Nowadays NCP-CI-AWS certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of NCP-CI-AWS certification can help you find a better job and get a higher salary. With this target, we will provide the best NCP-CI-AWS Exam Torrent to the client and help the client pass the NCP-CI-AWS exam easily if you buy our NCP-CI-AWS practice engine.

Nowadays, we live so busy every day. Especially for some businessmen who want to pass the NCP-CI-AWS exam and get related certification, time is vital importance for them, they may don't have enough time to prepare for their exam. Some of them may give it up. But our NCP-CI-AWS guide tests can solve these problems perfectly, because our study materials only need little hours can be grasped. Once you use our NCP-CI-AWS Latest Dumps, you will save a lot of time. High effectiveness is our great advantage. After twenty to thirty hours' practice, you are ready to take the real NCP-CI-AWS exam torrent. The results will never let you down. You just need to wait for obtaining the certificate.

## Nutanix NCP-CI-AWS Practice Test with Latest NCP-CI-AWS Exam Questions [2026]

At DumpsQuestion, we are committed to providing candidates with the best possible NCP-CI-AWS practice material to help them succeed in the Nutanix Certified Professional - Cloud Integration - AWS exam. With our real NCP-CI-AWS exam questions in NCP-CI-AWS PDF file, customers can be confident that they are getting the best possible Nutanix Certified Professional - Cloud Integration - AWS preparation material for quick preparation. The Nutanix NCP-CI-AWS PDF Questions are portable and you can also take their print.

### Nutanix NCP-CI-AWS Exam Syllabus Topics:

---

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li> </ul>

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q132-Q137):

### NEW QUESTION # 132

Exhibit.

What action is taken against the Condemned node shown in the exhibit?

- A. The node has a power reset sent to it.
- B. The node is restarted.
- C. The node is powered off.
- D. The node is automatically replaced.

**Answer: A**

Explanation:

When a node is marked as "Condemned," it indicates that the system has determined that the node is no longer reliable for operations. As part of the automated recovery and protection process, the following action is typically taken:

The node has a power reset sent to it (Answer A):

In most cases, a condemned node undergoes a power reset as an initial recovery attempt. This action attempts to reboot the node to bring it back to a healthy state. If the reset fails, further manual or automated steps may be required to address the hardware or software issue.

### NEW QUESTION # 133

An administrator has noticed the company's NC2 free trial expired 60 days ago.

What should the administrator do to continue using all of the NC2 features on existing clusters?

- A. Contact the AWS cloud vendor.
- B. Contact Nutanix support to redeploy the cluster.
- C. Switch to a paid subscription plan.
- D. Nothing. The clusters will have full feature support.

**Answer: C**

#### NEW QUESTION # 134

An administrator is tasked with deploying a VM in an NC2 cluster on AWS that needs to be accessed by resources within the on-premises datacenter.

The cluster has the following characteristics:

- \* 8 nodes
- \* Resides in the us-east-1a Availability Zone
- \* Contains 13 Subnets
- \* Has access to a Direct Connect connection
- \* Subnet that the User VM (UVM) is being deployed to: UserVM\_subnet

There are multiple VMs within the cluster and the UserVM\_subnet has access to the on-premises resources.

The administrator deploys the machine, but communication is not possible.

What is the most likely resolution for this situation?

- A. The AWS User Management Security Group requires the new application's ports adding to and traffic
- **B. The AWS UVM Security Group requires the new application's ports adding to inbound traffic.**
- C. The AWS Internal Management Security Group requires the new application's ports adding to outbound traffic.
- D. The AWS IGW requires the new application's ports adding to inbound traffic.

**Answer: B**

Explanation:

For a VM deployed in an NC2 cluster on AWS to be accessed by resources within the on-premises datacenter, the security group associated with the User VM (UVM) subnet must allow inbound traffic on the specific ports required by the application.

If the security group rules do not permit inbound traffic on these ports, the communication will fail, even if other network configurations are correct.

The administrator should ensure that the UVM Security Group includes rules to allow inbound traffic for the application's required ports, facilitating proper communication between the VM and on-premises resources.

Reference:

Refer to the AWS documentation on security group configurations and Nutanix NC2 documentation for details on configuring network access and security group rules.

#### NEW QUESTION # 135

An administrator is tasked with adding an AWS account to the NC2 console. A requirement is to configure an AWS IAM user with the appropriate permissions.

Which permission must be assigned to the user?

- **A. AmazonEC2FullAccess**
- B. AmazonEC2ReadOnlyAccess
- C. IAMFullAccess
- D. IAMReadOnlyAccess

**Answer: A**

Explanation:

To add an AWS account to the NC2 console, an AWS IAM user needs to be configured with the appropriate permissions to manage the EC2 resources. The required permission for the IAM user includes full access to manage EC2 instances, volumes, and related resources.

AmazonEC2FullAccess:

This permission grants full access to all EC2 resources, including the ability to create, modify, and delete instances, volumes, security groups, and more.

Essential for NC2 operations to manage the lifecycle of EC2 instances and associated components within the AWS environment.

Why Not Other Permissions:

IAMFullAccess: Grants full access to IAM resources but not specifically needed for EC2 operations.

IAMReadOnlyAccess: Only provides read access to IAM resources, insufficient for managing EC2 instances.

AmazonEC2ReadOnlyAccess: Provides read-only access to EC2 resources, insufficient for creating or modifying instances and other resources.

### NEW QUESTION # 136

An administrator is deploying Flow Virtual Networking (FVN) for an NC2 cluster on AWS and discovers that two additional subnets are required in addition to the native AWS networking. Which two subnets should the administrator ensure are added during the deployment of FVN? (Choose two.)

- A. Flow Virtual Networking subnet on bare-metal nodes.
- **B. Prism Central subnet on Prism Element.**
- **C. Transit subnet on Prism Central.**
- D. Prism Element subnet on Prism Central.

**Answer: B,C**

Explanation:

Integrating Flow Virtual Networking (FVN) into an NC2 cluster necessitates the creation of specific management and transit subnets to coordinate the overlay traffic. The administrator must ensure that a Prism Central subnet is configured on the Prism Element side to facilitate the management link between the cluster nodes and the centralized management instance. Additionally, a Transit subnet must be configured on Prism Central. This transit subnet is critical because it houses the virtual routing components and gateways that manage traffic flow between different VPCs and the external network. By establishing these two subnets, the administrator provides the necessary control plane and data plane paths for the FVN overlay to communicate effectively with the underlying AWS infrastructure and the broader Nutanix management ecosystem.

### NEW QUESTION # 137

.....

Our NCP-CI-AWS study quiz is made from various experts for examination situation in recent years in the field of systematic analysis of finishing, meet the demand of the students as much as possible, at the same time have a professional staff to check and review NCP-CI-AWS practice materials, made the learning of the students enjoy the information of high quality. Due to the variety of examinations, the NCP-CI-AWS Study Materials are also summarized for different kinds of learning materials, so that students can find the information on NCP-CI-AWS guide torrent they need quickly.
