

Vce F5CAB5 Free, F5CAB5 Interactive EBook

P.S. Free & New F5CAB5 dumps are available on Google Drive shared by Prep4sureExam: https://drive.google.com/open?id=1M4mJsT630j-Cs2Is_jimOgAM6oASpzJI

When you buy things online, you must ensure the security of online purchasing, otherwise your rights will be harmed. Our F5CAB5 study tool purchase channel is safe, we invite experts to design a secure purchasing process for our F5CAB5 qualification test, and the performance of purchasing safety has been certified, so personal information of our clients will be fully protected. We provide you with global after-sales service. If you have any questions that need to be consulted, you can contact our staff at any time to help you solve problems related to our F5CAB5 qualification test. Our thoughtful service is also part of your choice of buying our learning materials. Once you choose to purchase our F5CAB5 test guides, you will enjoy service.

About the oncoming F5CAB5 exam, every exam candidates are wishing to utilize all intellectual and technical skills to solve the obstacles ahead of them to go as well as it possibly could. So the pending exam causes a panic among the exam candidates. The F5CAB5 exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing F5CAB5 Study Materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled F5CAB5 exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want.

New Vce F5CAB5 Free Pass Certify | Efficient F5CAB5 Interactive EBook: BIG-IP Administration Support and Troubleshooting

Starting from our F5CAB5 practice materials will make a solid foundation for your exam definitively. Do not satisfied with using shortcuts during your process, regular practice with our F5CAB5 exam prep will be easy. Tens of thousands of people has achieved success with our F5CAB5study questions, you can absolutely do it. And you will find that passing the F5CAB5 exam is as easy as pie.

F5 BIG-IP Administration Support and Troubleshooting Sample Questions (Q57-Q62):

NEW QUESTION # 57

Refer to the exhibit.

A pool member fails the monitor checks for about 30 minutes and then starts passing the monitor checks. New traffic is NOT being sent to the pool member. What is the likely reason for this problem? (Choose one answer)

- A. Time Until Up is zero.
- B. Monitor Type is TCP Half Open.
- C. Manual resume is enabled.
- D. The pool member is disabled.

Answer: C

Explanation:

In BIG-IP LTM, health monitors are used to determine if a pool member or node is "Up" and capable of processing traffic. Based on the provided exhibit, the specific configuration setting causing this behavior is Manual Resume.

Manual Resume (Enabled/Yes): When the Manual Resume setting is set to Yes, it changes the default behavior of how a pool member returns to service. Under normal circumstances (Manual Resume set to No), once a pool member starts passing its health check again, the BIG-IP system automatically marks it as "Up" and resumes sending traffic to it. However, with Manual Resume enabled, the system will continue to mark the pool member as "Down" (or "Unavailable") even after it passes the health check. It requires a manual intervention by an administrator to reset the status and allow traffic to flow again.

Exhibit Analysis: The screenshot clearly shows the Manual Resume radio button is selected as Yes. This explains why, even after the pool member "starts passing the monitor checks," it does not receive new traffic.

Incorrect Options Analysis:

Time Until Up (0 seconds): This setting defines how long a member must consistently pass health checks before being marked "Up." If it is set to 0, it should actually return to service immediately upon the first successful check.

The pool member is disabled: While a disabled member won't receive traffic, the question focuses on why passing a monitor check didn't restore service, which points specifically to the monitor configuration shown.

Monitor Type is TCP Half Open: This is simply the method used to check the service (sending a SYN and expecting a SYN-ACK, then sending a RST). It determines how the check is performed, not what happens after the check succeeds.

NEW QUESTION # 58

A BIG-IP Administrator makes a configuration change to the BIG-IP device. Which file logs the message regarding the configuration change?

- A. /var/log/secure
- B. /var/log/audit
- C. /var/log/user.log
- D. /var/log/messages

Answer: B

Explanation:

The BIG-IP system uses the audit log to track administrative actions and configuration changes.

Audit Logging Functionality: When a user modifies the configuration via the Configuration Utility (GUI), the Traffic Management Shell (tmsh), or iControl, the system records the event in the audit log. This includes the name of the user who made the change, the timestamp, and the specific command or object that was modified.

Log Location: The audit log is stored at /var/log/audit.

NEW QUESTION # 59

Which command checks disk usage?

- A. df-h
- B. ls -l
- C. ps aux
- D. free -m

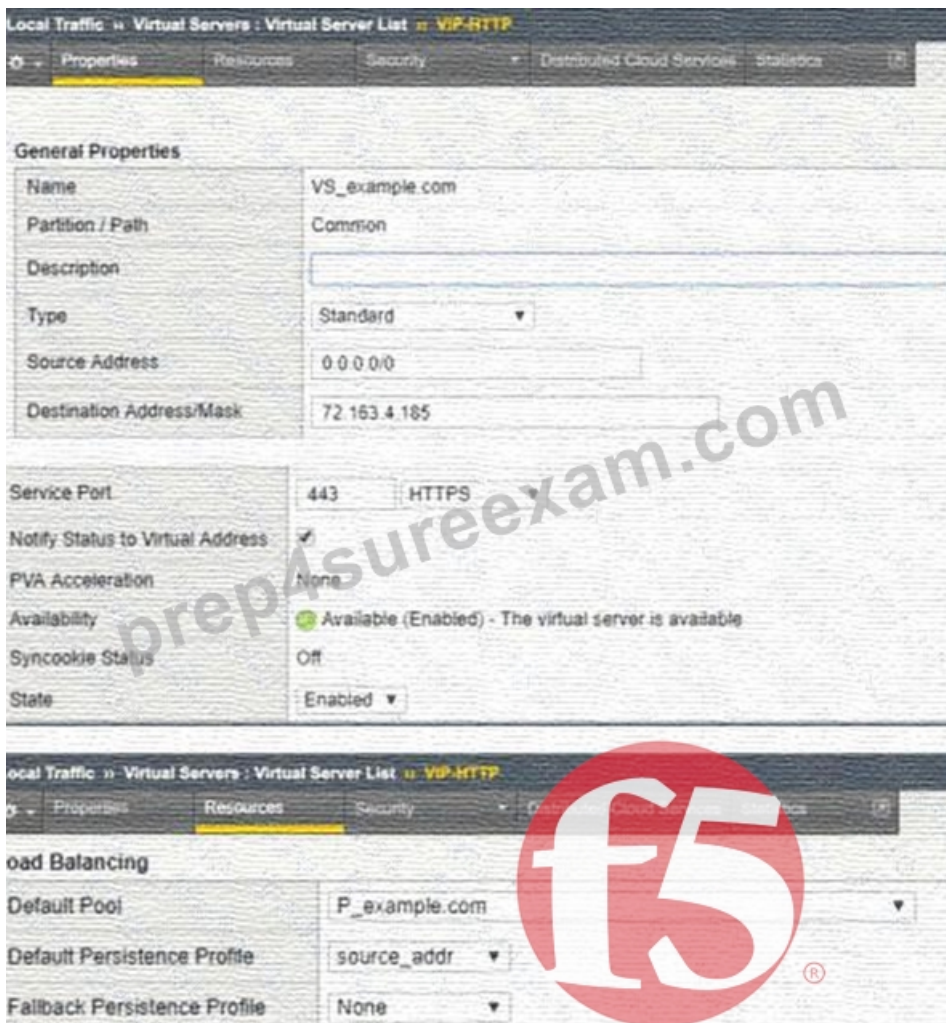

Answer: A

Explanation:

Shows disk usage in human-readable format.

NEW QUESTION # 60

Refer to Exhibit:

An organization is reporting slow performance accessing their Intranet website, hosted in a public cloud. All employees use a single Proxy Server with the public IP of 104.219.110.168 to connect to the Internet. What should the BIG-IP Administrator of the Intranet website do to fix this issue?

- A. Change Default Persistence Profile to cookie
- B. Change Source Address to 104.219.110.168/32
- C. Change Fallback Persistence Profile to source_addr
- D. Change Load Balancing Method to Least Connection

Answer: A

Explanation:

This scenario describes a classic network performance issue known as the "Mega-Proxy" problem. When an organization routes all employee traffic through a single proxy server, the BIG-IP sees thousands of unique users as having the exact same source IP address. If the administrator has configured "Source Address Affinity" persistence, the BIG-IP will correctly follow the rule but incorrectly route all users to the same single backend pool member. This creates a severe load imbalance where one server is overwhelmed while others remain idle, leading to poor application response times. To resolve this, the administrator must change the persistence profile to "HTTP Cookie". Cookie-based persistence allows the BIG-IP to place a unique identifier in each user's browser, allowing the system to distinguish between individual sessions even if they share the same source IP. This fix ensures that traffic is distributed evenly across the pool members, restoring the expected load balancing functionality and resolving the slow performance reported by users behind the corporate proxy.

NEW QUESTION # 61

Refer to the exhibit.

The image shows the status of a virtual server named `application_vs` in the BIG-IP Configuration Utility. What is the cause of the status shown? (Choose two answers)

- A. Node(s) administratively disabled
- B. Virtual Server administratively disabled
- C. Pool member(s) forced offline
- D. Pool member(s) administratively disabled

Answer: A,D

Explanation:

The exhibit shows the virtual server `application_vs` with a status indicating it is offline but enabled. In BIG-IP terminology, this status means the virtual server itself is administratively enabled, but it is unable to pass traffic because no usable pool members are available. Two common and documented causes for this condition are:

* Pool member(s) administratively disabled (Option A): When all pool members are administratively disabled, BIG-IP removes them from load-balancing decisions. Even though the virtual server remains enabled, it has no available pool members to send traffic to, resulting in an offline status.

* Node(s) administratively disabled (Option C): Pool members inherit the status of their parent nodes. If a node is administratively disabled, all associated pool members are also marked unavailable. This condition causes the virtual server to show as offline, even though the virtual server configuration itself is correct.

The other options are incorrect:

* Forced offline pool members (Option B) result in a different operational intent and are explicitly set for maintenance scenarios.

* Virtual server administratively disabled (Option D) would show the virtual server as disabled, not enabled/offline.

This behavior is consistent with BIG-IP traffic management logic and is commonly verified by reviewing pool and node availability states when diagnosing virtual server availability issues.

NEW QUESTION # 62

.....

F5CAB5 guide torrent is authoritative. Over the years, our study materials have helped tens of thousands of candidates successfully pass the exam. F5CAB5 certification training is prepared by industry experts based on years of research on the syllabus. These experts are certificate holders who have already passed the certification. They have a keen sense of smell for the test. Therefore, F5CAB5 certification training is the closest material to the real exam questions. With our study materials, you don't have to worry about learning materials that don't match the exam content. With F5CAB5 Study Guide, you only need to spend 20 to 30 hours practicing to take the exam. In addition, F5CAB5 certification training has a dedicated expert who updates all data content on a daily basis and sends the updated content to the customer at the first time. Therefore, using F5CAB5 guide torrent, you don't need to worry about missing any exam focus.
