Our study materials can not only ensure you clear exam but also improve your professional IT expertise. Choosing Cloud-Digital-Leader Pass Guide, choose success.

Google Cloud Digital Leader Sample Questions (Q158-Q163):

NEW QUESTION # 158

Your organization needs to plan its cloud infrastructure expenditures.
Which should your organization do?

- A. Involve fewer people in cloud resource planning than your organization did for on-premises resource planning
- B. If your organization uses only cloud resources, infrastructure costs are no longer part of your overall budget
- C. Review cloud resource costs frequently, because costs change often based on use
- D. Review cloud resource costs annually as part of planning your organization's overall budget

Answer: C

Explanation:

Explanation

Review cloud resource costs frequently, because costs change often based on use because One need to know current usage/ trend for planning; While public cloud eliminates capex, and gets into pay as you go model, the usage pattern determines the cloud cost and hence needs to be measured frequently to enable better forecast

NEW QUESTION # 159

Your large and frequently changing organization's user information is stored in an on-premises LDAP database. The database includes user passwords and group and organization membership.

How should your organization provision Google accounts and groups to access Google Cloud resources?

- A. Use Google Cloud Directory Sync to create users
- B. Use the Identity Platform REST API to create users
- C. Replicate the LDAP infrastructure on Compute Engine
- D. Use the Firebase Authentication REST API to create users

Answer: A

Explanation:

You can run a single instance of Google Cloud Directory Sync to synchronize user accounts and groups to Google Cloud.

NEW QUESTION # 160

The Border Security Agency has hired your software services firm to build an application for them that will collect information about visas stamped on passports. You are given stamped images. You have to find out which country issued the visa and the period of validity. Pull out this data and put it into a database. Which of these applications would be suitable for that?

- A. Use Data Labeling service - outsource the work of marking and extracting the information to others.
- B. Use Cloud Vision API - write code to identify the text blocks, copy the data, and store it
- C. Use TensorFlow - write code that will identify the type of visa and the bounding text blocks. Copy the data and then store it.
- D. Use AutoML - upload other images of visas and run the model creation process which will automatically identify the visas

Answer: B

Explanation:

Explanation

Cloud Vision API allows you to programmatically identify images, text, etc. in the document. This would be the best option.

NEW QUESTION # 161

Your organization wants to migrate its data management solutions to Google Cloud because it needs to dynamically scale up or down and to run transactional SQL queries against historical data at scale. Which Google Cloud product or service should your organization use?

- A. Cloud Bigtable
- B. Pub/Sub
- C. Cloud Spanner
- D. BigQuery

Answer: C

NEW QUESTION # 162

Your organization runs a distributed application in the Compute Engine virtual machines. Your organization needs redundancy, but it also needs extremely fast communication (less than 10 milliseconds) between the parts of the application in different virtual machines. Where should your organization locate this virtual machines?

- A. In different zones within a single region
- B. In multiple regions, using one zone per region
- C. In multiple regions, using multiple zones per region
- **D. In a single zone within a single region**

Answer: D

NEW QUESTION # 163
