**

**Answer: D**

### NEW QUESTION # 51

In Apigee Quota policy, if it is essential that you do NOT allow any API calls over the quota, which configuration option is used?

- A. distributed, synchronous
- B. non-distributed, non-synchronous
- C. distributed, non-synchronous
- D. non-distributed, synchronous

**Answer: C**
