ASIS Physical Security Professional Exam Sample Questions (Q204-Q209):

NEW QUESTION # 204

The MOST common method of procurement in the security field is a/an:

- A. Request for proposal
- B. Request for information
- C. Request for quotation
- D. Invitation to bid

Answer: A

Explanation:

A Request for Proposal (RFP) is the most commonly used procurement method in the security industry, especially for complex systems where the buyer seeks not just price but also technical solutions, methodology, qualifications, and performance commitments.

A (RFI) is used for market research.

B (Invitation to bid) is used when scope is clearly defined and price is the primary factor.

D (RFQ) is for simpler purchases, focused on price.

NEW QUESTION # 205

The long-term (more than 60 days) process of restoration activities after an emergency or disaster that returns the organization to its pre-event condition is called:

- A. Business continuity
- B. Business healing
- C. Business recovery
- D. Business resumption

Answer: D

Explanation:

Business resumption refers to the long-term process (typically more than 60 days) of returning the organization to full, normal operations after a disruption. It follows the earlier stages of emergency response and business recovery and focuses on rebuilding systems and restoring service levels.

Business continuity (A) is a broader concept that includes all planning efforts.

Business recovery (B) focuses on short-term, interim operations.

Business healing (D) is not a formal term in continuity planning.

NEW QUESTION # 206

Which of the following is the type of comparative negligence statute?

- A. Pure approach
- B. 51 percent rule
- C. All of the above
- D. 50/50 rule

Answer: C

NEW QUESTION # 207

Administrative workload is substantially decreased when which service is employed?

- A. Security
- B. Union
- C. Proprietary
- **D. Contract**

Answer: D

NEW QUESTION # 208

The primary functions of a physical protection system are:

- A. Prevention, detection, and response
- **B. Detection, delay, and response**
- C. Delay, response, and deterrence
- D. Deterrence, detection, and response

Answer: B

Explanation:

Comprehensive Detailed Explanation:

The three primary and sequential functions of a Physical Protection System (PPS) are:

Detection - identifying unauthorized activity.

Delay - slowing intruder progress.

Response - intervening before asset compromise.

This layered approach ensures an opportunity to detect and intercept threats before they succeed.

A and D include "deterrence" or "prevention," which are security goals but not primary PPS functions.

C lists valid concepts but omits the critical detection phase.
