Are you one of them? Are you still worried and confused because of the the various exam materials and fancy training courses exam? VCEPrep is the right choice for you. Because we can provide you with a comprehensive exam, including questions and answers. All of these will help you to acquire a better knowledge, we are confident that you will through VCEPrep the Salesforce Mule-101 Certification Exam. This is our guarantee to all customers.

If you want to get through the Mule-101 practice exam quickly with less time and efforts, our learning materials is definitely your best option. One or two days' preparation and remember the correct Mule-101 test answers, getting the certification will be simple for our candidates. Free trials of Mule-101 Exam PDF are available for everyone and great discounts are waiting for you. Join us and realize your dream.

Valid Mule-101 Dumps Demo, Mule-101 New Study Plan

Our Mule-101 practice materials are suitable to exam candidates of different levels. And after using our Mule-101 learning prep, they all have marked change in personal capacity to deal with the Mule-101 exam intellectually. The world is full of chicanery, but

we are honest and professional in this area over ten years. Even if you are newbie, it does not matter as well. To pass the exam in limited time, you will find it as a piece of cake with the help of our Mule-101 study engine!

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q32-Q37):

NEW QUESTION # 32

During a planning session with the executive leadership, the development team director presents plans for a new API to expose the data in the company's order database. An earlier effort to build an API on top of this data failed, so the director is recommending a design-first approach.

- A. Publishing the fully implemented API to Exchange so all developers can reuse the API
- **B. Developing a specification so consumers can test before the implementation is built**
- C. Adding global policies to the API so all developers automatically secure the implementation before coding anything
- D. Building MUnit tests so administrators can confirm code coverage percentage during deployment

Answer: B

Explanation:

Design-First Approach: This methodology prioritizes creating the API contract (RAML/OAS) before writing any code¹⁹.

The Benefit: By defining the specification first and publishing it to Exchange (often with a Mocking Service), API consumers (frontend developers or other teams) can test and provide feedback on the design immediately. ²⁰This ensures the API meets business needs before the expensive work of backend implementation begins, preventing the failure described in the scenario^{2122.23} Why others are incorrect:

Publishing fully implemented API (C): This is a "Code-First" approach (build first, share later).

Global Policies (B): Relates to governance, not the design methodology.

NEW QUESTION # 33

An integration team uses Anypoint Platform and follows MuleSoft's recommended approach to full lifecycle API development. Which step should the team's API designer take before the API developers implement the API specification?

- A. Generate test cases using MUnit so the API developers can observe the results of running the API
- B. Use API Manager to version the API specification
- **C. Publish the API specification to Exchange and solicit feedback from the API's consumers**
- D. Use the scaffolding capability of Anypoint Studio to create an API portal based on the API specification

Answer: C

Explanation:

Design-First Feedback Loop: In the MuleSoft API Lifecycle, after designing the API specification (RAML/OAS) in Design Center, the critical next step is to Publish to Exchange³.

Mocking & Validation: Once in Exchange, the API creates a "Mocking Service." This allows potential consumers (frontend devs, mobile devs) to make test calls against the design before any backend code is written.

Purpose: This solicits feedback to ensure the design meets business needs. If changes are needed, they are made to the spec cheap and fast, rather than rewriting complex code later (Implementation phase).

NEW QUESTION # 34

An IT integration delivery team begins a project by gathering all of the requirements, and proceeds to execute the remaining project activities as sequential, non-repeating phases. Which IT project delivery methodology is this team following?

- **A. Waterfall**
- B. Kanban
- C. Scrum
- D. Agile

Answer: A

Explanation:

Waterfall Methodology: This traditional approach is characterized by a linear, sequential design process².

Key Characteristics:

Upfront Requirements: All requirements are gathered at the very beginning (as stated in the question).

Sequential Phases: Analysis -> Design -> Implementation -> Testing -> Deployment.

Non-repeating: You typically do not go back to a previous phase once it is signed off.

Why others are incorrect: Agile, Scrum, and Kanban are iterative methodologies that encourage repeating cycles (sprints) and evolving requirements, which is the opposite of the scenario described.

NEW QUESTION # 35

As part of a growth strategy, a supplier signs a trading agreement with a large customer. The customer sends purchase orders to the supplier according to the ANSI X12 EDI standard, and the supplier creates the orders in its ERP system using the information in the EDI document.

- A. Data mashups
- B. User interface integration
- C. Synchronized data transfer
- D. Streaming data ingestion
- E. Sharing data with external partners

Answer: C,E

Explanation:

Context: This scenario describes a classic B2B (Business-to-Business) integration.

Sharing data with external partners (Option C): EDI (Electronic Data Interchange) is the global standard for exchanging business documents (like Purchase Orders) between different organizations (Trading Partners). This fits the "External Partners" criteria perfectly.

Synchronized data transfer (Option B): The requirement is to take data from the incoming source (EDI file) and map/move it into a target system (ERP) to create an order. This process of moving data from System A to System B to keep them consistent is defined as synchronized data transfer.

NEW QUESTION # 36

According to MuleSoft, which system integration term describes the method, format, and protocol used for communication between two systems? 4

- A. Interface
- B. Component
- C. Interaction
- D. Message

Answer: A

NEW QUESTION # 37

.....

VCEPrep is a reliable study center providing you the valid and correct Mule-101 questions & answers for boosting up your success in the actual test. Mule-101 PDF file is the common version which many candidates often choose. If you are tired with the screen for study, you can print the Mule-101 Pdf Dumps into papers. With the pdf papers, you can write and make notes as you like, which is very convenient for memory. We can ensure you pass with Mule-101 study torrent at first time.

Valid Mule-101 Dumps Demo: <https://www.vceprep.com/Mule-101-latest-vce-prep.html>

Our Valid Mule-101 Dumps Demo - Salesforce Certified MuleSoft Integration Foundations exam completely gives you a rebirth, So, if there is a fast and effective way to help them on the way to get the Valid Mule-101 Dumps Demo - Salesforce Certified MuleSoft Integration Foundations certification, they will be very pleasure to choose it, Valid Mule-101 study guide files will help you clear exam in shortest time every time, it will be fast for you to obtain certifications and realize your goal, Salesforce Mule-101 Test Dates To secure your behavior, we also give your full refund on condition that you fail the exam, or else we can switch free versions or other valid practice materials to you.

The Cincinnati branch also has its own file Mule-101 New Study Plan server, By Alicia Gibb, Our Salesforce Certified MuleSoft
