## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Creating good security metrics is essential for a CISO. What would be the BEST sources for creating security metrics for baseline defenses coverage?

- A. Servers, routers, switches, modem
- B. Firewall, exchange, web server, intrusion detection system (IDS)
- **C. Firewall, anti-virus console, IDS, syslog**
- D. IDS, syslog, router, switches

**Answer: C**

Explanation:

Sources for Security Metrics:

- \* Metrics must derive from systems that monitor and enforce baseline defenses.
- \* Firewalls, anti-virus consoles, IDS, and syslog provide comprehensive insights into threats, events, and compliance.

Why This is Correct:

- \* Covers both perimeter defenses (firewall) and endpoint protection (anti-virus).
- \* IDS monitors threats in real-time, while syslog centralizes logs for analysis.

Why Other Options Are Incorrect:

- \* A. Servers, routers, switches, modem: Focuses on hardware, not security metrics.
- \* B. Firewall, exchange, web server, IDS: Exchange and web servers are application-specific.
- \* D. IDS, syslog, router, switches: Misses critical endpoints like firewalls and anti-virus.

References: EC-Council emphasizes leveraging these tools for creating meaningful and actionable security metrics.

### NEW QUESTION # 67

The establishment of a formal risk management framework and system authorization program is essential. The LAST step of the system authorization process is:

- A. Changing the default passwords
- B. Conducting a final scan of the live system and mitigating all high and medium level vulnerabilities
- C. Contacting the Internet Service Provider for an IP scope
- **D. Getting authority to operate the system from executive management**

**Answer: D**

### NEW QUESTION # 68

When working in the Payment Card Industry (PCI), how often should security logs be review to comply with the standards?

- A. Weekly
- B. Monthly
- C. Hourly
- **D. Daily**

**Answer: D**

### NEW QUESTION # 69

Which of the following organizations is typically in charge of validating the implementation and effectiveness of security controls?

- A. Security Administrators
- B. Security Operations
- C. Risk Management
- **D. Internal/External Audit**

**Answer: D**

Explanation:

Role of Internal/External Auditors:

- \* Auditors validate whether security controls are implemented effectively and operating as intended.
- \* Internal audits ensure adherence to organizational policies, while external audits provide an independent perspective.

Why This is Correct:

- \* Both internal and external audits focus on control validation and compliance with standards.

Why Other Options Are Incorrect:

\* A. Security Administrators: Responsible for implementing controls, not validating them.

\* C. Risk Management: Focuses on risk assessment, not direct control validation.

\* D. Security Operations: Ensures ongoing security but does not perform validation.

References: EC-Council highlights auditing functions as critical for validating security control implementation and effectiveness.

### NEW QUESTION # 70

At what level of governance are individual projects monitored and managed?

- A. Milestone
- B. Portfolio
- C. Program
- D. Enterprise

**Answer: C**

Explanation:

\* Governance Levels:

\* Individual projects are grouped under programs, which are monitored and managed collectively to achieve specific outcomes or benefits.

\* Program vs. Portfolio:

\* Programs consist of interrelated projects.

\* Portfolios include multiple programs and standalone projects aligned with strategic objectives.

\* Why Program Level:

\* Projects are tracked at the program level to ensure alignment with overarching goals and efficient resource allocation.

References:

\* EC-Council CISO Module: Governance Structures and Monitoring Practices.

### NEW QUESTION # 71

.....
