

It is necessary to strictly plan the reasonable allocation of JN0-637 test time in advance. Many students did not pay attention to the strict control of time during normal practice, which led to panic during the process of examination, and even some of them are not able to finish all the questions. If you purchased JN0-637 learning dumps, each of your mock exams is timed automatically by the system. JN0-637 learning dumps provide you with an exam environment that is exactly the same as the actual exam. It forces you to learn how to allocate exam time so that the best level can be achieved in the examination room.

Topic	Details
Topic 1	Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.
Topic 2	Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 3	Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.

Topic	Details
Topic 1	Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.
Topic 2	Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 3	Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.

Topic 4	Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.

100% Pass JN0-637 PDF Dumps Files - Security, Professional (JNCIP-SEC) Unparalleled Pdf Torrent

So we can say that the Security, Professional (JNCIP-SEC) (JN0-637) practice test questions are real, valid, and updated and these will greatly help you in JN0-637 exam preparation. The availability of Security, Professional (JNCIP-SEC) (JN0-637) exam questions in three different formats, free demo download facility, affordable price, free three months updated JN0-637 Exam Questions download facility, and verified and real Security, Professional (JNCIP-SEC) (JN0-637) exam questions are the top features of Pass4guide JN0-637 exam questions.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q121-Q126):

NEW QUESTION # 121

Refer to the Exhibit:

Which two statements about the configuration shown in the exhibit are correct?

- A. The remote IKE gateway IP address is 203.0.113.100.
- B. The remote peer is assigned a dynamic IP address.
- C. The local peer is assigned a dynamic IP address.
- D. The local IKE gateway IP address is 203.0.113.100.

Answer: A,B

Explanation:

The two statements about the configuration shown in the exhibit are correct are:

A) The remote IKE gateway IP address is 203.0.113.100. The exhibit shows that the address option under the gateway statement is set to 203.0.113.100, which specifies the IP address of the primary IKE gateway. The address option is used to configure the IP address or the hostname of the remote peer that has a static IP address1.

D) The remote peer is assigned a dynamic IP address. The exhibit shows that the dynamic option under the gateway statement is configured with various attributes, such as general-ikeid, ike-user-type, and user-at-hostname. The dynamic option is used to configure the identifier for the remote gateway with a dynamic IP address. The dynamic option also enables the SRX Series device to accept multiple connections from remote peers that have the same identifier2.

The other statements are incorrect because:

B) The local peer is not assigned a dynamic IP address, but a static IP address. The exhibit shows that the local-address option under the gateway statement is set to 192.0.2.100, which specifies the IP address of the local IKE gateway. The local-address option is used to configure the IP address of the local peer that has a static IP address1.

C) The local IKE gateway IP address is not 203.0.113.100, but 192.0.2.100, as explained above.

Reference: gateway (Security IKE) dynamic (Security IKE)

NEW QUESTION # 122

Which two statements are correct about the ICL in an active/active mode multinode HA environment? (Choose two.)

- A. The ICL is the local device management interface in a multinode HA environment.
- B. The ICL uses a separate routing instance to communicate with remote multinode HA peers.
- C. The ICL is strictly a Layer 2 interface.
- D. The ICL traffic can be encrypted.

Answer: B,D

NEW QUESTION # 123

Which two statements about policy enforcer and the forescout integration are true? (Choose two)

- A. A Forescout CounterACT agent must be installed on third-party devices
- B. 802.1X authenticated devices are supported.
- C. 802.1X authenticated devices are not supported.
- D. A Forescout CounterACT agent is agentless and does not need to be installed on third-party device

Answer: B,D

NEW QUESTION # 124

Exhibit

You are using ATP Cloud and notice that there is a host with a high number of ETI and C&C hits sourced from the same investigation and notice that some of the events have not been automatically mitigated. Referring to the exhibit, what is a reason for this behavior?

- A. The ETI events are false positives.
- B. The C&C events are false positives.
- C. The infected host score is globally set below a threat level of 5.
- D. The infected host score is globally set above a threat level of 5.

Answer: A

NEW QUESTION # 125

Exhibit

```
[edit security ike gateway advpn-gateway]
user@srx# show
ike-policy advpn-policy;
address 192.168.3.1;
local-identity distinguished-name;
remote-identity distinguished-name container 0=Juniper;
external-interface ge-0/0/3.0;
version v2-only;
[edit interfaces]
user@srx# show st0
unit 0 {
    family inet {
        address 10.100.100.1/24;
    }
}
```

Referring to the exhibit, a spoke member of an ADVPN is not functioning correctly. Which two commands will solve this problem? (Choose two.)

- A. `user@srx# set advpn suggerter disable`
- B. `user@srx# set st0.0 multipoint`
- C. `user@srx# set advpn partner disable`
- D. `user@srx# set local-identity inet advpn`

Answer: A,D

NEW QUESTION # 126

.....

By browsing this website, all there versions of JN0-637 practice materials can be chosen according to your taste or preference. In addition, we provide free updates to users for one year long. If the user finds anything unclear in the JN0-637 practice materials exam, we will send email to fix it, and our team will answer all of your questions related to the JN0-637 practice materials. If the user fails in the JN0-637 practice exam for any reason, we will refund the money after this process. We promise that you can get through the challenge within a week.
