## Salesforce-Media-Cloud Reliable Test Vce | Test Salesforce-Media-Cloud Assessment

Under the guidance of our Salesforce-Media-Cloud preparation materials, you are able to be more productive and efficient, because we can provide tailor-made exam focus for different students, simplify the long and boring reference books by adding examples and diagrams and our IT experts will update Salesforce-Media-Cloud guide torrent on a daily basis to avoid the unchangeable matters. And you are able to study Salesforce-Media-Cloud study torrent on how to set a timetable or a to-so list for yourself in your daily life, thus finding the pleasure during the learning process of our Salesforce-Media-Cloud study materials.

## Salesforce Media Cloud Accredited Professional (AP) Exam Sample

## Questions (Q23-Q28):

### NEW QUESTION # 23

A publisher wants to empower its sales team by embedding analytic dashboards that show the actual digital delivery performance on the Salesforce account page for advertisers and agencies. The dashboard will need to be customized to reflect nuances of the publisher's business.

What should a Consultant configure or implement to solve for this use case?

- A. Clone one of the flex cards included in ASM and customize the parameters to display a Marketing Cloud Intelligence dashboard.
- B. **Configure the Ad Delivery Connector for CRM Analytics and set up an embedded CRM dashboard.**
- C. Integrate digital delivery sources to Big Query or Snowflake, connect Tableau to the data warehouse, and then set up an embedded Tableau dashboard on the account page.
- D. Use integration procedures to build a custom connection to the ad server to bring delivery data into the Ad Delivery object and set up a report chart on the account page.

### Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Ad Delivery Connector for CRM Analytics is a standard Salesforce solution to display digital delivery metrics directly inside Salesforce, with embedded dashboards tailored to the publisher's business. This approach leverages native Salesforce Analytics, enabling customization and tight integration with account data. Using external data warehouses like Big Query or Tableau is more complex and less integrated.

### NEW QUESTION # 24

A publishing company has an existing media plan creation process that was setup using OmniStudio a few months ago. A new requirement has come up where the user will be required to enter a new secondary budget field and this field should be stored with the rest of the media plan details.

On which object should a Consultant add this field so that it is stored with the rest of the media plan and can be added to the appropriate OmniScript?

- A. Quote
- B. Opportunity
- C. **Media Plan Placement**
- D. Order

### Answer: C

### NEW QUESTION # 25

A Consultant is asked to help design a solution which could aid a company in expanding their reach into the small and medium business (SMB) segment. This has traditionally been a challenge for a company in the direct-sales channel because the small and medium business greatly outnumber the Sales team.

What should the Consultant do in the design to allow for Advertiser/Agency to self-service their media plans?

- A. Set up Web-to-Lead and have the Advertiser/Agency submit their media plan through a website so the Sales team can later take ownership of the record and follow up to finalize the media plan.
- B. **Leverage the Advertising Sales Management Self-Care feature so that approved Advertiser/Agency can access an Experience Cloud portal where they can create and track their media plans.**
- C. Build an Experience Cloud with the Customer Service template for the Advertiser to navigate the product catalog and configure the products in the site.
- D. Set up a public user, which anyone can use to create their own media plan, and provide their company information in the record detail.

### Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Advertising Sales Management (ASM) Self-Care is a built-in feature in Media Cloud that allows approved Advertisers and Agencies to use an Experience Cloud portal for creating and tracking media plans. This is the recommended solution to enable self-service while maintaining controlled access, which is critical for scaling SMB reach efficiently. Web-to-Lead or public users lack the robustness and security of the Self-Care portal.

## NEW QUESTION # 26

Which two actions take place, when an insertion order is created and submitted in Media Cloud Advertising Sales Management (ASM)?

Choose 2 answers

- A. The orchestration plan is created and can be viewed
- B. Order is submitted to B2B Commerce Order Management
- C. Order flow is initiated for asset creation and billing
- D. Order is submitted to Industries Order Management

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Upon insertion order submission, Media Cloud triggers an order flow that initiates asset creation and billing processes. Additionally, the order is handed over to Industries Order Management for orchestration across external systems such as ad servers and billing platforms. B2B Commerce is not involved in ad order fulfillment.

## NEW QUESTION # 27

Which out-of-the-box custom object is meant to represent sub-deals with their respective details (amount, date, etc.) to be captured?

- A. QuoteMember
- B. QuotePricingAdjustment
- C. QuoteGroup
- D. QuoteProductRollup

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The QuoteGroup object in Media Cloud ASM is designed to represent sub-deals within a quote, capturing details like amounts and dates for these groupings. It allows segmentation of quotes into logical deal components. The other objects focus on pricing adjustments, membership, or product rollups but do not represent sub-deals.
