Google Cloud-Digital-Leader Dumps PDF And Practice Test Software

Nowadays, it is widely believed that getting a certificate is quite important for some jobs. Cloud-Digital-Leader Exam Braindumps contain the main knowledge of the exam, and it will help you pass the exam. Cloud-Digital-Leader exam dumps not only have the quality, but also have the quantity, and it's enough for you to practice. What's more, we respect the private information of the buyers, your personal information such as the name or email address will be protected well.

Google Cloud Digital Leader Exam is an excellent opportunity for individuals to demonstrate their expertise in Google Cloud and their ability to lead their organizations in adopting and implementing cloud solutions. Passing the exam validates the candidate's skills and knowledge and demonstrates their commitment to driving innovation and digital transformation in their organization.

Google Cloud Digital Leader Sample Questions (Q320-Q325):

NEW QUESTION # 320
Your organization runs many workloads in different Google Cloud projects, each linked to the same billing account. Each project's workload costs can vary from month to month, but the overall combined cost of all projects is relatively stable. Your organization needs to optimize its cost.
What should your organization do?

- A. Purchase a commitment per project for each project's usual minimum
- B. Turn on committed use discount sharing, and create a commitment for the combined usage
- C. Create a billing account per project, and link each project to a different billing account

- D. Move all workloads from all different projects into one single consolidated project

Answer: B

Explanation:
Turn on committed use discount sharing, and create a commitment for the combined usage Sharing your committed use discounts across all your projects reduces the overhead of managing discounts on a per-project basis, and maximizes your savings by pooling all your discounts across your projects' resource usage. If you have multiple projects that share the same Cloud Billing account, you can enable committed use discount sharing so all of your projects within that Cloud Billing account share all of your committed use discount contracts. Your sustained use discounts are also pooled at the same time. That is, sustained use discounts are calculated using the total resources across these projects, rather than just the resources within a single project.

NEW QUESTION # 321
Firebase Hosting provides the following services-

- A. All of the Above.
- B. Microservices.
- C. Static content.
- D. Dynamic content

Answer: A

Explanation:
Firebase Hosting- Firebase Hosting provides fast and secure hosting for your web app, static and dynamic content, and microservices.
Firebase Hosting is production-grade web content hosting for developers. With a single command, you can quickly deploy web apps and serve both static and dynamic content to a global CDN (content delivery network). You can also pair Firebase Hosting with Cloud Functions or Cloud Run to build and host microservices on Firebase.
Key capabilities of Firebase Hosting:
Serve content over a secure connection:- The modern web is secure. Zero-configuration SSL is built into Firebase Hosting, so content is always delivered securely.
Host static and dynamic content plus microservices:- Firebase Hosting supports all kinds of content for hosting, from your CSS and HTML files to your Express.js microservices or APIs.
Deliver content fast: Each file that you upload is cached on SSDs at CDN edges around the world and served as gzip or Brotli. We auto-select the best compression method for your content. No matter where your users are, the content is delivered fast.

NEW QUESTION # 322
An organization supplies electric car chargers in a nationwide network. They store customer and charging data in BigQuery. They want to efficiently upgrade and maintain their network to reduce waste and achieve their sustainability goals. How can Google Cloud services help the organization?

- A. Provide access to third-party developers by creating an API using Apigee.
- B. Create a model in BiaQuery to Dredict future maintenance schedules.
- C. Move data from BigQuery to Cloud Storage to reduce storage costs.
- D. Secure data access by using Identity and Access Management.

Answer: B

NEW QUESTION # 323
Your organization is developing an application that will manage payments and online bank accounts located around the world. The most critical requirement for your database is that each transaction is handled consistently. Your organization anticipates almost unlimited growth in the amount of data stored.
Which Google Cloud product should your organization choose?

- A. Cloud SQL
- B. Cloud Storage
- C. Cloud Spanner
- D. Firestore

Answer: C

Explanation:
Features of Cloud Spanner
Reference:

NEW QUESTION # 324

An organization is developing applications by using Kubernetes. They want their teams to spend more time developing rather than managing clusters. Which Google Cloud service should the organization choose?

- A. Cloud Run
- B. GKE Autopilot
- C. GKE Standard
- D. Compute Engine

Answer: B
