CompTIA A+ Certification Exam: Core 2 Sample Questions (Q10-Q15):

NEW QUESTION # 10
As a corporate technician, you are asked to evaluate several suspect email messages on a client's computer.
Corporate policy requires the following:
>All phishing attempts must be reported.
>Future spam emails to users must be prevented.
INSTRUCTIONS
Review each email and perform the following within the email:
>Classify the emails
>Identify suspicious items, if applicable, in each email

>Select the appropriate resolution

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Good afternoon Joe,

I just wanted to thank you for your time during my interview last week. It was exciting to hear about the position and possible opportunity at CompTIA. Please don't hesitate to reach out to me with any questions or concerns you may have about me or my qualifications. Regardless of the outcome, it was a pleasure speaking with you, and I hope to have the opportunity to work with you in the future.

Regards,
Alex

NEW QUESTION # 11
A technician notices that the weekly backup is taking too long to complete. The daily backups are incremental. Which of the following would most likely resolve the issue?

- A. Changing the backup window

- **B. Running synthetic full weekly backups**
- C. Performing incremental weekly backups
- D. Increasing the backup storage

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
A synthetic full backup combines the last full backup with subsequent incremental backups to create a new full backup without re-reading data from the source system. This method significantly reduces the backup window and network impact. It is especially useful when traditional full backups are too time-consuming.
A: Changing the backup window only shifts timing, not duration.
B: Incremental weekly backups would lack a proper full recovery point and aren't ideal alone.
C: Storage space isn't the bottleneck in backup speed-it's read/write operations and network load.
Reference:
CompTIA A+ 220-1102 Objective 4.2: Summarize backup and recovery concepts.
Study Guide Section: Backup types - full, incremental, differential, and synthetic backups

NEW QUESTION # 12
Which of the following is a Linux command that is used for administrative purposes?

- A. net user
- B. cmcl
- **C. su**
- D. runas

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The su (substitute user) command is used in Linux to switch to another user account, most commonly to escalate privileges by switching to the root (administrator) account. It allows administrative tasks to be performed in a terminal session.
A: runas is a Windows command for executing a program under another user's context.
B: cmcl is not a valid Linux or administrative command.
C: net user is a Windows command for managing local user accounts.
Reference:
CompTIA A+ 220-1102 Objective 1.9: Identify common features and tools of the Linux client/desktop OS.
Study Guide Section: Linux command-line tools - su, sudo

NEW QUESTION # 13
A technician is preparing to replace the batteries in a rack-mounted UPS system. After ensuring the power is turned off and the batteries are fully discharged, the technician needs to remove the battery modules from the bottom of the rack. Which of the following steps should the technician take?

- **A. Use appropriate lifting techniques and guidelines.**
- B. Wear a face mask to filter out any harmful fumes.
- C. Place the removed batteries in an antistatic bag.
- D. Ensure the fire suppression system is ready to be activated.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
UPS batteries are heavy and often located at the bottom of racks to maintain balance. Safe removal requires the use of correct lifting techniques to avoid injury. OSHA and workplace safety standards emphasize ergonomic handling when dealing with heavy equipment.
A: Fire suppression readiness is important for fire safety but not specifically relevant to battery removal.
C: Antistatic bags are for electronic components, not heavy battery modules.
D: A face mask is not generally necessary unless there is a chemical leak, which is not indicated here.

Reference:
CompTIA A+ 220-1102 Objective 4.3: Explain common safety and environmental impacts and procedures.
Study Guide Section: Safe handling procedures - lifting techniques, battery handling

NEW QUESTION # 14
A company recently transitioned to a cloud-based productivity suite and wants to secure the environment from external threat actors.
Which of the following is the most effective method?

- A. Multifactor authentication
- B. Strong passwords
- C. Backups
- D. Encryption

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Multifactor authentication (MFA) is considered one of the most effective security measures for cloud environments. It requires users to verify their identity using two or more factors (e.g., password + phone app code), making it significantly harder for external attackers to gain access, even if the primary password is compromised.
B: Encryption is important for data protection but doesn't prevent unauthorized logins.
C: Backups protect against data loss but don't stop breaches.
D: Strong passwords are helpful but can still be phished or cracked - MFA adds a critical extra layer.
Reference:
CompTIA A+ 220-1102 Objective 2.2: Compare and contrast authentication technologies.
Study Guide Section: Cloud security best practices - MFA and access control

NEW QUESTION # 15
......

Obtaining valid training materials will accelerate the way of passing CompTIA 220-1202 actual test in your first attempt. It will just need to take one or two days to practice CompTIA 220-1202 Test Questions and remember answers. You will free access to our test engine for review after payment.
