NEW QUESTION # 176
You have just been hired by a company new to Scrum. Your management has assigned you to be the Scrum Master of six new Scrum Teams. These teams will build one product Select two conditions you should strive tor in this scenario.
(choose the best two answers)

- A. The product has one Product Backlog.
- B. There should be only one Product Owner.
- C. Each Scrum Team should have a separate Product Backlog.
- D. There should be six Product Owners, one tor each Scrum Team.
- E. There should be six Product Owners, reporting to a Chief Product Owner.

Answer: A,B

Explanation:
C and E
Short Explanation: According to the Scrum Guide 20201, the product has one Product Backlog, which is the single source of work undertaken by the Scrum Team. The Product Backlog is ordered by the Product Owner, who is accountable for maximizing the value of the product resulting from the work of the Scrum Team. There should be only one Product Owner per product, who may represent the desires of a committee in the Product Backlog, but those wanting to change a Product Backlog item's priority must address the Product Owner1. Having multiple Product Owners or Product Backlogs would create confusion, inconsistency, and waste in the Scrum process.
