

# Use The Open Group OGEA-101 Exam Questions And Get Excellent Marks

BONUS!!! Download part of 2Pass4sure OGEA-101 dumps for free: [https://drive.google.com/open?id=128bkfGJI\\_OHi2gAGROy6YbyFZk02DA9Y](https://drive.google.com/open?id=128bkfGJI_OHi2gAGROy6YbyFZk02DA9Y)

Our 2Pass4sure OGEA-101 certification exam information is suitable for all IT certification OGEA-101 exam. Its usability is fit for various fields of IT. 2Pass4sure's OGEA-101 exam certification training materials is worked out by senior IT specialist team through their own exploration and continuous practice. Its authority is undoubted. If there is any quality problem of OGEA-101 Exam Dumps and answers you buy or you fail OGEA-101 certification exam, we will give full refund unconditionally

As is known to us, people who want to take the OGEA-101 exam include different ages, different fields and so on. It is very important for company to design the OGEA-101 exam prep suitable for all people. However, our company has achieved the goal. We can promise that the OGEA-101 test questions from our company will be suitable all people. There are many functions about our study materials beyond your imagination. You can purchase our OGEA-101 reference guide according to your own tastes. We believe that the understanding of our OGEA-101 study materials will be very easy for you.

## Updated The Open Group OGEA-101 Practice Material for Exam Preparation

Once you decide to take The Open Group OGEA-101 practice questions from 2Pass4sure then consider your money secure. 2Pass4sure is the only reliable brand that regularly updates TOGAF Enterprise Architecture Part 1 Exam OGEA-101 exam products. We have a team of competent employees who update The Open Group OGEA-101 exam preparation material on daily basis according to the exam syllabus. So, you don't need to get worried. You can try a free demo of all OGEA-101 practice question formats before purchasing. Furthermore, 2Pass4sure offers a 100% money-back guarantee. If you don't pass the TOGAF Enterprise Architecture Part 1 Exam OGEA-101 exam after using our product then you can claim a refund and we will refund you as soon as possible.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Implementation Governance: This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li> </ul>

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q112-Q117):

### NEW QUESTION # 112

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	Completion of the projects to implement the changes necessary to reach the adjusted target state.	Purpose and constraints on the implementation team. (Gap, Architecture Requirement Specification, Control) How stakeholder priority and preference adjust in response to success, value, effort, and risk of change. (Stakeholder Requirements)

Which ADM Phase does this describe?

- A. Phase A
- B. Phase E
- C. Phase G
- D. Phase F

**Answer: C**

Explanation:

The table describes the output, outcome, and essential knowledge of an ADM phase that oversees the implementation of changes necessary to reach the adjusted target state. This corresponds to Phase G, also known as Implementation Governance, which ensures that the architecture defined in earlier phases is realized, and it oversees the development and implementation of projects to align with this architecture. The essential knowledge required during this phase includes understanding constraints on the implementation team and adjusting stakeholder priority and preference in response to success, value, effort, and risk of change.

Reference: TOGAF Version 9.1 - 1

### NEW QUESTION # 113

Consider the following description of the purpose of an ADM Phase:

To develop a domain architecture approved by the stakeholders for the problem being addressed, together with a set of gaps, and work to clear the gaps understood by the stakeholders.

Which ADM Phase does this describe?

- A. Preliminary Phase
- B. Phase A
- C. Phase E
- **D. Phase B**

**Answer: D**

Explanation:

This description matches Phase B: Business Architecture. In TOGAF, Phase B is the phase in which the architect develops the target Business Architecture and identifies the gaps between the baseline and target states. The phase is not limited to producing models only; it also ensures that the resulting domain architecture is reviewed and approved by stakeholders and that the implications of the gaps are understood. The wording in the question is characteristic of the domain architecture phases, and among the options provided, Phase B is the only domain architecture phase listed.

Phase A is concerned with developing the Architecture Vision, scope, constraints, and stakeholder consensus at a high level. The Preliminary Phase establishes the architecture capability and governance framework.

Phase E is focused on Opportunities and Solutions, where solution building blocks, work packages, and transition approaches are identified. None of those primarily describe development of a domain architecture with stakeholder approval and identified gaps.

Because the question refers to a domain architecture, stakeholder approval, and a defined set of gaps to be addressed, the best answer is Phase B. It represents the ADM phase where the Business Architecture is formally developed and agreed.

### NEW QUESTION # 114

What are the following activities part of?

- . Risk classification
- . Risk identification
- . Initial risk assessment

- A. Phase A
- B. Security Architecture
- **C. Risk Management**
- D. Phase G

**Answer: C**

Explanation:

Risk management is a generic technique that can be applied across all phases of the Architecture Development Method (ADM), as well as in the Preliminary Phase and the Requirements Management Phase2.

Risk management involves the following steps1:

\*Risk identification: This step involves identifying the potential risks that may affect the architecture project, such as technical, business, organizational, environmental, or legal risks. The risks can be identified through various sources, such as stakeholder interviews, workshops, surveys, checklists, historical data, or expert judgment.

\*Risk classification: This step involves categorizing the risks based on their nature, source, impact, and priority. The risks can be classified according to different criteria, such as time, cost, scope, quality, security, or compliance. The classification helps in prioritizing the risks and allocating resources and efforts to address them effectively.

\*Initial risk assessment: This step involves assessing the likelihood and impact of each risk, and determining the initial level of risk. The likelihood is the probability of the risk occurring, and the impact is the severity of the consequences if the risk occurs. The initial level of risk is the product of the likelihood and impact, and it indicates the urgency and importance of the risk. The initial risk assessment helps in identifying the most critical risks that need immediate attention and mitigation.

### NEW QUESTION # 115

Consider the following ADM phases objectives.

	Objective
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

- A. 1F-2F-3E-4G
- B. 1G-2E-3F-4E
- C. 1F-2G-3F-4F
- D. 1E-2F-3E-4G

**Answer: D**

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F:

To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented

#### NEW QUESTION # 116

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Which deliverables match these descriptions?

- A. 1 Architecture Principles - 2 Architecture Requirements Specification - 3 Request for Architecture Work - 4 Statement of Architecture Work
- B. 1 Request for Architecture Work - 2 Statement of Architecture Work - 3 Architecture Principles - 4 Architecture Requirements Specification
- C. 1 Architecture Requirements Specification - 2 Request for Architecture Work - 3 Statement of Architecture Work - 4 Architecture Principles
- D. 1 Statement of Architecture Work - 2 Architecture Principles - 3 Architecture Requirements Specification - 4 Request for Architecture Work

**Answer: B**

Explanation:

The Request for Architecture Work is a deliverable that is sent from the sponsor and triggers the start of an architecture development cycle. It defines the scope, budget, schedule, and deliverables for a specific architecture project. The Statement of Architecture Work is a deliverable that is produced by the architect and defines the approach and resources needed to complete an architecture project. It forms the basis of a contractual agreement between the sponsor and the architecture organization. The Architecture Principles are a deliverable that is produced by the architect and defines the general rules and guidelines for the architecture work. They reflect the business principles, business goals, and business drivers of the organization. The Architecture Requirements Specification is a deliverable that is produced by the architect and defines the requirements that govern the architecture work. It covers both functional and non-functional requirements as well as constraints and assumptions.

## NEW QUESTION # 117

.....

Without bothering to stick to any formality, our TOGAF Enterprise Architecture Part 1 Exam OGEEA-101 learning quiz can be obtained within five minutes. No need to line up or queue up to get our OGEEA-101 practice materials. They are not only efficient on downloading aspect, but can expedite your process of review.
