Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of Arch-303 Exam Material is the reason for your selection.

Salesforce Certified B2C Commerce Architect Sample Questions (Q17-Q22):

NEW QUESTION # 17
A Client has automated builds that deploy the code; however, recent builds started failing with compilation issues, which are not

reproducible in developer's environment.
Whetfirst step needs to be taken to identify and fix the issue?

- A. Clean up build server work space and run job again.
- B. Verify the modules versions used to generate the code.
- C. Recreate the job in the build server to verify compilation issues.
- D. Verify the generated JavaScript and CSS for the build.

Answer: A

Explanation:
When facing build failures that are not reproducible in developers' environments, a common and effective first step is to clean up the build server workspace (Answer A). This action clears any residual files, settings, or data that might be influencing the build process and causing discrepancies between local and server builds. By resetting the workspace to a clean state, it helps ensure that the build process is starting from a consistent base, potentially resolving issues caused by stale data or corrupted build artifacts. This step often resolves hidden configuration or environment-specific issues that are not immediately apparent in the code or module versions.

NEW QUESTION # 18
The client provided these business requirements:
* The B2C Commerce platform will integratewith the Client s Order Management System (OMS).
* The OMS supports Integration using REST services.
* The OMS is hosted on the Clients infrastructure.
Whet configurations are needed for this integration with the OMS?

- A. A service configuration, a service profile configuration, and a service credential configuration.
- B. A service configuration, a hostname alias configuration, and a user credential configuration.
- C. A service configuration, a service profile configuration, and a user credential configuration.
- D. A service profile configuration, a WAF configuration, and a service credential configuration.

Answer: A

Explanation:
For integrating the B2C Commerce platform with the client's OMS using REST services, the required configurations include:
* Service Configuration: This specifies the service endpoints, HTTP methods, and any other service- specific settings necessary for the integration.
* Service Profile Configuration: This defines the behavior of the service such as timeout settings, retry logic, and cache settings.
* Service Credential Configuration: This involves setting up the credentials that will be used to authenticate the requests to the client's OMS. These credentials are often managed securely through encrypted storage and retrieval mechanisms.
These configurations ensure secure, efficient, and reliable communication between the B2C Commerce platform and the client's OMS, adhering to best practices in web service integration.

NEW QUESTION # 19
Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer s post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.
What are the two feasible technical approaches to meet these requirements?
Choose 2 answers

- A. Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.
- B. Create a separate category per physical store use post/Tip code with a mapping to determine the relevant category. Show only the products from this category.
- C. Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excludedfrom the shipping method.
- D. Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.

Answer: A,B

Explanation:
For Northern Trail Outfitters to ensure that only products available in a customer's closest physical store are shown:
* Option B is effective because it organizes inventory by store-specific categories, which can then be dynamically linked to a customer's location via their postal/zip code. This allows the system to filter search results based on the relevant category that corresponds to the closest store.
* Option D leverages separate pricebooks that are specific to each store, enabling product availability to be managed through price refinements. This method also uses the customer's zip code to activate the appropriate pricebook, ensuring that only products priced (and thus available) in the nearest store are displayed.
Both methods are scalable and integrate seamlessly with the existing infrastructure of the Salesforce B2C Commerce platform.

NEW QUESTION # 20
The following promotions are configured with no exclusivity (can be combined with any other promotion) in a -1month campaign:
* Free correct- in -store shipping
* 20% accessories products discount, applies for all customers
* $5 off coupon based discount, sent to a selected group of customers
The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.
What solutionshould the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- B. Disable the coupon code. Restart the production instance from control Center to dear existing baskets.
- C. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.
- D. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets

Answer: D

Explanation:
Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon.
This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

NEW QUESTION # 21
The Client wants to offer custom made container products on its new B2C Commerce storefront. TheClient provided two business requirements.
* Customer can specify container length, width, and height.
* Customer can specify the material that the container is made of.
The Client also provided the Architect a current data schema (shown below) for reference while preparing the technical documentation.
Which two gaps between the requirements and the data schema should the Architect discuss with the Client?
Choose 2 answers

- A. The data schema includes unique identifiers for material and color fields,but neither are reflected in the business requirements.
- B. The data schema includes a Color_ID field, but there isn't a business requirement to allow the customer to specify container color.
- C. The data schema includes an implied structure that the customer's choices should be captured as custom objects, but there isn't a business requirement to do so
- D. The data schema includes a material Price_Markup field, but there Isn't a business requirement to factor the material cost Into the final price calculation.

Answer: A,B

Explanation:
The provided data schema includes several fields that do not match the stated business requirements, which focus on the custom dimensions and materials of the containers:

* Option A: The inclusion of unique identifiers for materials and color fields in the data schema suggests a level of detail and structure around these attributes that is not reflected in the business requirements. If the business does not require tracking or differentiating materials beyond just naming them, this might be unnecessarily complex.
* Option D: The data schema includes a Color_ID field, which implies the ability to specify the color of the container. However, the business requirements do not mention color as a customization option available to customers. This discrepancy needs to be addressed to ensure that the database design aligns with actual business needs.

NEW QUESTION # 22
.....

We are a comprehensive service platform aiming at help you to pass Arch-303 exams in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. The more efficient the Arch-303 study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your exams with the help our Arch-303 learning torrent just for 20 to 30 hours even by your first attempt.

New Arch-303 Mock Test: https://www.pdf4test.com/Arch-303-dump-torrent.html

If you're doubtful about the excellence of Arch-303 exam material, so you may try the free demo to test the quality features of our material, We know that everyone has a distinct learning style, situations, and set of goals, therefore we offer Salesforce Arch-303 updated exam preparation material in three easy-to-use formats to accommodate every exam applicant's needs, Salesforce Arch-303 Exam Materials You will receive a registration code and download instructions via email.

How Does User Experience Design Fit In to This, This is bait and switch, If you're doubtful about the excellence of Arch-303 exam material, so you may try the free demo to test the quality features of our material.

Arch-303 Exam Dumps - Top Secret for Instant Exam Preparation
