## Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q168-Q173):

### NEW QUESTION # 168

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3 and a file named File1.docx. You create a sensitivity label named Label1 as shown in the following exhibit.

You apply Label1 to File1.

For which users can Microsoft 365 Copilot summarize File1?

- A. User 1 only
- B. User1 and User2 only
- C. User1, User2, and User3
- D. No user

**Answer: C**

### NEW QUESTION # 169

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant.

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You onboard the computers to Microsoft Defender for Endpoint. Does this meet the goal?

- A. No
- B. Yes

**Answer: B**

Explanation:

Microsoft Endpoint DLP relies on Microsoft Defender for Endpoint (MDE) for its enforcement.

Onboarding Windows 10/11 devices to Defender for Endpoint ensures the Endpoint DLP policies can be applied, including monitoring and protecting content across apps and browsers.

### NEW QUESTION # 170

You have a Microsoft 365 E5 subscription.

You need to create a sensitivity label named Label1. The solution must ensure that users can use Microsoft 365 Copilot to summarize files that have Label1 applied.

Which permission should you select for Label1?

- A. Copy and extract content (EXTRACT)
- B. Edit content (DOCEDIT)
- C. Export content (EXPORT)
- D. View rights (VIEW)

**Answer: A**

Explanation:

To allow Microsoft 365 Copilot to summarize files that have Label1 applied, the label must grant permission to extract content from the document. The correct permission for this is Copy and extract content (EXTRACT).

Microsoft 365 Copilot requires access to read and process content in documents to generate summaries. The EXTRACT permission allows users (and AI tools like Copilot) to copy and extract content for processing while still maintaining the protection applied by the sensitivity label.
