C_S4CPR_2502問題例、C_S4CPR_2502認定資格試験問題集

お客様に最も信頼性の高いバックアップを提供するという信念から当社のC_S4CPR_2502試験問題を作成し、優れた結果により、試験受験者の機能に対する心を捉えました。C_S4CPR_2502練習資料は、3つのバージョンに分類できます。これらのバージョンの使用はすべて、彼らに受け入れられています。これらのバージョンのC_S4CPR_2502模擬練習には大きな格差はありませんが、能力を強化し、レビュープロセスをスピードアップして試験に関する知識を習得するのに役立ちます。そのため、レビュープロセスは妨げられません。

SAP C_S4CPR_2502 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of a SAP Project Manager and covers the methodology for successful cloud implementation projects. It includes adopting a cloud mindset, assembling the right project team, and conducting fit-to-standard workshops to ensure efficient and value-driven implementations.

トピック 2	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
トピック 3	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement 認定 C_S4CPR_2502 試験問題 (Q76-Q81):

質問 # 76

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign PFCG profiles to a business role
- B. Maintain technical catalogs
- C. Maintain restrictions
- D. Assign business catalogs to a business role

正解: C、D

解説:

The Maintain Business Roles SAP Fiori app is used to manage business roles in SAP S/4HANA Cloud Public Edition. This app allows administrators to configure roles by assigning business catalogs and maintaining restrictions, ensuring that users have the appropriate access and permissions for their tasks.

* Maintain restrictions (Option C): Restrictions can be defined within business roles to limit access to specific data or functionalities.

For example, you can restrict access to certain purchase requisitions based on organizational units or cost centers. The SAP S/4HANA Cloud Security Guide confirms that maintaining restrictions is a key activity in the Maintain Business Roles app.

* Assign business catalogs to a business role (Option D): Business catalogs are collections of SAP Fiori apps grouped by functionality. Assigning these catalogs to business roles ensures that users have access to the required applications. The SAP Fiori Apps Reference Library explicitly states that assigning business catalogs is a core function of the Maintain Business Roles app.

* A. Maintain technical catalogs: Technical catalogs are managed in the backend system and are not maintained directly in the Maintain Business Roles app. This activity is typically handled by system administrators using tools like SAP Cloud ALM.

* B. Assign PFCG profiles to a business role: In SAP S/4HANA Cloud Public Edition, PFCG (Profile Generator) profiles are not used because the system follows a role-based access control model. Instead, business roles and catalogs are used to manage access.

* SAP S/4HANA Cloud Security Guide: Explains how to maintain restrictions and assign business catalogs in the Maintain Business Roles app. <https://help.sap.com>

* SAP Fiori Apps Reference Library: Provides details about the Maintain Business Roles app and its functionalities.

* SAP S/4HANA Cloud Role-Based Access Control Guide: Describes the role-based security model and how business roles are configured.

Why Options C and D Are Correct: Why the Other Options Are Incorrect: Key References:

質問 # 77

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Extensibility using the Legacy System Migration Workbench
- B. Combining the local and remote schema approaches into one migration project
- C. Guidance and simulation of the migration process
- D. Mapping source values to SAP S/4HANA target values

正解: C、D

解説:

The SAP S/4HANA Migration Cockpit is a tool designed to facilitate data migration into SAP S/4HANA Cloud Public Edition. Below is an explanation of the correct answers:

- * Mapping source values to SAP S/4HANA target values (A): The Migration Cockpit allows users to map data fields from the source system to corresponding fields in SAP S/4HANA, ensuring accurate data transformation during migration.
- * Guidance and simulation of the migration process (C): The tool provides step-by-step guidance and enables simulation of the migration process to identify potential issues before executing the actual migration.
- * Extensibility using the Legacy System Migration Workbench (B): The Legacy System Migration Workbench is used for on-premise systems and is not applicable to SAP S/4HANA Cloud Public Edition.
- * Combining the local and remote schema approaches into one migration project (D): This is not a characteristic of the Migration Cockpit, as it focuses on structured migration projects rather than combining schemas.

質問 # 78

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- **A. Multi-tenant server**
- **B. Lower total cost of ownership**
- C. Software installation on customer site
- D. Perpetual license

正解: A、B

解説:

Public cloud solutions have distinct characteristics that differentiate them from on-premise or private cloud deployments. Below is an explanation of the correct answers:

- * Multi-tenant server (A): Public cloud environments typically operate on a multi-tenant architecture, where multiple customers share the same infrastructure while maintaining data isolation. This approach optimizes resource utilization and reduces costs.
- * Lower total cost of ownership (C): Public cloud solutions eliminate the need for on-site hardware and software installations, reducing upfront capital expenditures and ongoing maintenance costs. This results in a lower total cost of ownership compared to traditional on-premise solutions.
- * Software installation on customer site (B): Public cloud solutions do not require software installation on the customer's premises, as the software is hosted and maintained by the cloud provider.
- * Perpetual license (D): Public cloud solutions typically operate on a subscription-based model rather than perpetual licensing, which is common in on-premise deployments.

質問 # 79

Which of the following apps can you use to extend the organizational data of an already existing material /product in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- **A. Change Material**
- **B. Manage Product Master Data**
- C. Create Material
- D. Manage Source Data Products

正解: A、B

解説:

In SAP S/4HANA Cloud Public Edition, extending the organizational data of an already existing material /product can be achieved through specific apps designed for managing and modifying master data. Here's a detailed explanation of the correct answers:

- * Manage Product Master Data (A): This app allows users to manage product master data across different organizational levels, such as plants, sales organizations, and distribution channels. It is particularly useful for extending the organizational data of an existing material by adding or modifying attributes relevant to specific organizational units. This app provides a centralized interface to handle various aspects of product data.
- * Change Material (B): The "Change Material" app is used to modify existing material master records. It allows users to update or

extend the organizational data for materials in different organizational contexts, such as plant-specific or purchasing-related data. This app is essential when you need to make changes to existing materials without creating new ones.

* Create Material (C): This app is used to create new material master records rather than extending or modifying existing ones. Therefore, it is not suitable for extending the organizational data of an already existing material.

* Manage Source Data Products (D): This app is related to managing source data for products, typically used in procurement processes to define sources of supply. It does not directly deal with extending organizational data for existing materials.

SAP Best Practices for Sourcing and Procurement in SAP S/4HANA Cloud Public Edition These references provide comprehensive insights into the functionalities and use cases of the mentioned apps within the context of SAP S/4HANA Cloud Public Edition - Sourcing and Procurement.

質問 #80

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. Conduct end-user training on active scope items.
- **B. Demonstrate SAP Best Practice business processes in the starter system.**
- C. Determine set up instructions for customer-driven integrations.
- **D. Highlight areas that require configuration or customization decisions.**

正解: B、D
