

High-quality NIS-2-Directive-Lead-Implementer Learning Mode | PECB Pdf NIS-2-Directive-Lead-Implementer Dumps: PECB Certified NIS 2 Directive Lead Implementer

P.S. Free & New NIS-2-Directive-Lead-Implementer dumps are available on Google Drive shared by CramPDF: <https://drive.google.com/open?id=1kUU0LmAmKNNUmTkUOmFB9nDFvsTaxYio>

The price for NIS-2-Directive-Lead-Implementer learning materials is quite reasonable, no matter you are a student or you are an employee in the company, and you can afford the expense. Besides, NIS-2-Directive-Lead-Implementer exam braindumps of us is famous for the high-quality and accuracy. You can pass the exam just one time if you choose us. NIS-2-Directive-Lead-Implementer Learning Materials contain both questions and answers, and you can know the answers right now after you finish practicing. We offer you free update for one year and the update version for NIS-2-Directive-Lead-Implementer exam dumps will be sent to your email automatically.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.
Topic 2	<ul style="list-style-type: none">• Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.
Topic 3	<ul style="list-style-type: none">• Cybersecurity controls, incident management, and crisis management: This domain focuses on Security Operations Managers and Incident Response Coordinators and involves implementing cybersecurity controls, managing incident response activities, and handling crisis situations. It ensures organizations are prepared to prevent, detect, respond to, and recover from cybersecurity incidents effectively.
Topic 4	<ul style="list-style-type: none">• Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.

Excellent NIS-2-Directive-Lead-Implementer Learning Mode for Real Exam

As the authoritative provider of NIS-2-Directive-Lead-Implementer actual exam, we always pursue high pass rate compared with our peers to gain more attention from those potential customers. We guarantee that if you follow the guidance of our NIS-2-Directive-Lead-Implementer learning materials, you will pass the exam without a doubt and get a certificate. Our NIS-2-Directive-Lead-Implementer Exam Practice is carefully compiled after many years of practical effort and is adaptable to the needs of the NIS-2-Directive-Lead-Implementer exam. With high pass rate of more than 98%, you are bound to pass the NIS-2-Directive-Lead-Implementer exam.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q36-Q41):

NEW QUESTION # 36

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established an asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, what will StellarTech identify, record, and maintain during asset management?

- A. An asset portfolio
- **B. An asset framework**
- C. An asset management plan

Answer: B

NEW QUESTION # 37

What information does NOT have to be included in an asset inventory for effective asset management?

- A. Value of assets to the organization
- B. Location of asset
- **C. Market value of assets**

Answer: C

NEW QUESTION # 38

Which of the following teams continuously manages existing threats by establishing rules, identifying exceptions, and detecting emerging risks?

- A. Security operations center team
- B. Crisis management team
- C. Incident response team

Answer: A

NEW QUESTION # 39

What is the primary focus of cryptanalysis?

- A. To analyze and breach secure communication
- B. To safeguard data
- C. To develop encryption keys

Answer: A

NEW QUESTION # 40

To whom should CSIRTs provide information regarding incidents?

- A. CRE authorities
- B. National competent authorities
- C. Cyber crisis management authorities

Answer: B

NEW QUESTION # 41

.....
