Try Before Buy Our Updated Salesforce Salesforce-Data-Cloud Questions

Propulsion occurs when using our Salesforce-Data-Cloud practice materials. They can even broaden amplitude of your horizon in this line. Of course, knowledge will accrue to you from our Salesforce-Data-Cloud practice materials. There is no inextricably problem within our Salesforce-Data-Cloud practice materials. Motivated by them downloaded from our website, more than 98 percent of clients conquered the difficulties. All contents of Salesforce-Data-Cloud practice materials are being explicit to make you have explicit understanding of this exam. Their contribution is praised for their purview is unlimited.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15
Which two applications automatically create activation targets at the time the application is connected to Data Cloud?

- A. Personalization powered by Interaction Studio
- B. Marketing Cloud Engagement
- C. Amazon S3
- D. B2C Commerce

Answer: A,D

Explanation:
These two applications automatically create activation targets when they are connected to Data Cloud. You can use these targets to activate segments or calculated insights to these applications. References:

NEW QUESTION # 16
An organization wants to enable users with the ability to identify and select text attributes from a picklist of options. Which Data Cloud feature can help with this use case?

- A. Global Picklists
- B. Value Suggestion
- C. Transformation Formulas
- D. Data Harmonization

Answer: B

Explanation:
Value suggestion is a feature of Data Cloud that allows you to identify and select text attributes from a picklist of options. You can use value suggestion to standardize values across different data sources and improve data quality. References:
https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_value_suggestion.htm&type=5

NEW QUESTION # 17
Northern Trail Outfitters (NTO), an outdoor lifestyle clothing brand, recently started a new line of business. The new business specializes in gourmet camping food. For business reasons as well as security reasons, it's important to NTO to keep all Data Cloud data separated by brand.
Which capability best supports NTO's desire to separate its data by brand?

- A. Data spaces for each brand
- B. Data sources for each brand
- C. Data model objects for each brand
- D. Data streams for each brand

Answer: A

Explanation:
Data spaces are logical containers that allow you to separate and organize your data by different criteria, such as brand, region, product, or business unit1. Data spaces can help you manage data access, security, and governance, as well as enable cross-cloud data integration and activation2. For NTO, data spaces can support their desire to separate their data by brand, so that they can have different data models, rules, and insights for their outdoor lifestyle clothing and gourmet camping food businesses. Data spaces can also help NTO comply with any data privacy and security regulations that may apply to their different brands3. The other

options are incorrect because they do not provide the same level of data separation and organization as data spaces. Data streams are used to ingest data from different sources into Data Cloud, but they do not separate the data by brand4. Data model objects are used to define the structure and attributes of the data, but they do not isolate the data by brand5. Data sources are used to identify the origin and type of the data, but they do not partition the data by brand. References: Data Spaces Overview, Create Data Spaces, Data Privacy and Security in Data Cloud, Data Streams Overview, Data Model Objects Overview, [Data Sources Overview]

NEW QUESTION # 18

A user Is not seeing suggested values from newly-modeled data when building a segment.
What is causing this issue?

- A. Value suggestion can only work on direct attributes and not related attributes.
- B. Value suggestion will only return results for the first 50 values of a specific attribute,
- C. Value suggestion requires Data Aware Specialist permissions at a minimum.
- D. Value suggestion is still processing and takes up to 24 hours to be available.

Answer: D

Explanation:
The most likely cause of this issue is that value suggestion is still processing and takes up to 24 hours to be available. Value suggestion is a feature that enables you to see suggested values for data model object (DMO) fields when creating segment filters. However, this feature needs to be enabled for each DMO field, and it can take up to 24 hours for the suggested values to appear after enabling the feature1. Therefore, if a user is not seeing suggested values from newly-modeled data, it could be that the data has not been processed yet by the value suggestion feature. References:
Use Value Suggestions in Segmentation

NEW QUESTION # 19

What is the first thing a business stakeholder should focus on when considering a Data Cloud implementation?

- A. Identify activation targets
- B. Identify data sources
- C. Review consent and privacy management policies
- D. Obtain cross-organizational buy-in

Answer: D

Explanation:
This is the first thing a business stakeholder should focus on when considering a Data Cloud implementation. Obtaining cross-organizational buy-in involves aligning the goals and expectations of different teams and stakeholders who will use or contribute to Data Cloud.
