## Choosing The Valid PDII Exam Camp Means that You Have Passed Platform Developer II

Our company have the higher class operation system than other companies, so we can assure you that you can start to prepare for the PDII exam with our study materials in the shortest time. In addition, if you decide to buy PDII exam materials from our company,

we can make sure that your benefits will far exceed the costs of you. The rate of return will be very obvious for you. We sincerely reassure all people on the PDII Test Question from our company and enjoy the benefits that our study materials bring. We believe that our study materials will have the ability to help all people pass their PDII exam and get the related exam in the near future.

# Salesforce Platform Developer II Sample Questions (Q92-Q97):

NEW QUESTION # 92
Refer to the component code and requirements below:
HTML
<lightning:layout multipleRows="true">
<lightning:layoutItem size="12">{!v.account.Name}</lightning:layoutItem>
<lightning:layoutItem size="12">{!v.account.AccountNumber}</lightning:layoutItem>
<lightning:layoutItem size="12">{!v.account.Industry}</lightning:layoutItem>
</lightning:layout>
Requirements:
* For mobile devices, the information should display in three rows.
* For desktops and tablets, the information should display in a single row.
Requirement 2 is not displaying as desired. Which option has the correct component code to meet the requirements for desktops an7d tablets?

- A. HTML
  <lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" mediumDeviceSize="6">{!v.account.Name}</lightning:layoutItem>
  <lightning:layoutItem size="12" mediumDeviceSize="6">{!v.account.AccountNumber}</lightning:layoutItem>
  <lightning:layoutItem size="12" mediumDeviceSize="6">{!v.account.Industry}</lightning:layoutItem>
  </lightning:layout>
- B. <lightning:layout multipleRows="true"></lightning:layout>1213
- C. HTML
  <lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" mediumDeviceSize="4" largeDeviceSize="4"> {!v.account.Name} < /lightning:layoutItem>
  <lightning:layoutItem size="12" mediumDeviceSize="4" largeDeviceSize="4"> {!v.account.AccountNumber} </lightning:layoutItem>
  <lightning:layoutItem size="12" mediumDeviceSize="4" largeDeviceSize="4"> {!v.account.Industry} </lightning:layoutItem>
  </lightning:layout>
- D. 1415
  HTML
  <lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" largeDeviceSize="4">{!v.account.Name}</lightning:layoutItem>
  <lightning:layoutItem size="12" largeDeviceSize="4">{!v.account.AccountNumber}</lightning:layoutItem>
  <lightning:layoutItem size="12" largeDeviceSize="4">{!v.account.Industry}</lightning:layoutItem>
  </lightning:layout>

**Answer: C**

Explanation:
To achieve a responsive layout in Salesforce Aura components, the lightning:layout and lightning:layoutItem components utilize a 12-column grid system. The size attribute defines the default behavior, which targets the smallest devices (mobile). In the original code, size="12" is applied to all three items. Since each item occupies the full 12 columns, they stack vertically in three rows.
To meet Requirement 2 (displaying in a single row for tablets and desktops), the three items must share the
12-column horizontal space. Mathematically, $12 \div 3 = 4$. Therefore, each item must be assigned a size of
4 for larger screen breakpoints.
Option D is the correct implementation. It maintains size="12" for mobile (Requirement 1) and sets mediumDeviceSize (tablets) and largeDeviceSize (desktops) to 4. This ensures that on any screen larger than a phone, the three items will sit side-by-side in a single row.
Option A is incorrect because mediumDeviceSize="6" would only allow two items per row ($6 + 6 = 12$), forcing the third item to a second row. Option C is incomplete as it only specifies the largeDeviceSize, potentially leaving tablets in a stacked configuration. Option D follows the best practice of explicitly defining the span for all relevant device categories to ensure a consistent user

experience.

## NEW QUESTION # 93

Choose the correct definition for <apex:messages>.

- A. Standard Salesforce formatting, shows all errors that occur on page. Can add more messages through the "ApexPages.addMessage" function
- B. No formatting; displays all errors on a page
- C. Standard Salesforce formatting, throws a specific message on a page
- D. A single message, without formatting, that can be associated with a specific component on the page

**Answer: A**

## NEW QUESTION # 94

Which method should be used to convert a Date to a String in the current user's locale?

- A. Date.paras
- B. Date. format
- C. String.format
- D. String.valueof

**Answer: B**

Explanation:

The best method to use to convert a Date to a String in the current user's locale is Date.format. This method returns a String that represents the Date in the format of the current user's locale. For example, if the current user's locale is English (United States), the Date.format method will return a String in the format of MM/DD/YYYY. The String.format method is used to format a String with placeholders and arguments, not a Date. The Date.parse method is used to convert a String to a Date, not the other way around. The String.valueOf method is used to convert any type to a String, but it does not take into account the current user's locale.
Reference: [Date Class], [Apex Developer Guide]

## NEW QUESTION # 95

An org has a requirement that an Account must always have one and only one Contact listed as Primary. So selecting one Contact will de-select any others. The client wants a checkbox on the Contact called 'Is Primary' to control this feature. The client also wants to ensure that the last name of every Contact is stored entirely in uppercase characters. What is the optimal way to implement these requirements?12345

- A. Write an after update trigger on Conta11ct for the Is Primary logic and a separate befo12re update trigger on Contact for th13e last name logic.
- B. Write an after update trigger on Account for the Is Primary logic and a before update trigger on Contact for the last name logic.
- C. Write a Validation Rule on the Contact for the Is Primary logic and a before upd6ate trigger on Contact for the last name lo7gic.8910
- D. Write a single trigger on Contact for both after update and before update and callout to helper classes to handle each set of logic.14

**Answer: D**

Explanation:
16
The optimal architectural ap17proach for complex logic on a single object is to use a single trigger per object that delegates responsibilities to a helper class. This requirement involves two distinct types of logic: field manipulation (uppercase names) and cross-record updates (ensuring only one primary contact).
In Salesforce, Before triggers are ideal for updating fields on the record that initiated the trigger, as the changes are saved to the database without an additional DML statement. Therefore, converting the LastName to uppercase should occur in a before update and before insert context. Conversely, the "Is Primary" logic requires updating other records (de-selecting other contacts on the same account). This must happen in an After trigger context to ensure the primary record has been successfully updated and to avoid recursion or conflicts with the initial save.

Option D is the best practice because it follows the "One Trigger Per Object" design pattern. By using a single trigger with multiple context variables (isBefore, isAfter, isUpdate), the developer can cleanly route the "Last Name" logic to a before-save helper and the "Is Primary" cross-record update logic to an after-save helper.

This centralized control prevents multiple triggers from firing in an unpredictable order and simplifies maintenance and debugging.

## NEW QUESTION # 96

Which of the following standard fields are indexed? (Choose three.)

- A. RecordType
- B. CreatedBy
- C. LastModifedDdate
- D. SystemModStamp
- E. Name

**Answer: B,D,E**

## NEW QUESTION # 97

......

Many candidates who take the qualifying exams are not aware of our PDII exam questions and are not guided by our systematic guidance, and our users are much superior to them. In similar educational products, the PDII quiz guide is absolutely the most practical. Also, from an economic point of view, our PDII Exam Guide Materials is priced reasonable, so the PDII test material is very responsive to users, user satisfaction is also leading the same products. You can deeply depend on our PDII exam guide materials when you want to get the qualification.
