NEW QUESTION # 374
A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.
Match each option to its answer.
Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right.
Each app type may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

App types		Answer Area	
		Definition	**App type**
model-driven		Quickly create apps for very complex business processes with very little or no code.	App type
dashboard			
dataset		Create simple apps with a highly customizable user interface layouts.	App type
canvas			

Answer:

Explanation:
Explanation

Definition	**App type**
Quickly create apps for very complex business processes with very little or no code.	canvas
Create simple apps with a highly customizable user interface layouts.	model-driven

Box 1: canvas
Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources.
Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model - building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.
Box 2: model-driven

NEW QUESTION # 375
A bank uses Power Platform apps and flows to support business processes.
The company would like to use historical client data to predict whether a client's loan application is likely to be approved or rejected.
You need to use AI Builder to implement the solution.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Publish the model.	
Export data into AI Builder.	
Train the model.	
Import data into Common Data Service.	
Use the model in PowerApps or Microsoft Flow.	

Answer:

Explanation:

Explanation

Step 1: Import data into Common Data Service.
AI Builder requires the use of Common Data Service, which is the data platform for PowerApps and allows you to store and manage business data. Common Data Service is the platform on which Dynamics 365 apps are built so if you're a Dynamics 365 customer, your data is already in Common Data Service.
Step 2: Train the model
Step 3: Publish the model
The last step is to publish your model.
Step 4: Use the model in PowerApps or Microsoft Flow.
