Due to the variety of examinations, so that students can find the information on SAFe-RTE guide engine they need quickly.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q105-Q110):

NEW QUESTION # 105

The Release Train Engineer ensures that Business Owners assign business value to what during Program Increment (PI) Planning?

- A. Team-level PI Objectives
- B. Program-level PI Objectives
- C. Features
- D. Stories

Answer: A

Explanation:

During PI Planning, the RTE works with Business Owners to ensure they assign business value scores to each team's PI Objective:

* Quantifying Value: Assigning a numerical score to objectives allows for objective measurement of the value delivered at the end of the PI.

* Prioritization and Decision-Making: Business value scores help teams and stakeholders understand the relative importance of

objectives, informing decision-making processes.

References:

* Scaled Agile Framework (SAFe) Program Increment and PI Planning Articles: Both articles outline the involvement of Business Owners and the quantitative scoring of PI Objectives. <https://www.scaledagileframework.com/pi-planning/>

NEW QUESTION # 106

What is the only true objective measure of an Agile Release Train?

- A. Scrum of scrums
- B. Team status report
- **C. System Demo**
- D. Cumulative flow diagram

Answer: C

Explanation:

The System Demo is the only true objective measure of an Agile Release Train (ART) within the SAFe framework. It is a significant event that occurs at the end of each Iteration where the current state of the Solution is demonstrated to stakeholders. This event reflects the integrated efforts of all the teams on the ART and provides a clear, objective measure of progress¹.

The System Demo serves several critical purposes:

- * It provides a regular, objective assessment of the solution's evolving functionality.
- * It offers a platform for feedback from stakeholders, which is vital for the iterative improvement of the solution.
- * It fosters transparency and alignment among teams and stakeholders.

By showcasing the working system, the demo ensures that everyone has a shared understanding of what has been accomplished and what is still in progress. This aligns with the SAFe principle of transparency and enables informed decision-making based on the actual state of the solution¹.

NEW QUESTION # 107

What information is covered during the final plan review?

- A. Changes to Iteration Goals, measured velocity, and dependencies
- **B. Changes to capacity and load, final PI Objectives, ART PI Risks, and impediments**
- C. Planned Features, uncommitted objectives, and ROAMed risks
- D. Team Features, Stories, and team-level Enablers

Answer: B

Explanation:

During the final plan review of the Program Increment (PI) Planning, the teams cover several critical pieces of information. This includes any changes to team capacity and load, which may affect the delivery of PI Objectives. The final PI Objectives are reviewed to ensure alignment with the ART's goals. Additionally, ART PI Risks are addressed, including any new risks identified during the planning process, and existing risks that have been ROAMed (Resolved, Owned, Accepted, Mitigated). Lastly, any impediments that could hinder the ART's progress are discussed, ensuring that they are acknowledged and addressed appropriately. This comprehensive review is essential for the ART to commit to a set of PI Objectives that are achievable and aligned with the overall strategy¹.

NEW QUESTION # 108

What is the purpose of Iteration Goals?

- **A. To align the team members and the Product Owner to the mission**
- B. To hold the team accountable to their PI Objectives
- C. To summarize the business outcomes an Agile Team intends to achieve during the Program Increment (PI)

Answer: A

NEW QUESTION # 109

Who are two key collaborators with the RTE to support the ART? (Choose two)

- A. Product Owners
- B. Release Management
- **C. Product Management**
- D. Scrum Masters
- **E. System Architects/Engineers**

Answer: C,E

Explanation:

According to the SAFe 6 Release Train Engineer documentation, the Release Train Engineer (RTE) is a servant leader and coach for the Agile Release Train (ART). The RTE's role involves facilitating ART events and processes, assisting teams in delivering value, communicating with stakeholders, escalating impediments, managing risk, and driving relentless improvement.

Key collaborators with the RTE include:

* System Architects/Engineers1: They collaborate with the RTE to ensure that the architectural vision and technical aspects are integrated into the ART's work, supporting the teams in delivering a solution that is technically robust and aligns with the organization's strategic goals.

* Product Management1: They work closely with the RTE to align the ART with the product vision and roadmap, ensuring that the features developed by the teams contribute to the overall strategy and deliver value to the customers.

These roles are essential for the effective functioning of the ART, providing the necessary technical guidance and strategic alignment to support the RTE in leading the ART towards successful delivery.
