## SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q84-Q89):

### NEW QUESTION # 84

What features are supported by the SAP Analytics Cloud data analyzer? Note: There are 3 correct answers to this question.

- A. Charts
- B. Linked dimensions

- C. Conditional formatting
- D. Calculated measures
- E. Input controls

**Answer: C,D,E**

Explanation:

The SAP Analytics Cloud Data Analyzer is designed for ad-hoc data exploration and analysis, providing a focused environment for users to quickly derive insights. Among its key supported features are calculated measures, which allow users to create new metrics on the fly based on existing data, enabling deeper analysis without modifying the underlying model. Input controls are also supported, providing interactive filtering capabilities that allow users to dynamically adjust the data displayed based on specific criteria, enhancing the flexibility of their analysis. Furthermore, conditional formatting is a valuable feature that enables users to apply visual styling (e.g., colors, icons) to data points based on defined rules, making it easier to identify trends, outliers, or specific conditions at a glance. While charts and linked dimensions are integral to full stories, the Data Analyzer's strength lies in its immediate, flexible analytical capabilities for a single data source.
